Disclaimer

This Request for Proposal (RFP) is issued by Ministry of Health & Family Welfare (MoHFW). The sole objective of this document is to solicit technical and financial offers from the parties interested in taking part in the work for the scope of work as mentioned in this document. While this document has been prepared in good faith, no representation or warranty, express or implied, is or will be made, and no responsibility or liability will be accepted by MoHFW or any of their employees, advisors, or agents as to or in relation to the accuracy or completeness of this document and any liability thereof is hereby expressly disclaimed.

Interested Parties may carry out their own study/ analysis/ investigation as required before submitting their bids.

This document does not constitute an offer or invitation, or solicitation of an offer, nor does this document or anything contained herein, shall form a basis of any agreement or commitment whatsoever.

MoHFW Representatives, its employees and advisors make no representation or warranty and shall incur no liability under any law, statute, rules, or regulations as to the accuracy, reliability, or completeness of this document.

Some of the activities listed to be carried out by MoHFW after the receipt of the responses are indicative only. MoHFW has the right to continue with these activities, modify the sequence of activities, add new activities, or remove some of the activities, as dictated by the best interests of MoHFW.

Notice Inviting Tender (NIT)

On behalf of the Ministry of Health and Family Welfare (MoHFW), Government of India (GoI), Statistics Division invites bids from eligible bidders which should be valid for 180 days from the bid submission end date as mentioned in the “Factsheet” for ***“Appointment of a Helpdesk Service Provider for Augmentation, Operationalization, Management & Ongoing Support of Mother and Child Tracking Facilitation Centre”***. Detailed information on the Scope of Work and services expected from the bidder’s firm are provided relevant section of this RFP.

1. The bids shall be submitted online through GeM only. Not more than one bid shall be submitted by one Bidder. Under no circumstance will father and his son(s) or other close relations who have business relationship with one another (i.e., when one or more partner(s)/director(s) are common) be allowed to bid for the same contract as separate competitors. A breach of this condition will render the bids of both parties liable to rejection.
2. Bidder can download the RFP from website <https://gem.gov.in> and MoHFW main website <https://main.mohfw.gov.in> . Bidder may submit their queries, if any, in the format provided in the RFP. A notification for the same will be published on the website of MoHFW.
3. Based on queries received from prospective bidders, if required, MoHFW may amend the RFP/issue corrigendum. Bidders are advised to visit again GeM website <https://gem.gov.in> or check the email id provided in the Pre-bid submission form at least 3 days prior to closing date of submission of RFP for any corrigendum /addendum/ amendment related information.

Important Dates Table

Sr. No.	Details of activities	Tentative Target Date & Time
1.	RFP Publication date	04/07/2024
2.	Last date for receipt of Pre-Bid queries by e-mail (In prescribed format in Section 8.3)	12/07/2024
3.	Pre-Bid Meeting Date and Time	12/07/2024 at 15:00
4.	Proposal Submission End Date	29/07/2024 at 15:00
5.	Date & Time of Opening of Technical Bid by SCC	29/07/2024 at 15:30
6.	Date & Time of MCTFC Technical Presentation	To be intimated to qualified bidders
7.	Date & Time of opening of financial bids by SCC	To be intimated to qualified bidders

Fact sheet

Sr. No.	Key Information	Details
1.	Tender Title	RFP for Appointment of a Helpdesk Service Provider for Augmentation, Operationalization, Management & Ongoing Support of Mother and Child Tracking Facilitation Centre.
2.	Purchaser	Statistics Division, Ministry of Health and Family Welfare, Government of India
3.	Location of Service	New Delhi, India
Bid Submission		
4.	Bid Submissions	Through GeM portal
Bid Conditions and other details		
5.	Method of Selection	The bids shall be evaluated on the principle of Quality Cum Cost Based Selection (Annexure 2) with the weightage of technical and financial as 70:30.
6.	Detailed Evaluation	a) The Technical bid will be opened and evaluated as per the “Bidder’s Eligibility/ Pre-qualification Criteria” mentioned under Annexure 1 of this document. b) Only the “Pre-qualified bidders” will be evaluated as per the “Bidders Technical Evaluation” mentioned under Annexure 2 of this document. Bidders whose bids are found to be responsive and who score at least 70% of the total technical evaluation score will be considered technically qualified. The bid with the highest technical score (T1) shall be given technical score of 100 marks. The technical score of other bids shall be computed as follows: - Normalized Technical Score (Tn) of a Bidder (n) = {(Technical Score of Bidder n/ Technical Score awarded to T1) x 100} Rounded off to two decimal places. Each responsive Bid will be given a technical score (Tn). Technical weightage (Tw) in final combined evaluation will be 70% c) The Financial Bid of the Technically Qualified Bidders will be opened and the bid with the lowest cost (L1) shall be given financial score (Fn) of 100 points. The financial score of other bids shall be computed as follows: -Normalized Financial Score of a Bidder (Fn) = {(Financial Bid of

Sr. No.	Key Information	Details
		L1/Financial Bid of the Bidder n) x 100} Rounded off to two decimal places. Financial Weightage (Fw) in the final combined evaluation is 30% d) Combined Quality and Cost Evaluation- Total score shall be obtained by weighting the combined technical and cost score and adding them as follows: $B_n = (T_n \times T_w) + (F_n \times F_w)$ e) The Bid with the highest Combined Score, i.e., B_n, among the responsive bids shall be rated as “Best Evaluated Bid “. All responsive bids will be ranked as per their combined score where H1 will be for the bid with highest combined score followed by H2, H3, and so on. In case of a tie in highest combined score, the bidder having the highest technical score (T) among such bidders will be considered. Herein T would be considered up to 2 decimal places. Further, in case of a tie in technical score (T) also, the bidder with the highest score in maximum weightage of evaluation parameters of technical evaluation would be considered and so on. The price quoted by best evaluated bidder shall be accepted as for this RFP.
7.	Annulment of award	Failure of the successful bidder to comply with the requirements of the RFP shall constitute sufficient ground for the annulment of the award and forfeiture of the EMD in which event MoHFW may make the award to the next bidder who has been ranked as H2 and so on, till the award of the contract.
8.	EMD	INR (Indian Rupees) 96,00,000 only (INR Ninety Six Lakhs only) in the form of Bank Guarantee. A copy of the Bank Guarantee for EMD shall be uploaded on the GeM portal
9.	Validity for EMD	EMD (Earnest Money Deposit) should be valid for a period of 180 days from the last date of submission of the bid. The EMD submitted in the form of Demand Draft or Banker’s Cheque will not be considered, considering their 90 days’ validity and the same will lead to rejection of the bid.

Sr. No.	Key Information	Details
10.	Performance Bank Guarantee	5% of the “Total Contract Rate” discovered through this tender process. Performance Security should remain valid for a period of 90 days beyond the date of completion of all contractual obligations including warranty obligations.
11.	Tender Download Fee	Free of cost and can be downloaded from https://gem.gov.in and MoHFW main website https://main.mohfw.gov.in
12.	Pre-Bid meeting Venue	Indian Red Cross Society HQ, Sansad Marg, New Delhi-110011
13.	Issue of Letter of award	Within 30 days from the opening of Financial Bid
14.	Language of bid	English
15.	Contract Value	INR 48,00,00,000 (INR Forty Eight Crores Only)
16.	Contract period	Initial duration of assignment will be for 3 years from the date of Go-Live of integrated MCTFC or any other date communicated by MoHFW in writing. The engagement is further extendable for up to two years on same terms and conditions.
17.	Usage of the RFP in other Division of MoHFW	Under the contract resulting from this RFP, any other division or unit of the Ministry may instruct the engaged Helpdesk Service Provider (HSP) to deploy any added HSP resources under the same terms and conditions mentioned in this RFP. All such engagements shall be co-terminus with the validity of the contract resulted from this RFP.
18.	Nodal Person	DDG (Stats), Statistics Division (MoHFW) <u>For prebid queries/communication:</u> s.rahman@nic.in ; gurdeep.singh@nic.in

1. Introduction

Ministry of Health and Family Welfare, Government of India, understands that there is a new and rapidly changing healthcare landscape globally as well as in India, where information technologies are becoming increasingly normalized into the everyday delivery of healthcare services. Through Digital Strategy, the Government of India has significantly stepped up its financial commitment in public healthcare service. While it is evident that India needs more investment in healthcare, it is equally important to build a national IT health infrastructure as an integral part of the program to enable supply side readiness.

Therefore, Ministry of Health & Family Welfare, Government of India has undertaken various initiatives in the last decade by using Information & Communication Technologies (ICT) for improving the efficiency & effectiveness of the public healthcare system. The use of ICT in public healthcare systems has potential to change the way health care services are delivered. As IT infrastructure improves, MoHFW believes that this will in turn strengthen health systems, enable universal health coverage, and improve health and well-being for all.

[A]: Reproductive and Health (RCH) portal

To facilitate timely delivery of healthcare services to all Eligible Couples, Pregnant Women, Lactating Mothers and Children, a web-based name-based tracking system called Mother & Child Tracking System (MCTS) was introduced across all the States & UTs to provide ready reference about the status of services/vaccination delivered to pregnant women and children. The Ministry has rolled out an upgraded version of MCTS, called RCH Portal which is designed for early identification and tracking of the individual beneficiary throughout the reproductive lifecycle promotes, monitor and support the reproductive, maternal, new-born and child health (RMNCH) schemes/program delivery and reporting.

RCH portal is implemented in 33 States / UTs and captures data of beneficiaries, which is used by multiple applications like eJanma (Karnataka), Kutumba (PDS system of Karnataka), UMANG, ANMOL, MCTFC, Kilkari and Mobile Academy. Two States (Rajasthan & Gujarat) are sending their data through web services and rest four States namely (Madhya Pradesh, West Bengal, Tamil Nadu and Telangana) are in process of integration with the RCH Portal for sending their data.

RCH portal plays a vital role in key decision-making and monitoring the implementation of health schemes in the country. RCH portal has helped Health workers in planning for service delivery and identification of beneficiaries due for Antenatal Check-up, Post Natal Check-up, and Immunization Services. It helps in the identification of High-Risk pregnant women and tracking of health conditions and assistance during the delivery of Pregnant Women. Data of children's immunization requirements is also helping Health Workers in the generation of work plan for the delivery of immunization services. This initiative has a positive impact on improving healthcare service delivery in the country.

[B]: Mother and Child Tracking Facilitation Centre (MCTFC)

Mother and Child Tracking Facilitation Centre (MCTFC) was set up at National Institute of Health and Family Welfare (NIHFW) and it went live on 29th April 2014. It is a major step taken by Government of India under the National Health Mission in improving the maternal and child health care services.

The centre is currently operational with 86 Helpdesk Agents (HAs), 2 Medical Specialists, 2 Supervisors and a few more administrative and IT staff. MCTFC is a tool for providing relevant information and guidance directly to the pregnant women, parents of children and to community health workers, thus creating awareness among them about health services and promoting healthy practices and behaviour. The centre contacts the service providers and recipients of mother and childcare services to get their feedback on various mother and childcare services, programmes, and initiatives like JSSK, JSY, RBSK and contraceptive distribution by ASHAs etc. MCTFC also validates and verifies records of beneficiaries and health workers. The feedback helps the MoHFW/State/UT Governments to easily and quickly evaluate the programme interventions and plan appropriate corrective measures to improve the health service delivery.

Inbound calling feature has been implemented with short code 10588 for beneficiaries and health workers to resolve the queries regarding health services. At MCTFC, the helpdesk agents also check with ASHAs and ANMs regarding the availability of essential drugs and supplies like Iron Folic Acid, ORS packets, contraceptives etc. Information relating to new programmes, initiatives, etc. is also provided to the beneficiaries and health workers in addition to conducting data validation.

MCTFC is currently making calls in 22 States/UTs in 8 languages i.e., Hindi, English, Telugu, Bengali, Gujarati, Odia, Marathi and Assamese languages.

Key Objectives of Integrated MCTFC are as follows:

- Feedback on Health Service Delivery
- Awareness and providing information to beneficiaries about various Govt. Health Schemes, Health Centres and Programs and for promoting right health practices.
- Reminders and follow-ups to beneficiaries regarding Health services
- Grievance Redressal of beneficiary and Front Line Workers

The call handling function of current MCTFC operation serves following functions:

1. **Query Resolution:** MCTFC has the following call resolution model for the queries of called health beneficiary/worker.
The Helpdesk Agents/ Medical Counsellor at the call centre enable the following functionalities:
 - a. Resolve medical/health queries related to pregnancy, delivery and child immunization
 - b. Provide medical guidance to health workers like ASHA, ANM, Anganwadi worker etc.

- c. Information dissemination about local health facilities and local health workers for providing Antenatal Care (ANCS), Postnatal Care Check-ups (PNCS) and immunization for beneficiaries.
2. **IEC Activity:** One of the objectives of the project is to promote the government schemes and programmes among the beneficiaries at the appropriate stage. Helpdesk Agent / IVRS calls are increasing awareness among beneficiaries and health workers directly by educating them about the benefits they can avail through government schemes and programmes. Further, standardized awareness messages are disseminated to beneficiaries which are tailored to the region as well as the current health condition.

Brief Overview of MCTFC Application:

The current MCTFC solution is integrated with RCH to fetch the working set of the data of RCH and push back the validated data into RCH through web service. MCTFC application also generates Performance reports based on the feedback of beneficiary and health workers of different States/UTs which are called through MCTFC.

IVRS Handling System provides first level of information through pre-recorded messages on certain predefined categories. The callers that need further information are routed to following users for clarification and query resolution:

- a) **Helpdesk Agent:** Takes the calls and validates the records. These users can view the records, edit the records, save the records and if required refer the call to medical counsellors on call conference.
- b) **Medical Counsellor:** A call will be referred to the medical counsellor if the information required by the called beneficiary/health worker requires medical/health expertise to ensure the quality of medical advice.

Content Modules

There are six (6) modules in current MCTFC application, two each for pregnant women, parents of child (0-1 year) and one each for ANMs and ASHAs as follows:

1. Two modules for **Pregnant Woman Interaction** for 3-6 months pregnancy (2nd ANC) and 8-9 months pregnancy (4th ANC) comprise information of Pregnant Women, Ante Natal Care (ANC), Post Natal Care (PNC), Family Planning, Immunization details, the information dissemination about the government health intervention programmes being run for the pregnant women/children and the standardized awareness messages tailored to the region as well as the current health condition of the beneficiary.
2. Two modules for **Child Interaction** for 1.5 months old child and 6 to 9 months old child comprise child verification information like location details, health worker details, immunization details and other child related information and dissemination of the standardized child health awareness up to the age of 1 year.

3. One module for **ASHA Interaction** comprise features to verify ASHAs and update details like name, location, related bank details, and also validate the services that are rendered by ASHA like ANC visits, immunization, family planning, adolescent health etc.
4. One module for **ANM Verification Modules** comprise features to verify ANMs and update details like name, location and related bank details, and validate the services provided by ANMs like ANC visits, immunization, family planning, adolescent health etc.

Step-by-step Operational flow

1. When a call back is made to a beneficiary after a missed call, robocall/IVRS provides the key health information under categories, ANC, Delivery, Abortion, PNC and Immunization, among others, and allows to connect to Helpdesk Agents in case of any query.
2. As soon as the call lands to a Helpdesk Agent the existing data pop up over the interface through CTI pop up.
3. The outbound calls are made to callers to validate the demographic data in the RCH database and to ask about the services due to the beneficiary on the call date. All the updated data is saved and stored in the MCTFC CRM database.
4. The data entered by the Helpdesk agent is stored in the CRM database.
5. The updated and saved data is pushed to RCH database via web service integration.
6. In case of an inbound calling, the call from Beneficiary/Health workers/Adolescents will be registered as missed call and within 90 seconds of the received inbound call, an outbound call will be dialed by the dialer through PRI gateway and will be connected to Beneficiary/Health workers/Adolescents.
7. The systems of Helpdesk Agents and Medical Consultants will be connected to the CRM and dialer server through local LAN.
8. After the call is done the data updated and saved in MCTFC database will be pushed back to RCH database. Successful calls are also recorded, and reports are updated accordingly on MIS.
9. The CRM server, dialer server and the gateway device are connected to each other through Core switch. The call will be generated through the PRI gateway and whenever an inbound call is received it will always land at the gateway device first.

Telecom Service Provider for MCTFC

TSP is currently providing 10 PRI lines (including 8 Outbound and 2 inbound) with Optical Fibre channel as Primary and Radio Frequency (RF) channel as secondary line of current MCTFC Project. Current HSP has sub-contract with the TSP for providing PRI lines for the MCTFC project.

The location of the current physical call centre is as follows:

National Institute of Health and Family Welfare

Baba Gang Nath Marg, Munirka, New Delhi-110067.

Phones: 91-11-2616 5959, 91-11-2616 6441, 91-11-2618 8485, 91-11-2610 7773

Fax: 91-11-2610 1623

E-Mail: info@nihfw.org Web Site: www.nihfw.org

[C]: Kilkari and Mobile Academy

Kilkari Project:

In 2016, the Government of India launched Kilkari (a baby's gurgle) program, an IVRS technology based Mobile Health awareness service for Pregnant Women, Mothers of children (per week from the 2nd Trimester of pregnancy up-to one year of age) and their families used for delivery of accessible, accurate, and pertinent time-sensitive audio messages (for 72 weeks) through a female character named Dr. Anita on "Pregnancy" and "Child Health care" directly to the mobile phones of the beneficiaries registered in RCH Portal. Subscribers can re-listen to the weekly message multiple times during the week, by dialing a short code 14423.

Technology support services are hired by ARMMAN, a non-profit organization which has signed a MoU with MoHFW for implementing Kilkari and Mobile Academy Project. At the National level, Kilkari program has been integrated with RCH Portal in many States.

The mobile numbers of users registered under RCH portal during ANC registration, will get fed on MOTECH platform (an opens source rule engine) of Kilkari program to automate pushing of IVRS calls for delivering the audio messages to appropriate beneficiaries.

The Performance report, implementation coverage status, areas of improvement and recommendations are done on monthly basis with the States along with the following activities:

- Development of IEC plan and sharing the IEC materials
- Provision of MIS reports
- State-wise research
- Interactive session with pregnant woman for health awareness

The consolidation, maintenance, and practical use of data available with the government then becomes the crux on which Kilkari operates to extend its coverage and disseminate information to as many pregnant women and mothers as possible.

Mobile Academy Project:

Ministry of Health and Family Welfare (MoHFW) launched the 'mLearning' programme in 2014 and co-created a revised national version in November 2015.

Mobile Academy provides inexpensive, standardized, and high-quality learning training course at the time and location of their choosing with a bookmarking feature for enhancing the knowledge on maternal and child health benefits and personal development of Accredited Social Health Activist (ASHA) without disrupting routine service delivery.

It works in tandem with Kilkari (IVR based mHealth service for increasing awareness about healthy practices in pregnant women and mothers of infants) to reinforce the information disseminated through Kilkari.

The database for Mobile Academy is drawn from the respective State RCH Portal where ASHAs numbers are registered and avail training opportunity via dialling short code 14424 from their mobile phones which is both cost-effective and efficient.

ASHAs can listen to the pre-recorded audio lessons and participate in the quiz at the end of each lesson using digit keys on their mobile phones. This interactive refresher course spans across eleven lessons with a four-question quiz at the end of each lesson making it a total of 44 (4 for each of the 11 lessons) quiz questions and can repeat the lessons and quizzes as per their needs.

The ASHAs are expected to score at least fifty percent of the total marks i.e., 22 out of 44, in order to qualify for the course. Upon qualifying for the course, they are awarded an academy course certificate either in monthly sector meeting or personally through district officials/ASHA facilitator issued by their respective DPMU/ SPMU. These certificates are intended to instil motivation amongst ASHA and to develop interest in getting the training online.

Mobile Academy helps in strategizing along with the partners of MoHFW in improvisation and implementation currently operational in **17 States**.

[D]: National Family Planning Helpline

India was the first country in the world to have launched a National Programme for Family Planning in 1952. With its historic initiation in 1952, the Family Planning Programme has undergone transformation in terms of policy and actual programme implementation. There occurred a gradual shift from clinical approach to the reproductive child health approach and further, the National Population Policy (NPP) in 2000 brought a holistic and a target free approach which helped in the reduction of fertility.

Over the years, the programme has been expanded to reach every nook and corner of the country and has penetrated the Primary Health Centres and Sub Centres in rural areas, Urban Family Welfare Centers and Post-partum Centers in the urban areas.

Technological advances, improved quality and coverage for healthcare have resulted in a rapid fall in the Crude Birth Rate (CBR), Total Fertility Rate (TFR) and growth rate (2011 Census showed the steepest decline in the decadal growth rate).

The objectives, strategies and activities of the Family Planning division are designed and operate towards achieving the family welfare goals and objectives stated in various policy documents (NPP: National Population Policy 2000, NHP: National Health Policy 2002 and NRHM: National Rural Health Mission) and to honor the commitments of the Government of India (Including ICPD: International Conference on Population and Development, MDG: Millennium Development Goals, Sustainable Development Goals-SDG, FP-2020 summit and others).

National Family Planning Helpline helps to facilitate information flow between the Team, Family Planning Division and other stakeholders equipped with specialized knowledge and skills, supported by training and capacity building efforts. It runs Inbound and Outbound Call

services to the beneficiaries which are fetched from RCH Portal database for raising awareness related to Family Planning methods.

It also handles issues with utmost sensitivity and professionalism to ultimately provide an effective mechanism to government health functionaries for:

- promoting **reproductive health and well-being**.
- providing **health awareness, real-time health service delivery feedback**
- addressing **grievances and health counseling etc.**

Currently, National Family Planning Helpline call center is based at Noida (UP) and is manned by 12 agents along with 2 Supervisors, 1 Medical Counselor and 1 Medical Specialist who handle approximately 65,000 calls a month (including inbound and outbound calls).

It has also hired PRI Line services for making voice calls and IVRS calls to beneficiaries with a total Cloud storage capacity of 7.5 GB as of August 2023. It is envisaged that National Family Planning Helpline will have CRM Application (software used) with the provision to send and receive SMSs and Emails thereby evaluating its performance based on KPIs such as Content Creation, AHT, Call Quality analysis, Feedback from callers, Average application Uptime etc.

[E]: Helpdesk (Call Center) for Pradhan Mantri Surakshit Matritva Abhiyan (PMSMA)

PMSMA is a flagship program of the Ministry of Health and Family Welfare providing antenatal check-ups for pregnant women by a doctor/Gynaecologist during 2nd or 3rd trimester of pregnancy, on the 9th day of every month. The portal is providing programme related information and is also a medium for a volunteer to register themselves. Extended PMSMA (e-PMSMA) is the extension of activities under PMSMA to improve individual HRP tracking and strengthen follow-up activities, and case-based incentives to ASHAs and as well as beneficiaries. To strengthen the information and provide support to the beneficiary's/Volunteers/ASHA a helpdesk call center.

The helpline is established to provide the beneficiary with information regarding the program, benefits and the PMSMA camp details. This helpline also helps the volunteer to register however an online portal is provided to the volunteer for the registration. The helpline number helps the beneficiary to avail the facilities and getting aware of the initiative.

The guideline and related documents regarding the program are available at <https://pmsma.mohfw.gov.in/resources/>

2. Scope of Work

The overall scope of work for HSP for Augmentation, Operationalization, Management & Ongoing Support of Mother and Child Tracking Facilitation Centre under this RFP is to provide and operate call centre services for beneficiaries and health workers, in conjunction with Kilkari & Mobile Academy, National Family Planning and PMSMA project for improving health awareness, collecting feedback on Mother and Child health services.

Broadly, scope of work for HSP is categorised in following two phases:

Phase I: Development, UAT of Enhanced Features in MCTFC Project & Go-Live

- A. Revamp/Upgradation of MCTFC Architecture
- B. Design, Development, Testing and Implementation of Mother and Child Tracking Facilitation Centre Solution
- C. Go-Live

Phase II: Operationalization & Maintenance Support of Enhanced MCTFC Project

Detailed activities to be carried out under above phases are provided in [Annexure-6](#) of this RFP.

MoHFW envisages outsourcing its Call Centre operations to suitable bidder, who will be responsible for establishing, operating and managing the end-to-end Call Centre services for MoHFW. The Call Centre operations should be purely on outsourced model and will be setup at bidder premises. The bidder should setup all required infrastructure as required for operation of Call Centre.

Following are the key features of the proposed Call Centre:

No. of Seats	150 seats <i>MoHFW reserves the right to increase or decrease no. of seats as per the requirement</i>
Roll Out States	Pan India
Language Supported	Hindi, English, Gujarati, Telugu, Bengali, Odiya, Assamese, Marathi, Kannada, Malayalam, Tamil, Punjabi <i>Further, if required by MOHFW, HSP will have to add languages from the list of 22 scheduled languages as per Indian Constitution at the same cost quoted in their financial bid.</i>
Accessibility	HSP will do the required coordination and technical integration with concerned entities for landing the calls of Kilkari (14423), Mobile Academy (14424), NFP Helpline (1800-116-555) and PMSMA (1800-180-1104) to MCTFC (10588) with no cost implication to MoHFW.
Location	The facility to be located in Delhi/NCR at bidder's premise.
Operational Time	9:00 AM to 6:00 PM <i>Every day in a year except gazetted holidays.</i>

Detailed Scope of Work

- The call center agents/staff shall be required to work from bidder's office at Delhi/NCR. However, in case, some resource(s) require to operate remotely either at the request of bidder

or at MoHFW's direction (in case of a pandemic etc.), the same shall need to be explicitly approved by MoHFW for the specific resource(s).

- It is clarified that in case remote working for a resource(s) is approved by MoHFW, all the required infrastructure shall be provided by the HSP to its agents at its own cost and the entire solution must be accessible at the remote site the agent is working from. Service levels along with all terms and conditions provided in this RFP shall be applicable as is.
- HSP shall also need to allocate 2 seats for MoHFW officials in its office premises at no additional cost.
- The Call Centre shall have capacity to implement new processes – inbound and outbound as per requirements without disruption to ongoing processes, service levels, business as usual.
- Call Centre Service Provider to ensure the business continuity at all times during the contract period.
- The Inbound telephony costs (meter-able) related to Toll-Free Number shall be borne by MoHFW and all other cost/expense are to be borne by HSP.
- The following shall be definition of go-live:
 - Provisioning of all agents by the selected HSP
 - Provisioning of entire Infrastructure, Cloud and Technology as per scope
 - Integration of MCTFC with KMA, PMSMA and NFP.
 - Completion of training of all agents of HSP.
 - Acceptance by MoHFW.
 - The go-live shall mean go-live of the entire project and not a go-live of a particular phase of the project.
- A review meeting with Senior Officials or Project team may be called upon from time to time. It is clarified here that MoHFW shall not make any additional payment in respect for any travel made for this purpose.
- A call center for MCTFC is to be setup and operationalized by the HSP. All Toll-Free Number/Short Code Number and other Input Channels will be used by the HSP in the name of MoHFW and shall be handed over to MoHFW after the contract period. No rights shall vest with the HSP in respect of the use of the number after the expiry of the contract term.
- The HSP will be responsible for providing all necessary infrastructure for Inbound and Outbound Call Center Services viz. Premises, Dialer, Desktop Computers for deployed manpower/Call Center Agents (CCA), Laptops for Support Staff, CRM Solution, IVR Solution required for Inbound Call Center Operations, Call Center Agent Console, High Speed Internet Lease Line dedicated for MCTFC operation, switches, Media Gateway, and Database server, LAN, Head set, SMS server, Other necessary hardware and necessary office furniture required for call center operation.
- HSP is responsible for interaction and resolution of day-to-day issues related to breakdowns, billing, disconnections, and disruption etc. with the Telecom HSP and other vendors of the HSP.
- The HSP should provide region/language-wise HAs at Call Center. HSP is responsible to provide adequate manpower for specific region/languages as per requirement of MoHFW.
- Feedback shall be taken through SMS or IVRS rating for 100% inbound calls and completed outbound calls.

- Half-yearly Performance Reviews will be conducted with the HSP by MoHFW officials. If found necessary, MoHFW may ask the HSP to amend the process to improve the performance of MCTFC on mutually agreed timelines.
- Most of the queries / grievances may be resolved by the Helpdesk Agents using the information available however for unresolved queries / grievances, the HSP shall forward the cases to the concerned departments within the MoHFW eco-system using proper escalation mechanism.
- The HSP shall work jointly with MoHFW to identify problem and queries for which the current Standard Response Template (SRTs) or FAQs do not provide any answers. These may be shared with MoHFW on regular basis and new SRTs or FAQs may be prepared by coordinating with MoHFW. The HSP shall also work closely with MoHFW in developing workflow, escalation procedures and reporting mechanism for resolution of queries/grievances.
- The bidder must have the capability to set up an additional language in the IVR if requested by MOHFW.
- Biometric attendance for all manpower should be shared with MOHFW as softcopy and hardcopy (both) to reconcile the manpower attendance along with CRM login details of HAs.
- Live access to CCTV shall be given to MoHFW for monitoring purpose. All recording to be stored for minimum 6 months.
 - Facility to listen call handling live for monitoring purpose to be provided for selected officers by the agency.
 - The security of the entire Call Center Infrastructure (i.e. equipment, buildings and manpower etc.), will be the responsibility of HSP; MOHFW will not be responsible for any damage or loss to the same. HSP shall have adequate insurance cover for its personal and property to cover possible damages/loss.
 - All the personnel/equipment deployed by the HSP for providing the services shall conform to the statutory requirements. The Bidder shall be responsible to comply with all the Acts/Rules of Government of India, the state Governments and Rules Regulations framed by any other Local/Regulatory bodies. Further HSP will be solely responsible to fulfill all the minimum wages and labour law and other statutory compliances.
 - HSP has to deploy at least 1 supervision and 1 IT Support Staff per 50 HAs for floor management and handholding to the HAs.
 - HSP should provide at least 1 Call Quality Analyst per 40 HAs for call audits and other quality check related activities.
- The Call Centre Service Provider shall provision for a CRM and Software solution for the MOHFW call center which meets the below requirements:
 - To build and deliver services for the envisaged call center.
 - Must provide automated call capture. The solution must provide for all features in an automated way with the agent need not do anything manually except for answering calls and taking notes.
 - Automated call distribution (ACD) (including quality monitoring tool) with intelligent routing features to various agents once the caller requests to direct the call to agents on IVRS. It is clarified that call routing to various agents must be based on algorithms and

not on manual interventions. It must be able to distribute calls to all the agents in an equitable way and not just to one or two.

- Access to quality monitoring tool (in ACD) to be provided to MOHFW officials.
- Must provide access to application interface to various agents.
- It should enable geo-location facility which automatically identifies the caller by location.
- Call data management- the solution must have the capability to capture every detail related to a call like a caller's information and other call data from each incoming or outgoing call will be and to store the same in the database system.
- Agents must be able to schedule automated calls.
- Agents must have access to information and knowledge in real-time to deliver the correct information to callers during calls. The solution must have case management capabilities.
- Calls should only be enabled on desktops/laptops only and not on mobile phones of the agents.
- The solution must scale at ease (as and when requested)
- The solution must provide for 100% call recording.
 - HSP must store all call related data (including call recordings) and shall provide uninterrupted support and access to record and information to MoHFW.
 - MoHFW shall have full access rights to the call records and pull them as and when needed. The HSP will be able to access the call records only after seeking approval of MoHFW. No data will be used or taken out for any purpose which is not directly or indirectly connected with MoHFW call centre operations.
 - The call recordings retention period (from the date of call) shall be minimum 6 months (180 Days). Post that HSP shall purge the data after approval of MOHFW.

In addition, subsequent section describes operation, functional, technical and other requirements of the projects. HSP needs to undertake the project to meet all these requirements.

2.1 Operational Requirements

HSP would ensure the following operational aspects of the project:

- a) MCTFC system will import data of Health Workers (ASHAs, ANMs), Eligible Couples, Pregnant Women and Children from RCH Portal and other relevant portal(s), if required, to whom calls would be made by MCTFC.
- b) The outbound calling campaign would be routinely planned by HSP for High-Risk Pregnancy and other risk groups in consultation with the MoHFW.
- c) Helpdesk Agents would make calls to beneficiaries, health workers for awareness of various government schemes and programmes.
- d) The HSP shall work closely with MOHFW in developing the "Process Manual". The Process Manual will be the master document for the complete call center operations and will include but not limited to - SOP (Standard Operating Process), Call Type list/list of call categories, Call Category wise Call/work flow and SOP, Escalation procedures with complete escalation matrix, report formats, reporting mechanism, and SLA matrix etc.

- e) The Process Manual should be submitted for approval to MOHFW within 30 days of award of work.
- f) User Acceptance Test (UAT) will be conducted by MOHFW upon receipt of written confirmation regarding the call center set-up readiness from the HSP. Post successful UAT the call center can be considered commenced.
- g) The Process Manual will be reviewed by MoHFW on a regular basis and maybe modified as per the requirement of MOHFW. The HSP is responsible to restructure the call center operations as per the revised Process Manual with no additional cost to MOHFW.
- h) Query resolution would also be done by Helpdesk Agents (HAs) and if required, by Medical counsellors based on the FAQs developed in consultation with MoHFW. FAQ question bank and reports may be changed in future as per the requirement of MoHFW.
- i) HSP will be responsible for creating, maintaining and updating knowledge repository (FAQ) for the requisite programme. It will be the responsibility of the HSP to develop the initial standard knowledge /question bank. The question bank developed by the HSP will be validated by the programme divisions before the rollout. HSP may also be asked to identify the knowledge gaps for domain specific areas and collaborate with the domain experts appointed by MoHFW to develop appropriate content as per the requirement of the initiatives. HSP will ensure that validated and updated information is available within the system for answering the FAQs.
- j) The HSP will ensure quality of the resolution provided by the HAs. MoHFW may also do the audit by reviewing the recorded call of the HAs with beneficiaries.
- k) The appointed HSP will be equipped with features such as inbound/ outbound calling, IVRS/SMS, e-mail etc. The call centre should be scalable to support other programmes of the MoHFW, if required.
- l) HSP will keep a provision to increase and decrease seats as per requirement of the MoHFW. MoHFW would have the right to vary the number of seats in the Call centre at any time during the contract period.

2.2 Functional requirements

HSP is required to ensure that solution must meet following functional requirements:

1. Establishing feedback mechanism for appropriate follow-up with the respondents /beneficiaries after obtaining substantial information from ANMs and ASHAs.
2. Developing and designing appropriate monitoring and reporting system with uniformity at the State as well as District level.
3. Improving the network coverage for inclusion of beneficiaries / respondents from remote areas and marginalised communities like tribal population.
4. Developing mechanisms for measuring the level of awareness amongst beneficiaries for follow-up and resolving their problems and provide further feedback as a systematic process to help in 'backward integration' of information.

5. Developing mechanisms for inclusion of issues/ questions significant for the local context in collaboration with States / district / village level for taking corrective action timely on a periodic basis
6. Ensuring co-ordination for further strengthening of the Programme.
7. Developing an integration mechanism of the MCTFC, National Family Planning Helpline, Kilkari & Mobile Academy and PMSMA for overcoming any duplicity of calls as all use the same database of beneficiaries registered under the RCH Portal.
8. Ensuring and developing mechanism for inclusion of ABDM ecosystem-based data from RCH Portal to MCTFC Portal which will help in tracking and providing healthcare related information to beneficiaries using their medical history based on ABHA number through helpdesk agents. This will also enable better facilitation and awareness to improve healthcare service provided by Health Workers (ASHA / ANMs).

2.3 Technical requirements

- a) The appointed HSP will ensure terminals including data cabling, furniture/fixture (workstations/cubicles/seats) as per the provision of a typical Call Centre. However, the space should be adequate for the deployed staff at an earmarked space including provision of scale-up. HSP will keep a provision in the system to forward some specific calls from dialler/IVRS/agent to other number as per the logic provided by MoHFW.
- b) Solution can operate on internet protocol or telephony platform and effectively meet the RFP and SLA conditions. The HSP shall need to provide for the internet for digital call traffic management / Tollfree number/Short code and PRI/SIP lines for telephony.

1. Hardware and Software Infrastructure

Based on the site visit, the HSP shall undertake IT Infrastructure sizing and prepare a document based on its own estimations and judgments drawn after undertaking a thorough study of the functional, non-functional, and technical requirements of the project.

2. Telecommunications Infrastructure

HSP will be required to procure and set-up necessary telecom equipment etc. necessary for operationalization of MCTFC in order to meet the SLAs mentioned in this document. MoHFW has already been allotted a 5-digit short code 10588 to MCTFC, which shall be operationalized by the HSP. HSP will do the required coordination and technical integration with concerned entities for landing the calls of Kilkari (14423), Mobile Academy (14424), NFP Helpline (1800-116-555) and PMSMA (1800-180-1104) to MCTFC with no cost implication to MoHFW. HSP should develop the infrastructure such that it can handle minimum TDM/SIP for MCTFC operation. The helpdesk audio recordings shall be maintained by HSP as per the retention period agreed by MoHFW. After that, the data may be purged after due approval of MoHFW.

Infrastructure, if any for managing the recordings required will be procured and managed by the HSP.

3. SMS Features

The SMS solution should at least have the features as present in the current system as below:

- i. The HSP should integrate SMPP over SSL connectivity or HTTPs-based connectivity for sending the SMS
- ii. SMS connectivity should support text and Unicode so that SMS in local languages may be sent
- iii. SMS connectivity should support multi part messages
- iv. The HSP should deliver messages to both GSM and CDMA subscribers
- v. HSP needs to ensure delivery report with appropriate cause code
- vi. The HSP should ensure alphanumeric, short code and long code sender IDs
- vii. SMS solution should be integrated with proposed MCTFC application.

***Note:** MoHFW may explore the possibility of implementing the SMS solution with a unique number for sending and receiving SMS for MCTFC Project and integrate it with Government based SMS Gateway through NIC / CDAC or may integrate SMS Gateway through any other private organizations which must be implement it in accordance with the TRAI guidelines for the entire project duration.*

4. Management Information System (MIS)

To increase the efficacy and efficiency of call centre functioning, the MCTFC-HSP must be able to closely work on the available data (Call Data Records, analyses of the Call Centre Agent conversations etc) for creating quantitative as well as qualitative reports on a periodic basis. Regular analysis of CDR, input data received from programmes will be utilised for creating State specific reports with defined outcomes and outputs. For specific programmes, MCTFC-HSP must be able to tailor reports based on State specific requirements. Regular analysis of Helpdesk Agents conversations needs to be performed for improving the call centre content, scripts and address the demand of the beneficiaries and health workers, and at the same time also help in understanding different capacity building needs of the Helpdesk Agents.

Reports to include SLA report and KPI reports as below:

- i. System performance report
 - a) Application availability
 - b) Dialler availability
 - c) Network availability
 - d) Power availability
- ii. Manpower performance report
 - a) Availability of Helpdesk Agents

- b) Helpdesk Agents Attendance report
- c) Number of hours of call handling. The HSP should be able to segregate the duration of call handled by Helpdesk Agents and IVRS
- d) Number of calls handled

Performance reports generated based on the feedback of beneficiary and health workers of different States / UTs which would be called through MCTFC. These reports would be based on Performance Indicators provided by MoHFW under various thematic areas like Maternal Health, Child Health, Immunization, Family Planning, Adolescent Health etc, and may also include following:

- a) Beneficiary satisfaction report
- b) Daily Call status report should contain the details such as number of calls made to ASHA, ANM and beneficiaries. It would also contain the no. of wrong calls and the percentage of correct calls which would be used to assess the data quality of RCH.

Some of the other indicative standard reports generated based on various categories of beneficiary & health worker being served across programmes:

- a) Programme-wise, State/ District-wise.
- b) State/District-wise no. of high-risk cases identified with follow-up and alignment with Health Workers.
- c) State/District-wise low-listeners/ no answer category contacted (addressed with various parameters)
- d) State/District-wise ASHA and ANM supported through the call centre

Performance report formats, as required, will be provided by MoHFW to the HSP.

5. Future requirements of the MCTFC Project

- a) MCTFC-HSP shall also be responsible for catering to any future requirements of the MCTFC Project or change in the scope of the project. The MCTFC-HSP should design the system to be scalable to dynamically handle additional functionalities.
- b) Some of the potential future requirements for the project may be as follows:
 - i. For any change control note that may be asked by the MoHFW, the person-month effort will be evaluated and finalized on mutual agreement for carrying out the activity.
 - ii. Additional human resources required in future to scale up.

6. Deliverables for Technical Solution Design

This section provides indicative deliverables for technical solution design; however, the actual deliverables will depend upon project specific requirements and will be finalized in consultation with MoHFW:

- i. FRS, SRS, Design and Architecture Documents

- ii. Submission of FRS (Functional Requirement Specification) document and get it approved from MoHFW.
- iii. Submission of SRS (System Requirement Specification) document and System Design Document (SDD) and get it approved from MoHFW.
- iv. Develop “Visual Prototype” and Database Design
- v. Development of enhanced MCTFC application after getting the approval of enhanced prototype system.
- vi. Requirement Traceability Matrix
- vii. Performance Test Reports
- viii. Security Test Reports
- ix. UI Usability Report
- x. User Manual and SOP
- xi. Technical and Design Manual
- xii. Data Backup Process and Archival Process
- xiii. Infrastructure design document
- xiv. Data Migration Reports
- xv. Security Audit certificate (Safe to Host certificate) from CERT-IN/ empanelled agencies before hosting the services.

2.4 Security and Privacy

- a. The MCTFC-Agency shall ensure that information collected directly from the Beneficiaries and Health Workers should only be used for the specific purpose for which it was collected. A formal Non-Disclosure Agreement (NDA) as per [Annexure 5](#), [Form 10](#), will be signed to this effect as per format mentioned in this RFP.
- b. The selected bidder shall ensure that privacy of caller information guidelines is adhered to by everyone including the MCTFC agents to ensure security of data.
- c. The selected MCTFC-HSP must maintain logs including date, time, number of Helpdesk Agents, attendance record, application logs, Call Detail Record (CDR) of PRI/SIP lines, etc.
- d. The selected MCTFC-HSP must ensure complete and comprehensive security from unauthorized access and misuse.
- e. MoHFW may carry out inspection or audit of the MCTFC Centre. The observations of these inspections & audits will be incorporated by the selected HSP at no additional cost.

HSP should get the **MCTFC Solution audited by a CERT-IN** empanelled agency having experience of successfully completing security audit of applications deployed / hosted in data centre for complete infrastructure, network, and application software at Go-Live and in case of any major changes or annually whichever is earlier. HSP should also get the audit done for the web services codes and procedure from security and vulnerability prospect required for integration with RCH application as and when required. The HSP should submit the first audit

and compliance report by a CERT-IN empanelled agency for consideration of the MoHFW within three months from the date of Go-Live.

There shall be a comprehensive audit trail tracking for every call, call history recorded in MCTFC 2.0 Project. MCTFC 2.0 Project shall have a special interface for the MoHFW where access to all data shall be allowed without any modification or change permission. The proposed MCTFC 2.0 Solution implemented using any Open-Source stable platform must be compatible with any Cloud server having Data Centre in India along with Geofencing and WAF which shall be implemented by the MCTFC-HSP on the Cloud server keeping a centralized code repository and database with replication to ensure quick responses.

The MoHFW also reserves the right to conduct unscheduled quality audits as and when required. Quality audits shall focus on following broad areas (but not limited to):

- i. Quality of infrastructure deployed by the HSP for MCTFC
- ii. Quality of equipment like headsets, workstations etc.
- iii. Physical and logical security etc.
- iv. Application and Data security.
- v. MIS Reporting.

2.5 Capacity Building and Training

Key Considerations for Earmarking of the Team:

- a) Ensuring Validity, Call Quality and Effectiveness of calls for optimal health care with a focus on the following metrics:
 - i. Voice Tone
 - ii. Caller's pace and speech tempo
 - iii. Clarity and strong diction
 - iv. Skills of Communication
 - v. Retention of Information and Healthcare messages given through calls
 - vi. Content of the call on specific thematic areas
 - vii. Increasing the coverage of beneficiaries, ASHAs/ANMs to help in substantial data collection for generalising the findings obtained through the calls
 - viii. Reducing duration of calls
 - ix. Reduce the number of questions on each thematic area
 - x. Adjustment of timing of call by callers for convenience of each category of respondents
 - xi. Display of the MCTFC Call on the phone of the receiver as a Government Programme related call as this is expected to ensure that the calls are not missed deliberately
 - xii. Developing psychometric tests for assessing the calibre of the agents to be deployed for the Programme.

- b) Soft Skills need to be improved and Training should be imparted to the Helpdesk Agents, other members of team and selected personnel of MoHFW and / or nominated by MoHFW. On a regular basis to address the Beneficiaries/AHSAs/ANMs in proper tone of voice.
- c) Psychometric tests can also be performed to assess the cognitive ability and personality of the Helpdesk Agents which will help in creating a better bond between the Helpdesk Agents, Beneficiaries, ASHAs and ANMs.
- d) Training on MCTFC Project: HSP needs to train / retrain its team on MCTFC solution afresh or for any changes made later. The training manuals, SoP and related material for the same would be prepared by the HSP. HSP shall provide training to Helpdesk Agents, other members of team and selected personnel of MoHFW and / or nominated by MoHFW.
- e) Domain Training:
 - i. HSP will appoint domain experts / institutions for providing domain-specific knowledge training to the HAs. The appointed domain experts / institutions of HSP will develop intensive domain-specific training modules. It will be the responsibility of the HSP to ensure that all HAs receive appropriate domain training. HSP shall bear all expenses incurred for this activity.
 - ii. The training would be conducted in multiple batches with each batch to be trained appropriately. Arrangements and costings related to the training of the HSP Staff shall be made by HSP.
 - iii. The MCTFC shall also render re-training / refresher to existing & new staff at MoHFW.
- f) Orientation Workshop by MoHFW:
 - i. An initial briefing/orientation workshop shall be conducted by MoHFW either at MoHFW's premises or through electronically or at HSP's premises to provide process training related to scheme, MoHFW eco-system. The HSP shall be required to identify master trainers who shall attend such training. Below is the tentative agenda of the training:
 - Introduction to schemes information.
 - Possible complaint types and its resolution.
 - ii. The orientation workshop will help the HSP for smooth roll out of the initial batches and shall also help HSP in designing IVRS as per requirement. Thereafter, based on the workshop, MoHFW Training Module the HSP is expected to develop a training module & a test process for on-boarding of future resources and submit the same to MoHFW for review and approval within one calendar month of go-live date.
 - iii. MoHFW will review and approve the training module and the test process. In case of any changes suggested by MoHFW, changes shall be incorporated and submitted to MoHFW within 15 days from the date of suggestion. It should be revised and submitted for approval every quarter. Standard Response templates (SRTs) may require to be changed very frequently which will be communicated to HSP on need basis. Subsequently, HSP shall update the training modules and impart internal trainings to Agents on the floor.
- g) Resources Training:

- i. The HSP shall be responsible for conducting scheme specific resource onboarding training. This training shall include training of Applications/tools, basic call handling skills, MoHFW's ecosystem specific knowledge & services, soft skills, etc.
- ii. The HSP is also expected to evaluate each trainee's performance through appropriate test process & mock calls certification process as approved by MoHFW. The resources clearing the training evaluation test shall be forwarded for on-job training. The period for on-boarding training should be at least 7 working days. The HSP is required to maintain the results and evidence of training evaluation test and evidence for attending training for each trainee and make them available to MoHFW or third-party auditors as and when requested. At no time, any resource not clearing the evaluation test should be deployed.
- iii. An agent should receive sufficient training facilities on MoHFW Business processes and guidelines, which should include access to appropriate rooms furnished with whiteboards, projectors, and other essential equipment.
- iv. Training material to be approved by MoHFW and LMS to be used for all training.
- v. Mandatory 7 days process training at time of joining.
- vi. Cross training of resources between multiple processes is to be conducted.
- vii. As and when new process updates are available, all HAs are required to mandatorily complete the refresher training resource within a weeks' time. The HSP shall provide an undertaking to MoHFW post completion of training of all agents.
- viii. Half-yearly refresher training shall be conducted by HSP process trainers, based on the training need identified of the agents (Queries received, Areas where agents find it difficult to answer, process updates received from MoHFW). Each session shall end with a brief assessment. Record of attendance & assessment scores to be maintained for audit purposes by MoHFW.
- ix. All training results to be shared with MoHFW on regular basis.

Note: Any other activity required to complete the scope of the project will also be the responsibility of the HSP and it shall be performed by HSP at no extra cost to MoHFW.

3. Key personnel requirements

3.1 Team Composition

The eligibility criteria and roles and responsibilities of the MCTFC Team members have been given in [Annexure 4](#).

HSP shall provide the details of Team for MCTFC which would consist of the key personnel supported by the other team members. Project Manager will represent the views of HSP in all TCC meetings to assist the TCC on the matters related to MCTFC project. Minimum resource requirement for team is mentioned in below table and MCTFC-HSP should propose resources for the successful operationalization of the MCTFC. HSP will deploy the following minimum resources onsite:

S. No.	Core Team	No. of resources	Working Days
1)	Project Manager	1	Monday to Saturday
2)	Supervisor	1:50	Monday to Sunday
3)	IT Support	1:50	Monday to Sunday
4)	Full Stack Developer	1	Monday to Saturday
5)	Quality Analyst	1:40	Monday to Sunday
6)	Helpdesk Agents	150	Monday to Sunday
7)	Medical Counsellor	2	Monday to Saturday
8)	Data Analyst	1	Monday to Saturday

Note: Please note that this ratio is only indicative in nature and the HSP shall be assessed on the basis of the SLAs defined under this RFP. Hence any necessary changes required in this regard shall be the responsibility of the selected HSP.

- i. CVs of all resources deployed in the process along with summary sheet of Qualification and experience will be shared with MoHFW at start of the process.
- ii. MoHFW has the right to evaluate any member of MCTFC team appointed by the HSP at any stage and can reject them in case they are not found suitable. Under such circumstances, the HSP shall replace the resource within 2 weeks from the date of written intimation from MoHFW.
- iii. The successful bidder shall propose adequate team (beyond requirements specified in this RFP) to comply to all the statutory labour laws / regulations laid down by Govt. of India like roster policy, timely payment of prescribed wages and other amounts as and when becomes payable, depositing of PF, ESI, taking of insurance cover etc. for workforce deployed by the HSP for this contract. Any obligation on account of the above will be the liability of the HSP.
- iv. In case, a resource is replaced, HSP will ensure that the replaced resource should be as per the qualification / experience criteria specified in the RFP.

Replacement

- i. All members of the HSP's personnel shall be appropriately qualified, experienced and in a suitable physical condition to ensure that the HSP complies with all the HSP's obligations under this project.
- ii. In case of absenteeism of one or more resources for more than 15 days continuously, it should be reported and MoHFW will evaluate and reserves the right to ask for the replacement of these resources that would be binding on HSP.
- iii. Before assigning any replacement member of the Team to the provision of the job, HSP shall provide MoHFW with:
 - a) A resume, curriculum vitae and any other information about the candidate that is requested by MoHFW; and
 - b) An opportunity to interview the candidate, if desired by MoHFW.
- iv. If MoHFW does object to the appointment, HSP shall not assign the individual to that position and shall seek an alternative candidate in accordance with this Section.
- v. The HSP must ensure at least 2 weeks of overlap period in replacements.

Adherence to Applicable Laws

HSP shall ensure that it adheres to all the applicable laws / regulations / rules relevant for employment of personnel. MoHFW shall not be responsible for any non-compliance of HSP with relevant laws / regulations / rules. It must be clearly understood that neither HSP nor any person employed by HSP for the project is employee of MoHFW.

3.2 Roles and Responsibilities

HSP shall ensure to coordinate and work with multiple stakeholders of the projects in order to achieve project objectives and its envisaged outcomes. Roles and responsibilities of key stakeholders are broadly defined as below:

3.2.1 Helpdesk Service Provider

- i. HSP shall undertake full responsibility of any kind of software development or customization required for MCTFC project.
- ii. HSP shall have the complete responsibility of data security for the MCTFC project.
- iii. HSP shall also integrate the MCTFC application with the RCH solution.
- iv. HSP shall also integrate MCTFC application with the Kilkari and Mobile Academy Project, National Family Planning and Pradhan Mantri Surakshit Matritva Abhiyan.
- v. HSP shall manage the overall project as a single point of contact.
- vi. HSP shall obtain the license of call centre operation for the project.
- vii. HSP shall prepare and monitor the project plan, periodic status reports, training guidelines and modules, knowledge management protocol, prepare and submit risk and mitigation strategies, exit management plan, Standard Operating Procedures and Practices, attend / organize review meetings etc.

- viii. HSP shall understand the business requirements of MoHFW for MCTFC.
- ix. Periodic revision in the formats and data to be incorporated by the HSP in the monthly / quarterly / yearly reports to be submitted for approval of MoHFW with regards to MCTFC operations & SLAs
- x. HSP shall prepare guidelines and details of the changes, if any, that are required in the CRM, IVRS applications, SLAs, reporting formats and take proper sign-off from MoHFW / TCC before implementing them into the solution.
- xi. HSP shall provide training to Helpdesk Agents, other members of team and selected personnel of MoHFW and / or nominated by MoHFW.
- xii. Any hardware and software up-gradation required for the MCTFC project would be the responsibility of the HSP.
- xiii. HSP shall establish and maintain the specified SLAs. HSP should provide all the system generated reports that are applicable to monitor the SLA for the project.
- xiv. HSP shall undertake regular maintenance and up-gradation of the system to ensure its optimum utilization and performance.
- xv. HSP shall have the responsibility to maintain discipline of the office environment and safety of the Helpdesk Agents and other support staff deployed at the Project site.
- xvi. HSP shall have the responsibility to maintain cleanliness, pest control which may include ultrasonic machines and hygiene of entire Project site (including porch area, windows / doors)
- xvii. The HSP would ensure strict compliance with all laws, regulations, rules, and guidelines governing the operation of call centres like the safety and security of employees.
- xviii. The HSP would ensure that all laws, regulations, rules, and guidelines governing the applications and the security guidelines of the Ministry of Communications & Information Technology are adhered to.
- xix. HSP shall ensure that all its employees maintain professional conduct. If MoHFW identifies any deviation in this regard, it reserves the right to take appropriate measures including seeking the replacement of the resources within 2 weeks. The recommendation / measures of MoHFW in this regard will be binding on HSP.
- xx. HSP shall be responsible for maintaining order in Project site and will be responsible for any legal, security and medical issues related to personnel deployed by them for MCTFC.
- xxi. HSP will make the payment of bills for PRI/SIP lines raised by the TSP which in turn will be reimbursed by MoHFW on submission of payment acknowledgement from the TSP along with other supporting documents including deduction of SLA (if any). While availing the services from the Telecom Service Provider (TSP) and providing the same to the MoHFW, the HSP shall comply with all applicable legal provisions including provisions relating to ensuring that these services do not tantamount to re-sale to MoHFW and also MoHFW does not end up paying any additional / double taxes (e.g. Service Tax, etc.) thereon while reimbursing the expenses to the HSP.
- xxii. HSP needs to ensure that all data on cloud must be stored within the country. The data location has to be specifically mentioned in the agreement by HSP.

3.2.2 Ministry of Health and Family Welfare, Government of India

- i. MoHFW will provide support to the HSP in smooth coordination with the stakeholders for development of MCTFC application.
- ii. MoHFW will constitute a TCC that will steer and monitor the MCTFC project implementation, operation, and support. Further, TCC will decide on the matters where clarity is required for project execution. In this regard, the decision of TCC would be final and binding on HSP.
- iii. TCC for MCTFC project will be responsible for following activities:
 - a) Overall responsibility of steering and managing the project
 - b) Monitoring the deliverables submitted by HSP, as well as coordination of MCTFC operations.
 - c) Addressing all issues pertaining to the project including taking on the responsibility for the final sign off as well as annual performance review of the project
 - d) Recommending extension of the project based on mutually accepted and agreed terms.
 - e) Recommending termination of contract on breach of contract terms and conditions (including those contained in RFP and related documents) by the HSP or otherwise.
 - f) Monitoring the performance of the HSP through SLAs as mentioned in this document.
 - g) For deciding on matters where further clarity is required for project execution, the decision of TCC would be final and binding.
 - h) Recommend on waiving penalties and SLAs.
 - i) Final approval on man effort proposed by HSP for Change Control Note (CCN)
- iv. MoHFW will define the working data set based on national health programmes, M&E requirement etc.
- v. MoHFW will facilitate effective coordination between the HSP and the other authorities.

3.2.3 National Informatics Centre (NIC/NICSI) / Implementing Agency for RCH

- i. Shall provide the necessary technical support for RCH to key personnel from HSP.
- ii. Shall provide adequate details to HSP for integration of MCTFC application with RCH applications.
- iii. Shall provide the necessary technical support for connectivity and smooth access between project site and RCH data centre for the MCTFC project.
- iv. Shall facilitate HSP to ensure smooth data exchange between RCH and MCTFC
- v. Shall provide requisite storage space to the HSP for hosting MCTFC data in RCH portal.

4. Project Implementation Timelines

The tenure of the project is divided into two phases,

Phase I: Development, UAT of Enhanced Features in MCTFC Project & Go-Live

- Revamp/Upgradation of MCTFC Architecture
- Design, Development, Testing and Implementation of Mother and Child Tracking Facilitation Centre Solution
- Go-Live

Phase II: Operationalization & Maintenance Support of Enhanced MCTFC Project

In case of extension beyond (3+2) 5th year, it shall be done on mutually agreed terms and conditions.

The selected bidder is expected to adhere to these timelines stipulated below. However, it can complete the below mentioned tasks before the scheduled timelines. Non-compliance to these timelines would lead to SLA penalty as prescribed in [Annexure 7](#) of this RFP:

Phase	Activities		Deliverables	Timelines
PHASE-I	Development of Enhanced Features in MCTFC Project			T₀ + 18 weeks
	A	Revamp/Upgradation of MCTFC Architecture		T₀ + 06 weeks
	i	Deployment of IT and non-IT equipment at project site. Also, new HSP would require to develop a development / staging environment for the envisaged upgradation of MCTFC Project as mentioned in Annexure -6	User manual, deployment, and configuration document	T ₀ + 4 weeks
	ii	Installation and commissioning of complete infrastructure at project site	Submission of completion report on infrastructure deployed at project site	T ₀ + 06 weeks
	B	Design, Development, Testing and Implementation of Mother and Child Tracking Facilitation Centre 2.0 Solution		T₀ + 16 weeks
	i	Functional requirement gathering by the HSP	Submission of FRS (Functional Requirement Specification) document and get it approved from MoHFW	T ₀ + 8 weeks

Phase	Activities		Deliverables	Timelines
	ii	Technical solution design	Submission of SRS (System Requirement Specification) document and System Design Document (SDD) and get it approved from MoHFW	T ₀ + 8 weeks
	iii	Develop the MCTFC solution	Demonstration of the MCTFC solution	T ₀ + 12 weeks
	iv	Get sign-off of MCTFC solution from MoHFW	Submission of sign off report	T ₀ + 14 weeks
	v	Submission of Exit Management Plan	Submission of Exit Management Plan document and get approval from TCC	T ₀ + 14 weeks
	vi	Training of manpower on the new application	Application deployment report containing details of new application deployed	T ₀ + 15 weeks
	vii	Deployment of new application	Submission of deployment report clearly mentioning the new application with all its features has been deployed successfully at project site and manpower has been successfully trained on it	T ₀ + 16 weeks
	viii	Security Audit for new application and attaining of safe for hosting	Submission of audit report from CERT-IN empanelled agency by the HSP to MoHFW 2 weeks prior to Go-Live and submission of Audit clearance certificate for its compliance for attaining the safe for hosting from NIC/ MoHFW's authorised provider	T ₀ + 16 weeks
	ix	Onsite training and handholding of the Helpdesk Agents, Medical Counsellor, supervisors etc and stabilization of the project including CRM, IVRS, SMS	Submission of undertaking for handholding and onsite training of all the Operational and Core team.	T ₀ + 16 weeks
	C	Go-Live	Sign off from MoHFW	T _g =T ₀ + 18 weeks
PHASE II	OPERATION, MAINTENANCE & ON-GOING SUPPORT FOR MCTFC 2.0 PROJECT			

Phase	Activities		Deliverables	Timelines
	i	Operation and maintenance of the project for a period of 3 years from the date of Go-Live of MCTFC 2.0	a) Updated System / application login details b) Access card details / attendance report c) Enhanced reports as required for evaluation of SLA d) Dialler report e) EMS reports f) Documentary evidence for payment of applicable taxes and duties g) Any other document / requirement as per contract	T _g + 3 years
	ii	License for the call centre operation for the project	Call centre license from DoT	T _g + 6 months
	iii	Recurring Security Audit for the project	Subsequent audit of application in case of any major change or annually whichever is earlier as per the MEITY Guidelines.	
	iv	On-going support for implementation of additional requirements of MoHFW during the period of 3 years from the date of Go-Live of the project	Sign off from MoHFW	As and when required during the period of 3 years from the date of Go-Live.
	v	Submission of SLA reports		T ₀ be submitted by 2 days post to the end of the quarter
	vi	Exit Management Phase	Exit Management plan as mentioned in section 9.1	

- a. 'T₀' refers to the date of signing the contract or written request by the MoHFW regarding takeover of Project site by the HSP / successful bidder, whichever is earlier
- b. 'T_g' refers to the date of operationalization of Mother and Child Tracking Facilitation Centre (MCTFC)2.0 project

Note:

The selected HSP shall provide the timelines as mentioned in [Form 12](#) of [Annexure 5](#)

5. Evaluation Criteria

MoHFW will constitute a Tender Committee (TC) to evaluate the responses of the Bidders. The Committee shall evaluate the responses to the RFP and all supporting documents / documentary evidence. Inability to submit requisite supporting documents / documentary evidence, may lead to rejection.

Technical bids thus opened will be evaluated in detail by MoHFW subsequently.

In the event of the specified date of bid opening being declared a holiday for MoHFW, the bids shall be opened at the appointed time on the next working day.

The decision of the Committee on the evaluation of responses to the RFP shall be final. No correspondence will be entertained outside the process of negotiation / discussion with the Committee.

MoHFW may seek clarifications from the Bidder on the Technical & Financial Bid

During evaluation of bids, MoHFW may, at its discretion, ask the bidder for a clarification of its bid. The request for clarification and the response shall be made in writing. If the response to the clarification is not received before the expiration of the deadline prescribed in the request, MoHFW reserves the right to evaluate bids based on available documents which may also lead to rejection of the bid.

5.1. Technical Evaluation Stage

MoHFW shall open the technical bids to evaluate the minimum eligibility criteria and technical evaluation criteria defined in the RFP is tabulated below. The bidder shall submit self-assessed compliance to Eligibility criteria checklist prescribed in [Annexure 1](#) and technical evaluation criteria tabulated in [Annexure 2](#). MoHFW may ask bidder(s) for additional information to verify claims made in their eligibility document, at any point of time before opening of the technical bid.

The technical bids that score at least 70% of the total of technical marks will be considered for financial bid opening. Every technical bid shall be awarded an absolute technical score of ‘T’ marks out of a total of 100 marks.

It may be noted that any reference / mention of the financial quote or price schedule in the technical bid shall be at the bidder’s risk and may result in rejection of the bid.

MoHFW may ask bidder(s) for additional information to verify claims made in their technical bid document, at any point of time before opening of the financial bid.

If there is a change in the status of the bidder which may lead to non-compliance to the eligibility criteria, at any stage during the bid process till the award of the contract, the bidder should immediately bring the same to the notice of MoHFW. In this case the MoHFW may take appropriate steps which may also lead to rejection of the bid.

5.2.Financial Evaluation Criteria

The financial bids of only those bidders will be opened who qualify the technical evaluation stage.

Formats for the Financial bid given at [Annexure 3](#).

Each bidder will be given a Normalized Financial Score (F) as per below mentioned formula:

$$F = 100 \times (F_m / F_b)$$

F_m is lowest financial quote among all technically qualified bids.

F_b is financial quote by the bidder being evaluated.

For evaluation of the financial bid, the total financial quote ([Annexure 3](#)) for all the activities would be considered.

5.3.Method of Selection

- i. For final selection of the bidder, the technical qualified bid will be given a weightage of 70% based on criteria for evaluation. The price bids of only those Agencies who qualify technically will be opened.
- ii. The financial bid shall be allocated a weightage of 30%. For working out the combined score, MoHFW will use the following formula:
- iii. **Total Score (H) = (0.7 x T) + (0.3 x F)**

Here

T stands for technical score and

F stands for Financial Score

The bids will be ranked in terms of total Score. The bid with the highest total Score will be considered for the award of the contract.

- iv. **Example:** If in response to this RFP, three bids, A, B and C were received and the Evaluation Committee awarded them 75, 80 and 90 marks on technical bid respectively, all the three bids would be technically suitable. Further, if the quoted price of bids A, B and C were INR 120, 100 and 110 respectively, then the following points for financial bids may be given:

A: $100/120 \times 100 = 83$ points

B: $100/100 \times 100 = 100$ points

C: $100/110 \times 100 = 91$ points

- v. For combined evaluated points, the process would be as follows:

Bid A: $75 \times 0.7 + 83 \times 0.3 = 77.4$

Bid B: $80 \times 0.7 + 100 \times 0.3 = 86$

Bid C: $90 \times 0.7 + 91 \times 0.3 = 90.3$

Bid C in this case with the highest total Score (H-1) will be considered for award of contract.

In case of a tie, the bidder having the highest technical score (T) among such bidders will be considered. Herein T would be considered up to 2 decimal places.

- a) If a bidder quotes NIL charges/ consideration, the bid shall be treated as non-responsive

and will not be considered.

- b) The bid price will include all taxes and levies and shall be in Indian Rupees.
- c) Any conditional bid would be rejected.
- d) MoHFW will determine whether the Financial Bids are complete, and unconditional.

5.4.Negotiation

The bid of the highest acceptable responsive bidder (H1) should normally be accepted. However, if the price offered by that bidder is not acceptable, negotiation may be held only with H1 bidder.

5.5.Award of Contract

MoHFW reserves the right to accept or reject any bid and to annul the bidding process and reject all bids at any time before the project is awarded, without thereby incurring any liability to the affected bidder or bidders, with or without assigning any reason.

Notification to Bidder: Before the expiry of the period of validity of the bid, MoHFW shall notify the successful bidder in writing by registered letter or by e-mail or by fax, that its bid has been accepted. The bidder shall acknowledge in writing the receipt of the notification of award to MoHFW. The date and time for the same shall be notified to the bidder in writing by MoHFW.

Signing/Issue of Contract/Work order: The contract/work order shall be signed on all the pages by the person(s) duly authorized to bind the successful bidder to the contract/ work order. The stamp of the organization shall also be affixed on each page of the contract/ work order. MoHFW may discuss certain terms with the successful bidder before signing/ issuing the contract/ work order.

Expenses for the Contract/ Work order: The incidental expenses of execution of agreement / contract/ work order shall be borne by the selected bidder.

Failure to Abide by the Contract/ Work order: The conditions stipulated in the contract/ work order shall be strictly adhered to and violation of any of these conditions will entail termination of the contract/ work order without prejudice to the rights of MoHFW to impose penalties as specified in the bidding document and the contract/ work order.

The services of the selected bidder under this RFP may also be utilised by any division or unit of the Ministry of Health and Family Welfare for setting up the call centre/helplines under the Terms and Conditions mentioned in this RFP. All such engagements shall be co-terminus with the validity of the contract resulting from this RFP.

6. SLA Measurement and Penalties

HSP would have the responsibility to escalate issue, if any, which is required to be discussed and resolved for the smooth operation of the project well in time. Any low performance as reflected in the SLA performance of the HSP would be the sole and complete responsibility of the HSP.

- a. The key service level requirements for MCTFC project, which need to be ensured by the HSP during the operations and maintenance period, are given in [Annexure 7](#). These performance requirements shall be strictly imposed by the HSP. The SLA monitoring shall be done / reviewed on a monthly/quarterly basis. During the contract period, it is envisaged that there could be changes to the SLA, in terms of addition, alteration or deletion of certain parameters based on mutual consent of both the parties i.e., MoHFW and HSP.
- b. **Penalties:** HSP will attract penalties in case of delay in completion of activities. In case the overall penalty exceeds 10% of the contract value, MoHFW reserves the right to terminate the contract. Penalties applicable per week of delay in completion of the following activities will be based on the cost of respective milestone payment:

S. No	Activities	Penalties
3	Delay in Go-Live of MCTFC2.0	0.1% of the Contract value X Number of weeks of delay
4	HSP will ensure average minimum 6 hours of actual calling per Helpdesk Agent (engaged for outbound calling) during the billing period	150% of (scheduled number of hours of calling during billing period less than actual hours of calling) X per hour rate
5	HSP will ensure the license for the call centre operation for the project within 6 months from the Go-Live of MCTFC	0.5% of the quarterly bill for delay beyond the targeted timeline
6	HSP will submit a compliance report from CERT-IN empanelled agency to MoHFW prior to 02 weeks from the date of Go-Live and subsequent audits intimated by the MoHFW as per the provision of the contract	0.005% of the Contract Value every week after the targeted timeline
7	Delay in delivering services as per project requirements (MIS reports, Enhancements, etc.) (i.e., each of such delay is referred to as an incident)	a. Deduction of 0.5 % of the quarterly payment per week delay from the specified timelines as mutually agreed by MoHFW and New HSP. b. Partial week delays shall be calculated on pro-rata basis. E.g., if delay is of 3 weeks and 4 days beyond the specified timelines

S. No	Activities	Penalties
		then the penalty would be calculated as below: 3 weeks and 4 days = 3.57 weeks Penalty = 3.57 x 0.5% = 1.79% (of the quarterly payment) c. The deduction will be calculated for each incident reported in the concerned month. The services herein refer to the activities defined in the scope of work and the timelines for the same shall be mutually decided and agreed to during the project and communicated in writing / email to HSP by MoHFW.

7. Payment Terms & Schedule

The selected bidder will have to set up and operationalize the project conforming to the scope mentioned in the RFP. After Go-Live of the project, the selected bidder shall be paid based on quarterly invoice as per the actual deployment of resources.

S.No	Cost Head	Payment Milestones	Payment Formula
1	Deployment cost & implementation of solution	On Go-Live	100% of One time Deployment & implementation of solution cost as proposed by HSP in their Financial Bid subject to deduction/penalty if any
2	Helpdesk Agents	Quarterly payment after Go-Live of the project	(Actual number of days agents worked in MCTFC in quarter X Price per seat per day) subject to deduction/penalty if any
3	Cloud Infrastructure	Quarterly payment after Go-Live of the project	CSP cost based on Actual Usage Generated Monthly Invoice

Note:

- HSP will be paid as per actual availability of the resources at Project site as per provisions of the Contract.
- Payment for Cloud infra shall be paid based on actual usage.
- The above payments will be subject to deduction of TDS and taxes as applicable and deduction/penalties as per the SLA defined in this RFP.
- Mode of payment would be on an actual seat basis; the selected bidder shall raise the invoice based on the actual number of agents deployed in the MCTFC during the Quarter. The

selected bidder shall submit the agent's attendance report and SLA compliance report along with the Quarterly Invoice.

- Deduction if any found at later stage would be deducted from the next invoice of the selected bidder.
- All taxes, duties etc. shall be payable by the selected bidder. However, in case of change or revision of service tax or its equivalent in any new tax structure, the payment will be made as applicable. The documentary evidence for changes in tax structure will be submitted by the selected bidder.
- The services of the selected bidder under this RFP may also be utilised by any division or unit of the Ministry of Health and Family Welfare for setting up the call centre/helplines under the Terms and Conditions mentioned in this RFP. All such engagements shall be co-terminus with the validity of the contract resulting from this RFP.

8. Instructions to Bidders

8.1 Availability of Tender Document

The tender document will be available at Government e-Marketplace Portal (GeM) <https://gem.gov.in/> and MoHFW main website <https://main.mohfw.gov.in/>. A notification for the same would also be available on the website of MoHFW.

Prospective bidders desirous of participating in this tender may view and download the tender documents free of cost from the above-mentioned website.

At any time prior to the last date for receipt of bids, MoHFW may, for any reason, whether at its own initiative or in response to a clarification requested by a prospective bidder, modify the tender documents by an amendment/corrigendum. Any such corrigendum shall be deemed to be incorporated into this RFP.

The amendment/corrigendum will be notified at the above-mentioned websites, which will be binding on the prospective bidders to consider for quoting.

MoHFW reserves the right to cancel this tender or modify the requirement at any stage of the Tender process cycle without assigning any reasons. MoHFW will not be under obligation to give clarifications for doing the aforementioned.

The issue of this RFP does not imply that MoHFW is bound to select a bidder or to appoint the selected bidder, as the case may be, for the project and MoHFW reserves the right to reject all or any of the proposals without assigning any reasons whatsoever. The bidder shall bear all its costs associated with or relating to the preparation and submission of its proposal including but not limited to preparation, copying, postage, delivery fees, expenses associated with any demonstrations or presentations which may be required by MoHFW or any other costs incurred in connection with or relating to its proposal. All such costs and expenses shall remain with the bidder and MoHFW shall not be liable in any manner whatsoever for the same or for any other costs or other expenses incurred by a bidder in preparation of submission of the proposal,

regardless of the conduct or outcome of the selection process.

All information supplied by bidders may be treated as contractually binding on the bidders on successful award of the assignment by the MoHFW based on this RFP.

No commitment of any kind, contractual or otherwise on the part of MoHFW shall exist unless and until a formal written contract has been executed by or on behalf of MoHFW. Any notification of preferred bidder status by MoHFW shall not give rise to any enforceable rights by the bidder. MoHFW may cancel this public procurement at any time prior to a formal written contract being executed by or on behalf of MoHFW.

Bidders are advised to study all instructions, forms, terms, requirements, and other information in the RFP document carefully. Submission of the bid shall be deemed to have been done after careful study and examination of the RFP document with full understanding of its implications.

Failure to comply with the requirements of this paragraph may render the bid non-compliant and the bid may be rejected. Bidders must:

- Include all documentation specified in this RFP;
- Follow the format of this RFP and respond to each element in the order as set out in this RFP;
- Comply with all requirements as set out within this RFP.

8.2 Period of Validity of Bids

Bids shall remain valid for 180 days from the date of submission of bid. MoHFW holds the right to reject a bid valid for a period shorter than 180 days as non-responsive, without any correspondence.

In exceptional circumstances, MoHFW may solicit the bidder's consent to an extension of the period of validity. The request and the response thereto shall be made in writing. Extension of validity period by the bidder should be unconditional. The EMD shall also be suitably extended. A bidder may refuse the request without forfeiting the EMD. A bidder granting the request will not be permitted to modify its bid.

8.3 Pre-Bid Meeting and Clarifications

8.3.1 Pre-bid Meeting

MoHFW shall hold a pre-bid meeting with the prospective bidders on the date, time and venue mentioned in the Important Dates table. All those who have obtained a bid document can only participate in pre-bid meeting to seek clarification on the bid, if any. The bidders will have to ensure that their queries for pre-bid meetings should reach the Nodal Contact Person mentioned in the Fact Sheet by email or in person, on or before the date and time mentioned in the Important Dates table.

The queries necessarily be submitted in the following format:

S. No.	RFP document reference(s) [Section, clause, and page number(s)]	Content of RFP requiring clarification(s)	Points of clarification
1.			
2.			

MoHFW shall not be responsible for ensuring that the bidders' queries have been received by MoHFW. Any requests for clarifications received after the indicated date and time may not be entertained by MoHFW.

8.3.2 Responses to Pre-Bid Queries and Issue of Corrigendum

MoHFW will endeavour to provide timely response to all queries. However, MoHFW makes no representation or warranty as to the completeness or accuracy of any response made in good faith, nor does MoHFW undertake to answer all the queries that have been posed by the bidders.

At any time prior to the last date for receipt of bids, MoHFW may, for any reason, whether at its own initiative or in response to a clarification requested by a prospective bidder, modify the RFP document by a corrigendum.

The corrigendum (if any) and clarifications to the queries from all bidders will be posted on Government e-Marketplace Portal (GeM) website <https://gem.gov.in/>. Any such corrigendum shall be deemed to be part of this RFP.

To provide prospective bidders reasonable time for taking the corrigendum into account, MoHFW may, at its discretion, extend the last date for the receipt of bids.

8.4 Language of Bid

The bid prepared by the bidder, as well as all correspondence and documents relating to the bid exchanged by the bidder and MoHFW shall be written in English language only.

8.5 Documents comprising the bid

The bid submitted by the bidder shall comprise following documents:

- Technical bid in the formats specified in the RFP- Bidders need to provide all necessary information required to comply with EMD requirement, eligibility and technical evaluation criteria as specified in Annexure 1 & 2 of the RFP document.
- Financial bid shall be submitted as per the prescribed format of the RFP document/ GeM portal
- Any other information that is to be submitted during the bidding process.

Technical bid shall comprise of the cover letter, details and documents of the bidder meeting

the technical criteria, bid and an undertaking (for contents and formats of the technical bid kindly refer to [Annexure 2](#) and [Annexure 5](#)). Further, Technical bid in the – Bidders need to submit the technical bid in formats specified in the RFP provide all necessary information required to comply with EMD requirement, eligibility and technical evaluation criteria as specified in RFP document, respectively.

It may be noted that any reference / mention of the financial quote or price schedule in the technical bid shall be at the bidder's risk and may result in rejection of the bid.

Financial bid should strictly conform to the formats to enable evaluation of bids. Special care must be taken to ensure that the bid does not have any hidden costs or conditional costs, as this shall make the bid liable for outright rejection.

The price components furnished by the bidder in accordance with format provided in this RFP, will be solely for the purpose of facilitating the comparison of bids by MoHFW. This will not in any way limit the right of MoHFW to contract on any other terms specified in the RFP.

Prices quoted by the bidder shall be fixed and no variation will be allowed under any circumstances. No open-ended bid shall be entertained and the same is liable to be rejected straightaway.

8.6 Modification and Withdrawal of Bids

The bidder may modify or withdraw its bid on the Government e Marketplace (GeM) | National Public Procurement Portal, Government of India website <https://gem.gov.in> before the expiration of the deadline prescribed for submission of bids. No bid may be modified after the deadline for submission of bids. No bid may be withdrawn in the interval between the deadline for submission of bids and the expiration of the period of bid validity.

8.7 Deadline for Submission of Bids

The bids (technical and financial) must be submitted on the Government e Marketplace (GeM) | National Public Procurement Portal, Government of India [website https://gem.gov.in](https://gem.gov.in) not later than date and time mentioned in the Important dates table. In the event of the specified date for the submission of bids being declared a holiday for MoHFW, the bids will be received up to the appointed time on the next working day.

MoHFW may, at its own discretion, extend the deadline for submission of bids by amending the bid document in which case all rights and obligations of MoHFW and bidders previously subject to the deadline, will thereafter be subject to the deadline as extended.

Any bid received by MoHFW after the deadline for submission of bids prescribed by MoHFW will be summarily rejected. MoHFW shall not be responsible for any delay or non-receipt / non-delivery of the documents. No further correspondence on this subject will be entertained.

8.8 Other General conditions related to Bid Document

- i. The bidder will be required to submit a signed copy of the RFP as an acceptance of the terms and conditions laid down by MoHFW, failing which the offer will be treated as withdrawn. After signing of the RFP document, no variation or modification in the terms of the agreement shall be made except by written amendment signed by both parties.
- ii. All pages of the bid being submitted must be sequentially numbered by the bidder, should be signed and page referencing should be given in a tabular format highlighting key areas to qualify the technical criteria.
- iii. It may be noted that any reference / mention of the financial quote or price schedule in the technical bid shall be at the bidder's risk and may result in rejection of the bid.
- iv. Before the expiry of the period of validity of the bid, MoHFW shall notify the successful bidder in writing by registered letter or by email, that its bid has been accepted. The bidder shall acknowledge in writing receipt of the notification of award and will enter into agreement within specified time.
- v. Bidders are advised to study all instructions, forms, terms, requirements, and other information in this RFP document carefully. Submission of the bid shall be deemed to have been done after careful study and examination of the RFP document with full understanding of its implications.
- vi. The Bidder should submit documents related to Pre-qualification criteria, Technical criteria and Financial bid in GeM portal. Each document shall contain sections of the bid with a relevant heading. For example, the work order for a project should be provided under a heading "Work Order << Sr. no. of the Work Order>>"
- vii. Arithmetical errors will be rectified on the following basis. If there is a discrepancy between the unit price and the total price that is obtained by multiplying the unit price and quantity, the unit price shall prevail and the total price shall be corrected. If there is a discrepancy between words and figures, the amount in words shall prevail. If the bidder does not accept the correction of errors, its bid will be rejected, and its EMD may be forfeited.
- viii. Any bid failing to meet the **prequalification criteria** mentioned in [Annexure 1](#) shall be summarily rejected and will not be considered for further evaluation. If there is a **change in the status of the bidder** which may lead to non-compliance to the prequalification criteria mentioned in [Annexure 1](#), at any stage during the bid process, award of the contract or the entire project duration, the bidder should immediately bring the same to the notice of MoHFW. In this case the MoHFW may take appropriate steps which may also lead to rejection of the bid.

8.9 Rejection of Bid

The Bid must be submitted online on the Government e Marketplace (GeM) | National Public Procurement Portal, Government of India [website https://gem.gov.in](https://gem.gov.in). The bids submitted by Telex, fax or email shall not be entertained. Any condition put forth by the bidder non-conforming to the bid requirements shall not be entertained at all and such bid shall be rejected.

8.10 Consortium

Consortiums are allowed for the project so that required expertise can be brought upon by the consortium member for the implementation of the project. For the activities of the project that are carried out by the consortium member, the prime bidder shall be responsible for consortium member's act and conduct as well as for the entire activity that is being carried out by the consortium member. In case of consortium, the following additional requirements should be complied with:

- The number of members in a consortium shall not be more than three (3), i.e., one prime bidder and two other consortium members
- The bid should contain details of all the members of the consortium including their legal status as well as the Memorandum of Agreement / Consortium Agreement.
- Consortium members can participate in only one bid. In case prime bidder or any other member of consortium participates in more than one bid, all such bids will be rejected.
- Bidder(s) need to sign a consortium agreement clearly defining their roles and responsibilities for execution of this project. One of the consortium members will be nominated as prime bidder which should be supported with a documentary proof in the form of MoA (Memorandum of Agreement) / Consortium Agreement.
- Nothing in this MoA / Consortium Agreement shall constitute, create, or give effect or recognize a joint venture, partnership, or business entity of any kind.
- The MoA / Consortium Agreement shall be governed by the laws of India.
- Any matter, which is not stipulated in the MoA / Consortium Agreement, shall be settled in good faith by discussion among the parties in the spirit of understanding and cooperation in the favour of the project.
- Where the prime bidder / any of the consortium member's ability to survive as an independent corporate entity is threatened or is lost owing to any reason whatsoever, including inter alia the filing of any bankruptcy proceedings against the prime bidder or its consortium members, any failure by the prime bidder or its consortium member to pay any of its dues to its creditors, the institution of any winding up proceedings against the prime bidder / consortium member or the happening of any such events that are adverse to the commercial viability of the prime bidder / consortium member, MoHFW shall reserve the right to take any steps as deemed necessary, to ensure the effective transition of the project to a successor agency and to ensure business continuity.

Change in composition of the Consortium

Change in composition of the Consortium may only be permitted where:

- a. Lead Member (Lead member will be the prime bidder during the bidding process and will sign the contract with MoHFW) continues to be the Lead Member of the Consortium.
- b. the substitute is at least equal, in terms of Technical Capacity or Financial Capacity, to the Consortium Member who is sought to be substituted and the modified Consortium shall continue to meet the pre-qualification and short-listing criteria for Applicants/resources; and
- c. the new Member(s) expressly adheres other conditions of the contract / RFP on behalf of the Consortium as if it were a party for this Project. Note: Any change in composition of consortium requires an approval of MoHFW.

8.11 Sub-Contracting

HSP may sub-contract the following activities to a third-party agency:

- a. Housekeeping, cleaning, pest control, pantry, and sanitation
- b. Physical security
- c. AMC of MCTFC infrastructure (IT and non-IT).

However, HSP will inform MoHFW regarding any such sub-contracting and would be overall responsible for each activity mentioned above. HSP will also share a list of sub-contractors with MoHFW / NIHFW for accessibility in the Project site. Also, HSP will be solely responsible for operation and maintenance of MCTFC and the conduct of third-party agency and its employees to whom HSP has sub-contracted the above-mentioned activity(ies).

8.12 Bid Opening

MoHFW reserves the rights to postpone or cancel a scheduled bid opening.

The bids will be opened, in two sessions, one for technical bids, and second for financial bids of those bidders who qualify the Technical Criteria.

During bid opening, preliminary scrutiny of the bid documents will be made to determine whether they are complete, whether required EMD has been furnished, and whether the bids are generally in order. Bids not conforming to such preliminary requirements will be prima facie rejected.

The (EMD in the form of BG) of the bidders will be opened on the same day and time, on which the technical bid is opened, and bids for which the requisite EMD has not been received by MoHFW or whose EMD as per the format is not in order shall be rejected.

8.13 Earnest Money Deposit (EMD)

Bidders shall submit the EMD in the form of Bank Guarantee from any of the scheduled commercial bank in India as per the format specified in Form 09 of [Annexure 5](#) and should be valid for the period of 180 days from the last date of bid submission.

The bidders are required to submit original copy of the EMD at DDG (Stats), Statistics Division (MoHFW), 3rd Floor, IRCS HQ Building, Sansad Marg, 1, Annexe Rd, New Delhi – 110001 on or before bid submission end date and time.

In case the bidder is found in breach of any condition(s) of this RFP, at any stage, legal actions per rules/laws, shall be initiated against the bidder and EMD will be forfeited.

Bids that do not accompany EMD shall be summarily rejected.

Amount of EMD

The bidder shall furnish, as part of its bid, EMD for the amount and in the manner as mentioned in the Fact Sheet.

- The EMD shall be furnished in Indian Rupees (INR).
- The EMD is required to protect MoHFW against the risk of bidder's conduct, which would warrant the security's forfeiture.
- Unsuccessful bidder's EMD will be discharged / returned as promptly as possible on award of the project to the successful bidder.
- The successful bidder's EMD will be returned subsequent to receipt of the Performance Bank

- Guarantee from the bidder pursuant to [Form 15](#) of Annexure 5.
- The EMD can be forfeited if a bidder
 - a. Withdraws its bid during the period of bid validity or
 - b. Does not accept the correction of errors or
 - c. To furnish performance bank guarantee in accordance with [Form 15](#) of Annexure 5

9. General Terms & Conditions

9.1 Exit Management

This clause sets out the provisions, which will apply during the Exit Management period. The Parties shall ensure that their respective associated entities carry out their respective obligations set out in this Exit Management Clause.

The exit management period starts, in case of expiry of contract, at least 3 months prior to the date when the contract ends or in case of termination of contract, on the date when the notice of termination is sent to the selected bidder. The exit management period ends on the date agreed upon by MoHFW or Three months after the beginning of the exit management period, whichever is earlier.

Exit Management Plan

The MCTFC-HSP shall submit an exit management plan (including up-to-date list of the assets, technology, architecture, specifications of asset, etc) in writing to MoHFW within 3 months from the date of signing of contract and get approval from TCC.

The MCTFC-HSP shall ensure that the exit management plan provides for a handover and exit strategy for MCTFC Solution. Such an exit strategy shall include:

- a) A detailed plan of the transfer process
 - b) Review of options to ensure service continuity.
 - c) Testing and valuation of assets
 - d) Plan for handing over MCTFC Solution to MoHFW or nominated agency.
 - e) Plans for provision of contingent support to MCTFC 2.0 Solution and new MCTFC-HSP for a reasonable period after transfer of knowledge and its assets in case of termination.
 - f) Resource allocation for implementing the exit strategy and
 - g) Obligation of the parties in relation to the exit strategy.
- I. The MCTFC-HSP shall revise the exit management plan on yearly basis to keep it relevant and up-to-date and will be overall responsible for the implementation of exit strategy at the end of contract term or as notified by MoHFW.
 - II. The MCTFC-HSP shall be paid up to the sum equivalent to the operational expenses if the transfer of technology takes more time than the time estimated by the MCTFC-HSP in the project plan and shall be made in accordance with the terms of payment schedule.
 - III. The MCTFC-HSP shall handover all confidential information and all other related materials in its possession to MoHFW or its nominated agency.
 - IV. The HSP shall provide all such information as may reasonably be necessary for a smooth

handover to MoHFW / replacement agency and which the HSP has in its possession or control at any time during the exit, all information (including but not limited to documents, records, database, etc) in digital and/ or paper form relating to the services reasonably necessary to enable MoHFW and its nominated agencies to carry out due diligence in order to transition the provision of the Services to MoHFW or its nominated agencies.

- V. The MoHFW will issue a written sign-off after the transition / take-over from the Service Provider. The Service Provider shall not remove/delete/destroy any data/content/information/communication/ report etc. till such a written signoff is provided by the MoHFW along with an explicit request to delete/ remove/destroy the content.
- VI. In the event of termination or three months before expiry of the contract to be signed between MoHFW and MCTFC-HSP, each party shall comply with the exit management plan.
- VII. HSP shall compute the data management during exit in the cloud computing context.

9.2 Performance Security

The successful bidder shall at its own expense deposit with MoHFW, within thirty (30) working days of the date of notice of award of the contract or at the time of signing of the contract, whichever is earlier.

- i. An unconditional and irrevocable Performance Bank Guarantee (PBG) from a scheduled commercial bank acceptable to MoHFW, payable on demand, for the due performance and fulfilment of the contract by the HSP.
- ii. The PBG shall be denominated in the currency of the RFP and shall be payable by bank guarantee.
- iii. This PBG will be for an amount equivalent to 05% of contract value, and is payable by the successful bidder, before signing the contract. All charges whatsoever such as premium, commission etc. with respect to the PBG shall be borne by the HSP.
- iv. The PBG shall be valid till the end of three months after the completion of Phase II (operation, maintenance, and on-going support) of the MCTFC project (i.e., three years plus three months after Go-Live of MCTFC). These additional three months is required for facilitating closure of the project.
- v. In case of extension of contract beyond 3 years, validity of the existing PBG shall be extended in accordance with the extension period.
- vi. The PBG may be discharged / returned by the MoHFW upon being satisfied that there has been due performance of the obligations of the HSP under the contract. However, no interest shall be payable by MoHFW on the PBG.
- vii. In the event of the HSP being unable to service the contract for whatever reason, the MoHFW would evoke the PBG. Notwithstanding and without prejudice to any rights whatsoever of the MoHFW under the contract in the matter, the proceeds of the PBG shall be payable to the MoHFW as compensation for any loss resulting from the HSP's failure to fulfil its obligations under the contract. The MoHFW shall notify the HSP in writing of the exercise of its right to receive such compensation within 14 days of occurrence of default by HSP, indicating the contractual obligation(s) for which the HSP is in default.
- viii. MoHFW shall also be entitled to make recoveries from the HSP's bills, PBG or from any other amount due to HSP, the equivalent value of any payment made to HSP due to

inadvertence, error, collusion, misconstruction, or misstatement. Any such occurrence should be brought to the notice of MoHFW.

9.3 Termination of Contract

MoHFW may terminate this contract by giving a 90 (Ninety) days prior and written notice indicating its intention to terminate the contract under the following circumstances:

- In case, the overall penalty for the selected bidder exceeds 10% of the contract value.
- MoHFW is of the opinion that there has been such an event of default on the part of the selected bidder which would make it proper and necessary to terminate this contract and may include failure on the part of the selected bidder to respect any of its commitments about any part of its obligations under this contract.
- The selected bidder has failed to commence the provision of MCTFC Services or has without any lawful excuse under these conditions suspended the work for 30 consecutive days.
- If staffing personnel and/or services as per the scope of work under the contract with MoHFW is not found acceptable by MoHFW.
- The selected bidder has neglected or failed to observe and perform all or any of the term's acts, matters or things under this Contract to be observed and performed by it.
- The selected bidder has acted in any manner to the detrimental interest, reputation, dignity, name, or prestige of MoHFW.
- **Termination for Default:** Ministry without prejudice to any other remedy for breach of Contract or non-compliance with service levels, by written notice of default sent to the selected bidder, may terminate the Contract fully or in part:
 - a. If the selected bidder's Firm fails to deliver any or all Contracted services as per service standards specified in the Contract, or If the selected Firm fails to perform any other obligation(s) under the Contract as per the contract timeline and for the period of contract, or
 - b. If the selected bidder's Firm has been found be engaged in corrupt or fraudulent practices in competing for or in executing the Contract.
 - c. In the event Ministry terminates the Contract in whole or in part, Ministry may procure, upon such terms and in such manner as it deems appropriate, services similar to those undelivered, and the selected bidder's Firm shall be liable to Ministry for any excess costs for such similar services. However, the selected firm may continue performance of the Contract to the extent not terminated. Ministry would not be liable to pay any damages to the selected firm in cases comprising as above.
- **Termination for Insolvency:** Ministry may at any time terminate the Contract by giving written notice to the selected bidder's Firm if the selected bidder's Firm becomes bankrupt or otherwise insolvent. In this event, termination will be without compensation to the selected bidder's Firm, provided that such termination will not prejudice or affect any right of action or remedy which has accrued or will accrue thereafter to Ministry.

- **Termination for Convenience:** Ministry, by written notice sent to the selected bidder's Firm, may terminate the Contract, in whole or in part, at any time for its convenience. The notice of termination shall specify that termination is for its convenience. In case of termination for convenience, Ministry would pay to the selected bidder's Firm cost of services provided till the date of the termination. The Performance Bank Guarantee in such a case would be refunded to the selected bidder's Firm.

9.4 Force Majeure

9.4.1 For the purpose of this contract, an "Event of Force Majeure" means any circumstance not within the reasonable control of the Party affected, but only if and to the extent that

- a) such circumstance, despite the exercise of reasonable diligence and the observance of Good Utility Practice, cannot be, or be caused to be, prevented, avoided, or removed by such Party, and
- b) such circumstance materially and adversely affects the ability of the Party to perform its obligations under this contract, and such Party has taken all reasonable precautions, due care, and reasonable alternative measures in order to avoid the effect of such event on the Party's ability to perform its obligations under this contract and to mitigate the consequences thereof.

9.4.2 For this contract, Events of Force Majeure shall include, but not be limited to:

- a) the following Natural Force Majeure Events:
 - fire, chemical or radioactive contamination or ionising radiation, earthquakes, lightning, cyclones, hurricanes, floods, droughts or such other extreme weather or environmental conditions, unanticipated geological or ground conditions, epidemic, pandemic, famine, plague or other natural calamities and acts of God.
 - explosion, accident, breakage of a plant or equipment, structural collapse, or chemical contamination (other than resulting from an act of war, terrorism, or sabotage), caused by a person not being the affected Party or one of its contractors or subcontractors or any of their respective employees or agents.
 - to the extent that they do not involve India or take place outside of India, acts of war (whether declared or undeclared), invasion, acts of terrorists, blockade, embargo, riot, public disorder, violent demonstrations, insurrection, rebellion, civil commotion, and sabotage.
 - strikes, lockouts, work stoppage, labour disputes, and such other industrial action by workers related to or in response to the terms and conditions of employment of those workers or others with whom they are affiliated save, when such event is directly related to, or in direct response to any employment policy or practice (with respect to wages or otherwise) of the party whose workers resort to such action.
 - in relation to the selected bidder's Firm, non-performance by a counterparty to a contract relating to the selected bidder's Firm Business by reason of an event or

circumstance that would constitute a Natural Force Majeure Event under this Agreement; and

b) the following Political Force Majeure Events:

- to the extent they take place in India, acts of terrorists, blockade, embargo, riot, public disorder, violent demonstrations, insurrection, rebellion, civil commotion, and sabotage.
- to the extent that they are politically motivated, strikes, lockouts, work stoppages, labour disputes, or such other industrial action by workers, save in relation to the selected bidder's Firm, when such event is directly related to, or in direct response to any employment policy or practice (with respect to wages or otherwise) of the selected bidder's Firm.
- failure or inability of the selected bidder's Firm to obtain or renew any Consent, on terms and conditions as favourable in all material respects as those contained in the original Consent relating to the selected bidder's Firm Business (other than due to a breach by the selected bidder's Firm of any of such terms and conditions).
- any action or failure to act without justifiable cause by any Competent Authority, other than a court or tribunal (including any action or failure to act without justifiable cause by any duly authorized agent of any Competent Authority, other than a court or tribunal).
- expropriation or compulsory acquisition of the whole or any material part of the HSP's Firm System or Investor's shares in the selected bidder's Firm, except where such appropriation or compulsory acquisition is on account of contravention of law by the selected bidder's Firm or by the Investor.
- any legal prohibition on the selected bidder's Firm ability to conduct the selected bidder's Firm Business, including passing of a statute, decree, regulation or order by a Competent Authority prohibiting the selected bidder's Firm from conducting the HSP's Firm Business, other than as a result of the selected bidder's Firm failure to comply with the law or any order, Consent, rule, regulation or other legislative or judicial instrument passed by a Competent Authority.
- in relation to the selected bidder's Firm, non-performance by a counter-party under a contract relating to the selected bidder's Firm Business by reason of an event or circumstance that would constitute a Political Force Majeure Event under this Agreement, provided that breakdown of plant or equipment (unless itself caused by an Event of Force Majeure), or unavailability of funds, shall not constitute an Event of Force Majeure.

9.4.3 Effects of an Event of Force Majeure

Neither Party shall be in breach of its obligations under this Agreement (other than payment obligations) or incur any liability to the other Party for any losses or damages of any nature whatsoever incurred or suffered by that other (otherwise than under any express indemnity in this Agreement) if and to the extent that it is prevented from carrying out those

obligations by, or such losses or damages are caused by, a Force Majeure Event except to the extent that the relevant breach of its obligations would have occurred, or the relevant losses or damages would have arisen, even if the Force Majeure Event had not occurred (in which case this Clause shall not apply to that extent).

9.4.4 Notice of an Event of Force Majeure

Within 20 days following the date of commencement of a Force Majeure Event, and within 15 days following the date of termination of a Force Majeure Event, any Party invoking it shall submit to the other Party reasonable proof of the nature of the Force Majeure Event and the time period for which Force Majeure Event is expected to continue and of its effect upon the performance of the Party's obligations under this Agreement and shall thereafter keep the other Party informed until such time as it is able to perform its obligations. The Parties shall use their reasonable endeavours to:

- a) overcome the effects of the Event of Force Majeure;
- b) mitigate the effect of any delay occasioned by any Event of Force Majeure, including by recourse to alternative mutually acceptable (which acceptance shall not be unreasonably withheld by either Party) sources of services, equipment, and materials; and
- c) ensure resumption of normal performance of this Agreement within 10 days following the date of termination of a Force Majeure Event and shall perform their obligations to the maximum extent practicable provided that neither Party shall be obliged to settle any strike, lock out, work stoppage, labour dispute or such other industrial action by its employees.

9.4.5 The Parties shall consult together in relation to the above matters following the occurrence of a Force Majeure Event.

9.4.6 Irrespective of any extension of time/mutually agreed suspension of work/any mutually agreed arrangement, if an Event of Force Majeure occurs and its effect continues for a period of [180] days, either the Ministry or the HSP Firm may give to the other a notice of termination. [If Ministry is paying fee during Force Majeure, then HSP Firm shall not have a termination right], which shall take effect [7] days after the tendering of the notice. If, at the end of the [7]-day period, the effect of the Force Majeure continues, the Contract shall terminate.

9.5 Annulment of Award

Failure of the successful bidder to comply with the requirements of the RFP shall constitute sufficient ground for the annulment of the award and EMD may be invoked. In event MoHFW may make the award to the next bidder who has been ranked as H2 and so on, till the award of the contract/ work order.

9.6 Indemnification & Limitation of Liability

- i. The agency (the “Indemnifying Party”) shall undertake to indemnify MoHFW (the “Indemnified Party”) from and against all claims, liabilities, losses, expenses (including reasonable attorneys’ fees), fines, penalties, taxes or damages (Collectively “Loss”) on account of bodily injury, death or damage to tangible personal property arising in favour of any person, corporation or other entity (including the Indemnified Party) attributable to the Indemnifying Party’s negligence or wilful default in performance or non-performance under this Agreement.
- ii. If the Indemnified Party promptly notifies Indemnifying Party in writing of a third-party claim against Indemnified Party that any Service provided by the Indemnifying Party infringes a copyright, trade secret or patents incorporated in India of any third party, Indemnifying Party will defend such claim at its expense and will pay any costs or damages, that may be finally awarded against Indemnified Party.
- iii. Indemnifying Party will not indemnify the Indemnified Party, however, if the claim of infringement is caused by
 - Indemnified Party’s misuse or modification of the Service.
 - Indemnified Party’s failure to use corrections or enhancements made available by the Indemnifying Party.
 - Indemnified Party’s use of the Service in combination with any product or information not owned or developed by the Indemnifying Party.
- iv. However, if any service, information, direction, specification, or materials provided by Indemnified Party or any third party contracted to it, is or likely to be held to be infringing, the Indemnifying Party shall at its expense and option either:
 - Procure the right for Indemnified Party to continue using it
 - Replace it with a non-infringing equivalent
 - Modify it to make it non-infringing.
 - The foregoing remedies constitute Indemnified Party’s sole and exclusive remedies and indemnifying Party’s entire liability with respect to infringement.
- v. The indemnities set out above, shall be subject to the following conditions:
 - The Indemnified Party as promptly as practicable informs the Indemnifying Party in writing of the claim or proceedings and provides all relevant evidence, documentary or otherwise.
 - The Indemnified Party shall, at the cost of the Indemnifying Party, give the Indemnifying Party all reasonable assistance in the Defence of such claim including reasonable access to all relevant information, documentation, and personnel provided that the Indemnified Party may, at its sole cost and expense, reasonably participate, through its attorneys or otherwise, in such Defence.
 - If the Indemnifying Party does not assume full control over the defence of a claim as provided in this Article, the Indemnifying Party may participate in such defence at its sole cost and expense, and the Indemnified Party will have the right to defend the claim in such manner as it may deem appropriate, and the cost and expense of the Indemnified Party will be included in Losses.

- The Indemnified Party shall not prejudice, pay, or accept any proceedings or claim, or compromise any proceedings or claim, without the written consent of the Indemnifying Party.
- All settlements of claims subject to indemnification under this Clause will:
 - be entered into only with the consent of the Indemnified Party, which consent will not be unreasonably withheld and include an unconditional release to the Indemnified Party from the claimant or plaintiff for all liability in respect of such claim; and
 - include any appropriate confidentiality agreement prohibiting disclosure of the terms of such settlement.
 - the Indemnified Party shall account to the Indemnifying Party for all awards, settlements, damages, and costs (if any) finally awarded in favour of the Indemnified Party which are to be paid to it in connection with any such claim or proceedings.
 - the Indemnified Party shall take steps that the Indemnifying Party may reasonably require to mitigate or reduce its loss because of such a claim or proceedings.
 - if the Indemnifying Party is obligated to indemnify an Indemnified Party pursuant to this Article, the Indemnifying Party will, upon payment of such indemnity in full, be subrogated to all rights and defences of the Indemnified Party with respect to the claims to which such indemnification relates; and
 - if a Party makes a claim under the indemnity set out above in respect of any Loss or Losses, then that Party shall not be entitled to make any further claim in respect of that Loss or Losses (including any claim for damages).
- The liability of either Party (whether in contract, tort, negligence, strict liability in tort, by statute or otherwise) for any claim in any manner related to this Agreement, including the work, deliverables or Services covered by this Agreement, shall be the payment of direct damages only which shall in no event exceed one time the total contract value payable under this Agreement. The liability cap given under this Clause shall not be applicable to the indemnification obligations set out above.
- In no event shall either party be liable for any consequential, incidental, indirect, special, or punitive damage, loss, or expenses (including but not limited to business interruption, lost business, lost profits, or lost savings) nor for any third-party claims (other than those set-forth in above) even if it has been advised of their possible existence.
- The allocations of liability in this Section represent the agreed and bargained-for understanding of the parties and compensation for the Services reflects such allocations. Each Party has a duty to mitigate the damages and any amounts payable under an indemnity that would otherwise be recoverable from the other Party pursuant to this Agreement by taking appropriate and commercially reasonable actions to reduce or limit the amount of such damages or amounts.

9.7 Liquidated Damage

In the event of the Bidder's failure to submit the Guarantees and Documents and provision the infrastructure as per schedule specified in this RFP, MoHFW may at its discretion withhold any payment until the completion of the contract. MoHFW may also deduct from the payment due to the Bidder as agreed, liquidated damages to the sum of 0.5% of the contract price of the corresponding milestone payment of the delayed / undelivered services/monthly instalment for every week of delay or part of a week, subject to the maximum value of the Liquidated Damages being not more than 10% of the value of corresponding milestone payment of the delayed / undelivered services/monthly instalment. This right to claim any liquidated damages shall be without prejudice to other rights and remedies available to MoHFW under the contract and law. Liquidated damages shall not be imposed for the period of delay solely attributable to MoHFW.

9.8 Fraud and Corrupt Practices

The bidder and their respective officers, employees, agents, and advisers shall always observe the highest standard of ethics during the selection process. Notwithstanding anything to the contrary contained in this RFP, MoHFW shall reject a bid without being liable in any manner whatsoever to the bidder, if MoHFW determines that the bidder has, directly or indirectly or through an agent, engaged in corrupt practice, fraudulent practice, coercive practice, undesirable practice, or restrictive practice (collectively the "prohibited practices") in the selection process. In such an event, MoHFW shall, without prejudice to its any other rights or remedies, forfeit and appropriate the EMD / performance security as mutually agreed genuine pre-estimated compensation and damages payable to MoHFW for, inter alia, time, cost, and effort of MoHFW, regarding the RFP, including consideration and evaluation of such bidder's bid.

Without prejudice to the rights of MoHFW under the above sections other clauses and the rights and remedies which MoHFW may have under the Letter of Intent (LoI) or the contract/ work order, if a bidder is found by MoHFW to have directly or indirectly or through an agent, engaged or indulged in any prohibited practices during the selection process, or after the issue of the LoI or the execution of the contract/ work order, such bidders shall not be eligible to participate in any tender or RFP issued by MoHFW for a minimum period of 3 (three) years from the date such bidder is found by MoHFW to have directly or through an agent, engaged or indulged in any prohibited practices, as the case may be.

For the purposes of this section, the following terms shall have the meaning hereinafter respectively assigned to them:

"Corrupt practice" means

the offering, giving, receiving or soliciting, directly or indirectly, of anything of value to influence the action of any person connected with the selection process (for avoidance of doubt, offering of employment to or employing or engaging in any manner whatsoever, directly or indirectly, any official of MoHFW who is or has been associated in any manner, directly or indirectly with the selection process before or after the execution thereof, at any time prior to the expiry of one year from the date such official resigns or retires from or otherwise ceases to be in the service of MoHFW, shall be deemed to constitute influencing the actions of a person

connected with the selection process); or

engaging in any manner whatsoever, whether during the selection process or after the execution of the contract/ work order any person in respect of any matter relating to the project or the contract/ work order, who at any time has been or is a legal, financial, or technical consultant / adviser of MoHFW in relation to any matter concerning the project.

“Fraudulent practice” means a misrepresentation or omission of facts or disclosure of incomplete facts, to influence the selection process.

“Coercive practice” means impairing or harming or threatening to impair or harm, directly or indirectly, any person or property to influence any person’s participation or action in the selection process.

“Undesirable practice” means

establishing contact with any person connected with or employed or engaged by MoHFW with the objective of canvassing, lobbying or in any manner influencing or attempting to influence the selection process; or

having a conflict of interest; and

“Restrictive practice” means forming a cartel or arriving at any understanding or arrangement among bidders with the objective of restricting or manipulating a full and fair competition in the selection process.

9.9 Publicity

Any publicity of the project by the selected bidder should be done only with the prior written permission of the MoHFW.

Annexures

Annexure 1: Pre-Qualification Criteria compliance checklist

S. No.	Criteria	Proof Required	Compliance (Yes / No) with reference page no. in proposal
1.	Cover letter of the bid	Cover letter signed by an authorised signatory of the bidder as per Form 1 of Annexure 5 of this RFP.	
2.	Valid authorisation details of the person(s) signing the bid document as on date of bid submission	Power of Attorney or Authorisation Letter or Certified copy of Board Resolution (This may be submitted in bidder's own format or Form 5 of Annexure 5 of this RFP)	
3.	a. Should be an organization registered under the provisions of the Indian Companies Act, 2013/ Companies Act, 1956 or a partnership firm registered under the Indian Partnership Act, 1936 or the Limited Liability Partnerships Act, 2008 or company registered under Society Act b. Registered with the Income Tax Authorities c. Registered with GST Network d. Should have been operating for the last 10 years as on date of bid submission	a. Certificate of Incorporation (Refer Form 6 of Annexure 5 of this RFP) b. Copy of PAN Card c. Copy of GST registration certificate d. Letter from Statutory Auditor/CA	

S. No.	Criteria	Proof Required	Compliance (Yes / No) with reference page no. in proposal
4.	The bidder (prime bidder in case of consortium) should have: An average annual turnover of at least INR 90 Crores for the last 3 audited financial years. (FY 2020-21, 2021-22 & 2022-23).	A certificate duly certified by the Statutory Auditor / Chartered Auditor of the bidder mentioning the average annual turnover along with audited balance sheet and P/L statement.	
5.	The bidder (any member in case of consortium) should have atleast 50 call centre agents deployed on a single project for atleast a year in last three years as on last date of bid submission.	An undertaking from the Authorized Signatory as per Form 4 of Annexure 5 of this RFP AND Copy of WO/Agreement clearly mentioning the no. of Call Centre Agents Deployed.	
6.	The bidder (prime bidder in case of consortium) must have experience in last 3 years on last date of bid submission of: One similar project of not less than INR 19,00,00,000 (Similar project means 'inbound and outbound call centre services, leveraging channels such as voice, IVR, SMS, Emails, etc. in Hindi, English and minimum one other regional language for any Central /State Govt / PSU /Private Entity in India.) Annexure 5: Bid Submission Formats

Form 1: Cover Letter

[On the letterhead of the organization]

The Deputy Director General (Statistics),
Room. No. 314, 3rd Floor, Indian Red Cross Society,
Sansad Marg, New Delhi – 110011

Sub: “Mother and Child Tracking Facilitation Centre (MCTFC) for MoHFW”

Dear Sir/Madam,

Having examined the RFP, Annexures, addenda, and pre-bid clarifications, thereto, we, the undersigned, in conformity with the said RFP, offer to provide the said services on terms of reference to be signed upon the award of contract/ work order for the sum indicated as per our financial bid.

We acknowledge having received all the addenda / pre-bid clarifications to the RFP:

Addendum No.	Dated

We have read the provisions of the RFP and confirm that these are acceptable to us. We further declare that additional conditions, variations, deviations, suggestions if any, found in our bid shall not be given effect to.

We undertake, if our bid is accepted, to provide the services included in the RFP within the time frame specified, starting from the date of receipt of notification of award from MoHFW.

We agree to abide by this bid for a period of 180 days from the date of bid submission and it shall remain binding upon us and may be accepted at any time before the expiration of that period.

We agree to execute a contract or accept a work order in the form to be communicated by MoHFW, incorporating all terms and conditions with such alterations or additions thereto as may be necessary to adapt such contract/ work order to the circumstances of the standard and notice of the award within time prescribed after notification of the acceptance of this bid.

We agree that if any day during the entire project duration, our act breaches the RFP terms and conditions or we express our inability to execute the project, MoHFW reserves all the rights to terminate the contract / work order and appropriate penalty will be borne on us.

We hereby confirm that we do not have any conflict of interest in accordance with the RFP.

It is certified that the information furnished herein and as per the bid / documents / clarifications submitted is true and correct and nothing has been concealed or tampered with. We have gone through all the conditions of RFP and are liable to any punitive action for furnishing false information / documents.

We have read the provisions of the RFP, Annexure thereto and addenda. We understand that any additional conditions, deviations, suggestions, assumptions, if any, found in our bid shall not be given effect to and shall not be binding on MoHFW in case our bid is accepted.

We understand that the project is on an outsourced basis and any component or service required for completion of the project will be made available by us to MoHFW, without any additional financial implication, except those explicitly mentioned in the RFP.

We confirm that we will be responsible for the security of all the data captured or shared with our system. We further undertake that both our company (including subsidiaries and parent companies) and directors are directly or indirectly not managing related work which conflict with the operations of the mother and child tracking facilitation centre (MCTFC).

We understand that if the details given in support of claims made above are found to be untenable or unverifiable, or both, our bid may be rejected without any reference to us. We also understand that if there is any change in our eligibility criteria status till the date of award of contract, it is our responsibility to inform MoHFW of the changed status at the earliest.

We further clearly understand that MoHFW is not obliged to inform us of the reasons for rejection of our bid.

Form 10: Format for Non-Disclosure Agreement

(To be submitted by successful bidder post issue of Work Order)

This Non-Disclosure Agreement ("Non-Disc") is made and entered into ____ day of ____ month ____ year (effective date) by and between MoHFW ("Department") and ____ ("Company")

Whereas, Department and Company have entered into an Agreement _____ effective _____ for _____; AND

Whereas each party desires to disclose to the other party certain information in oral or written form, which is proprietary and confidential to the disclosing party, ("CONFIDENTIAL INFORMATION"). The confidentiality obligations shall survive the termination of this Contract.

NOW, THEREFORE, in consideration of the foregoing and the covenants and agreements contained herein, the parties agree as follows:

Definitions. As used herein:

The term "Confidential Information" shall include, without limitation, all information and materials, furnished by either Party to the other in connection with beneficiaries/health workers users/ persons/ customers data, products and/ or services, including information transmitted in writing, orally, visually, (e.g. video terminal display) or on magnetic or optical media, and including all proprietary information, customer lists, trade secrets, trade names or proposed trade names, methods and, licensed document know-how, ideas, concepts, and other intellectual property relating to the disclosing party's data, computer database, products and/ or services. Results of any tests, sample surveys, analytics, data mining exercises or usages etc. carried out by the receiving party in connection with the Department's Information including beneficiaries/ health workers/ users/ persons/ customers personal or sensitive personal information as defined under any law for the time being in force shall also be considered Confidential Information.

The term "Department" shall include the officers, employees, agents, consultants, contractors, and representatives of the Department.

The term, "Company" shall include the directors, officers, employees, agents, consultants, contractors, and representatives of Company, including its applicable affiliates and subsidiary companies.

Protection of Confidential Information. With respect to any Confidential Information disclosed to it or to which it has access, Company affirms that it shall:

Use the Confidential Information as necessary only in connection with Project and in accordance with the terms and conditions contained herein

Maintain the Confidential Information in strict confidence and take all reasonable steps to enforce the confidentiality obligations imposed hereunder, but in no event take less care

with the Confidential Information that the parties take to protect the confidentiality of its own proprietary and confidential information and that of its clients.

Not to make or retain copy of any beneficiaries/ health workers/ users/ persons/ customers database, Bids developed by or originating from Department or any of the prospective clients of Department except as necessary, under prior written intimation from Department, in connection with the Project, and ensure that any such copy is immediately returned to Department even without express demand from Department to do so

Not disclose or in any way assist or permit the disclosure of any Confidential Information to any other person or entity without the express written consent of the other party; and

Return to the other party, or destroy, at Department's discretion, any and all Confidential Information disclosed in oral/ printed form or another permanent record, or in any other tangible form (including without limitation, all copies, notes, extracts, analyses, studies, summaries, records and reproductions thereof) immediately upon the earlier to occur of (i) expiration or termination of either party's engagement in the Project, or (ii) the request of the other party therefore.

Not to discuss with any member of the public, media, press, or any other person about the nature of arrangement entered between Department and Company or the nature of services to be provided by the Company to the Department.

Onus - Company shall have the burden of proving that any disclosure or use inconsistent with the terms and conditions hereof falls within any of the following exceptions.

Exceptions - These restrictions as enumerated in this Agreement shall not apply to any Confidential Information:

Which is independently developed by Company or lawfully received from another source free of restriction and without breach of this Agreement; or

After it has become generally available to the public without breach of this Agreement by Company; or

Which at the time of disclosure to Company was known to such party free of restriction and evidenced by documentation in such party's possession; or

Which Department agrees in writing is free of such restrictions.

Which is received from a third party not subject to the obligation of confidentiality with respect to such Information

Remedies - Company acknowledges that (a) any actual or threatened disclosure or use of the Confidential Information by Company would be a breach of this agreement and may cause immediate and irreparable harm to Department; (b) Company affirms that damages from such disclosure or use by it may be impossible to measure accurately; and (c) injury sustained by Department may be impossible to calculate and remedy fully. Therefore, Company acknowledges that in the event of such a breach, Department shall be entitled to specific performance by Company of Company's obligations contained in this Agreement. In addition, the Company shall indemnify the Department of the actual and liquidated damages which may be demanded by the Department. Moreover, the Department shall be entitled to recover all costs (including reasonable attorneys' fees) which it or they may incur

in connection with defending its interests and enforcement of legal rights arising due to a breach of this agreement by the Company.

Need to Know. Company shall restrict disclosure of such Confidential Information to its employees and/ or consultants with a need to know (and advise such employees of the obligations assumed herein), shall use the Confidential Information only for the purposes set forth in the Agreement, and shall not disclose such Confidential Information to any affiliates, subsidiaries, associates and/ or third party without prior written approval of the disclosing party.

Intellectual Property Rights Protection - No license to a party, under any trademark, patent, copyright, design right, mask work protection right, or any other intellectual property right is either granted or implied by the conveying of Confidential Information to such party.

No Conflict - The parties represent and warrant that the performance of its obligations hereunder does not and shall not conflict with any other agreement or obligation of the respective parties to which they are a party or by which the respective parties are bound.

Authority - The parties represent and warrant that they have all necessary authority and power to enter into this Agreement and perform their obligations hereunder.

Dispute Resolution - If any difference or dispute arises between the Department and the Company in connection with the validity, interpretation, implementation, or alleged breach of any provision of this Agreement, any such dispute shall be referred to MoHFW, MoHFW

The arbitration proceedings shall be conducted in accordance with the (Indian) Arbitration & Conciliation Act, 1996 & amendments thereof.

The place of arbitration shall be the New Delhi

The arbitrator's award shall be substantiated in writing and binding on the parties.

The proceedings of arbitration shall be conducted in English language.

The arbitration proceedings shall be completed within a period of 180 days from the date of reference of the dispute to arbitration.

Governing Law - This Agreement shall be interpreted in accordance with and governed by the substantive and procedural laws of India and the parties hereby consent to the exclusive jurisdiction of Courts and/ or Forums situated at New Delhi, India only.

Entire Agreement. This Agreement constitutes the entire understanding and agreement of the parties, and supersedes all previous or contemporaneous agreement or communications, both oral and written, representations and understandings among the parties with respect to the subject matter hereof.

Amendments - No amendment, modification and/ or discharge of this Agreement shall be valid or binding on the parties unless made in writing and signed on behalf of each of the parties by their respective duly authorized officers or representatives.

Binding Agreement - This Agreement shall be binding upon and inure to the benefit of the parties hereto and their respective successors and permitted assigns.

Severability - It is the intent of the parties that in case any one or more of the provisions contained in this Agreement shall be held to be invalid or unenforceable in any respect, such provision shall be modified to the extent necessary to render it, as modified, valid and enforceable under

applicable laws, and such invalidity or unenforceability shall not affect the other provisions of this Agreement.

Waiver - If either party should waive any breach of any provision of this Agreement, it shall not thereby be deemed to have waived any preceding or succeeding breach of the same or any other provision hereof.

Survival - Both parties agree that all their obligations undertaken herein with respect to Confidential Information received pursuant to this Agreement shall survive till perpetuity even after any expiration or termination of this Agreement.

IN WITNESS HEREOF, and intending to be legally bound, the parties have executed this Agreement to make it effective from the date and year first written above.

Pre-Contract Integrity Pact

Between

Ministry of Health and Family Welfare, Government of India

And

“-----”

Preamble

For overseeing and Implementation of Pre-Contract Integrity Pact for this Project, two Independent External Monitors (IEMs) have been appointed after approval of the competent authority. The details of the IEMs are as follows:-

1. Shri Ved Prakash Yajurvedi, (E-33, Ayudh Vihar, Plot No. 3, Sector-13, Dwarka, New Delhi-110075), vpjayurvedi@gmail.com
2. Shri Anup Kumar Nayak, (1865/1866, Nuasahi, Nayapalli, Bhubaneshwar – 751012) anupnaya@gmail.com

General

1. This pre-bid pre-contract Agreement (hereinafter called the Integrity Pact) is made on.....the day of the month of yearbetween on one hand, the President of India, acting through **Deputy Director General (Statistics)**, Ministry of Health and Family Welfare, Government of India (hereinafter called the “BUYER” which expression shall mean and include, unless the context otherwise requires, his successors in office and assigns) of the First Part and M/s -----represented by Shri -----, <designation> (hereinafter called the “BIDDER/SELLER” which expression shall mean and include, unless the context otherwise requires, his successors and permitted assigns) of the Second Part.
2. WHEREAS the BUYER proposes to appoint Helpdesk Service Provider for Augmentation, Operationalization, Management & Ongoing Support of Mother and Child Tracking Facilitation Centre and the Bidder/Seller is willing to offer/has offered the stores and
3. WHEREAS the BIDDER is a private company/public company/partnership/registered, constituted in accordance with the relevant law in the matter and the BUYER is a Ministry of the Government of India performing its functions on behalf of the President of India.

Section 1 - Commitments of the Client.

1. The Client commits itself to take all measures necessary to prevent corruption and to observe the following principles:-

- a. No employee of the Client, personally or through family members, will in connection with the tender for, or the execution of a contract, demand, take a promise for or accept, for self or third person, any material or immaterial benefit which the person is not legally entitled to.
 - b. The Client will during the tender process treat all Bidder(s) with equity and reason. The Client will in particular, before and during the tender process, provide to all Bidder(s) the same information and will not provide to any Bidder(s) confidential/additional information through which the Bidder(s) could obtain an advantage in relation to the process or the contract execution.
 - c. The Client will exclude from the process all known prejudiced persons.
2. If the Client obtains information on the conduct of any of its employees which is a criminal offence under the IPC/PC Act, or if there be a substantive suspicion in this regard, the Client will inform the Chief Vigilance Officer and in addition can initiate disciplinary actions.

Section 2- Commitments of the Bidder(s)

1. The Bidder(s) commit himself to take all measures necessary to prevent corruption. They commit themselves to observe the following principles during his participation in the tender process and during the contract execution.
 - a. The Bidder(s) will not, directly or through any other persons or firm, offer promise or give to any of the Client's employees involved in the tender process or the execution of the contract or to any third person any material or other benefit which he/she is not legally entitled to, in order to obtain in exchange any advantage or during the execution of the contract.
 - b. The Bidder(s) will not enter with other Bidders into any undisclosed agreement or understanding, whether formal or informal. This applies in particular to prices, specifications, certifications, subsidiary contracts, submission or non-submission of bids or any other actions to restrict competitiveness or to introduce cartelization in the bidding process.
 - c. The Bidder(s) will not commit any offence under the relevant IPC/PC Act; further the Bidder(s) will not use improperly, for purposes of competition or personal gain, or pass on to others, any information or document provided by the Client as part of the business relationship, regarding plans, technical proposals and business details, including information contained or transmitted electronically.
 - d. The Bidder(s) will, when presenting his bid, disclose any and all payments they have made, is committed to or intends to make to agents, brokers or any other intermediaries in connection with the award of the contract.
2. The Bidder(s) will not instigate third persons to commit offences outlined above or be an accessory to such offences.

Section 3: Disqualification from tender process and exclusion from future contracts

If the Bidder(s), before award or during execution has committed a transgression through a violation of Section 2, above or in any other form such as to put his reliability or credibility in question, the Client is entitled to disqualify the Bidder(s) from the tender process or during the

tenure of the contract take action as per the procedure recommended by the CVC.

Section 4: Compensation for Damages

1. If the Client has disqualified the Bidder(s) from the tender process prior to the award according to Section 3, the Client is entitled to demand and recover the damages equivalent to Earnest Money Deposit.
2. If the Client has terminated the contract according to Section 3, or if the Client is entitled to terminate the contract according to Section 3, the Client shall be entitled to demand and recover from the Bidder liquidated damages of the Contract value or the amount equivalent to Performance Bank Guarantee.

Section 5: Previous Transgression

1. The Bidder declares that no previous transgressions occurred in the last three years with any other company in any country conforming to the anti-corruption approach or with any other public sector enterprise in India that could justify his exclusion from the tender process.
2. If the Bidder makes incorrect statement on this subject, they can be disqualified from the tender process for action can be taken as per the procedure mentioned in "Guidelines on Banning of business dealings".

Section 6: Equal treatment of all Bidders

1. The Bidder(s) undertake(s) to demand from all Bidders a commitment in conformity with this Integrity Pact, and to submit it to the Client before contract signing.
2. The Client will enter into agreements with identical conditions as this one with all Bidders.
3. The Client will disqualify from the tender process all Bidders who do not sign this Pact or violate its provisions.

Section 7: Criminal charges against violation Bidder(s)

If the Client obtains knowledge of conduct of a Bidder, or of an employee or a representative or an associate of a Bidder, which constitutes corruption, or if the Client has substantive suspicion in this regard, the Client will inform the same to the Chief Vigilance Officer.

Section 8: Independent External Monitor/Monitors

1. The Client appoints competent and credible independent External Monitor for this Pact.
2. The task of the Monitor is to review independently and objectively, whether and to what extent the parties comply with the obligations under this agreement.
3. The Monitor is not subject to instructions by the representatives of the parties and performs his functions neutrally and independently. They report to the MoHFW.
4. The Bidder(s) accepts that the Monitor has the right to access without restriction to all project documentation of the Client including that provided by the Bidder. The Bidder will also grant the Monitor, upon his request and demonstration of a valid interest, unrestricted and unconditional access to his project documentation. The same is applicable to

- Subcontractors. The Monitor is under contractual obligation to treat the information and documents of the Bidder(s) with confidentiality.
5. The Client will provide to the Monitor sufficient information about all meetings among the parties related to the Project provided such meetings could have an impact on the contractual relations between the Client and the Bidder. The parties offer to the Monitor the option to participate in such meetings.
 6. As soon as the Monitor notices, or believes to notice, a violation of this agreement, they will so inform the Management of the Client and request the Management to discontinue or take corrective action, or to take other relevant action. The monitor can in this regard submit non-Binding recommendations. Beyond this, the Monitor has no right to demand from the parties that they act in a specific manner, refrain from action or tolerate action.
 7. The Monitor will submit a written report to the MoHFW within 8 to 10 weeks from the date of reference or intimation to him by the Client and, should the occasion arise, submit proposals for correcting problematic situations
 8. Monitor shall be entitled to compensation on the same terms as being extended to / provided to independent Directors on the Board of MoHFW.
 9. If the Monitor has reported to the MoHFW, a substantiated suspicion of an offence under relevant IPC/PC Act, and the MoHFW has not, within the reasonable time taken visible action to proceed against such offence or reported it to the Chief Vigilance Officer, the Monitor may also transmit this information directly to the Central Vigilance Commissioner.
 10. The word 'Monitor' would include both singular and plural.

Section 9 - Pact Duration

This pact begins when both parties have legally signed it. It expires for the Bidder 10 months after the last payment under the contract, and for all other Bidders & months the contract has been awarded.

If any claim is made / lodged during this time, the same shall be binding and continue to be valid despite the lapse of this pact as specified above, unless it is discharged / determined by MoHFW.

Section 10 – Other provisions

1. This agreement is subject to Indian Law, Place of performance and jurisdiction is the Registered Office of the Client, i.e. New Delhi.
2. Changes and supplements as well as termination notices need to be made in writing. Side agreements have not been made.
3. If the Bidder is a partnership or a consortium, this agreement must be signed by all partners or consortium members.
4. Should one or several provisions of this agreement turn out to be invalid, the remainder of this agreement remains valid. In this case, the parties will strive to come to an agreement to their original intentions.

The Parties hereby sign this Integrity Pact aton this day of.....20....

Form 15: Performance Bank Guarantee

<Location, Date>

<Name>

<Designation>

<Address>

<Phone Nos.>

<Fax Nos.>

<email id>

Whereas, <<name of the supplier and address>> (hereinafter called “the bidder/supplier”) has undertaken, in pursuance of contract no. <<insert contract no.>> dated. <<Insert date>> to provide support for <<name of the assignment>> to the Ministry of Health and Family Welfare, Government of India (hereinafter called “the beneficiary”).

And whereas it has been stipulated by in the said contract that the bidder/supplier shall furnish you with a bank guarantee by a Scheduled Commercial Bank regulated under the Banking Regulation Act, 1949 for the sum specified therein as security for compliance with its obligations in accordance with the contract.

And whereas we, <<**Name of the Bank**>>, a Scheduled Commercial Bank regulated under the Banking Regulation Act, 1949 having its head/registered office at <<address of the registered office>> and having one of its office at <<address of the local office>> have agreed to give the supplier such a bank guarantee.

Now, therefore, we hereby affirm that we are guarantors and responsible to you, on behalf of the supplier, up to a total of **Rs. <<Insert Value>> (Rupees <<insert value in words>> only) and** we undertake to pay you, upon your first written demand declaring the supplier to be in default (including the violation of Integrity Pact) under the contract and without cavil or argument, any sum or sums within the limits of **Rs. <<Insert Value>>(Rupees <<insert value in words>>only)** as aforesaid, without your needing to prove or to show grounds or reasons for your demand or the sum specified therein.

We hereby waive the necessity of your demanding the said debt from the bidder/supplier before presenting us with the demand.

We further agree that no change or addition to or other modification of the terms of the contract to be performed there under or of any of the contract documents which may be made between you and the bidder/supplier shall in any way release us from any liability under this guarantee and we hereby waive notice of any such change, addition or modification.

This Guarantee shall be valid until <<Insert Date>>. Notwithstanding anything contained herein:

1. Our liability under this bank guarantee shall not exceed **Rs. <<in figures>> (Rupees <<in words>> only).**
2. This bank guarantee shall be valid up to <<insert expiry date>>.

It is a condition of our liability for payment of the guaranteed amount or any part thereof arising under this bank guarantee that we receive a valid written claim or demand for payment under this bank guarantee on or before <<*insert expiry date*>> failing which our liability under the guarantee will automatically cease.

(Authorized Signatory of Bank)

Annexure 6: Detailed Scope of work

➤ Event management

- The EMS should offer a unique solution to the problem of managing exceptional events. It should correlate and filter events from several types of IT resources and pinpoint the root cause of a problem.
- This event manager should also permit integrating custom applications with the EMS. It should be used to integrate management and general business applications to make them easier to manage. This event manager should also provide a centralized view of alarms coming from networks, servers and application in one console.
- With event filtering and correlation, multi-level managers and HAs, automatic corrective measure, the EMS should provide comprehensive event management capabilities. It should eliminate the clutter of spurious alarms and simplify the management of complex IT infrastructure.
- It should help to notify through cell phone, e-mail of various / selective events occurring in the enterprise.

➤ Software distribution

- The software distribution function should provide flexible and scalable delivery, installation, and configuration of software
- The software distribution should support customizable distribution schedules, alternate methods, heterogeneous network protocols, diverse operating systems including both push and pull distribution modes
- Compression should be supported while distributing the software across WAN
- Furthermore, its integration with the event management functions of the EMS should provide complete tracking, logging and automated correction of failures during the delivery and installation process. In addition, its integration with the security functions of the EMS should enable administrators to deliver software as per agreed terms and conditions.
- The provision should be there for implementing comprehensive and profound backup policy and data privacy compliant as per MeitY guidelines.

➤ Network and server management

- The network management function must monitor performance across heterogeneous networks from one end of the enterprise to the other
- It should proactively analyse problems to improve network performance
- The network management function should create a graphical display of all discovered resources
- The network management function should have extensive reporting facility, providing the ability to format and present data in a graphical and tabular display
- The network management function should collect and analyse the data. Once collected, it should automatically store data gathered in a database. This enterprise-wide data should be easily accessed from a central location and used to help with capacity planning, reporting and analysis

- Analysing network traffic patterns is an extremely critical component to help in troubleshooting issues related to network traffic congestion. The proposed tool should help in identifying the type of traffic flowing based on various applications and protocols for capacity analysis and providing breakup of traffic utilization on critical router interfaces. Tool should help in identifying what applications/ users are generating maximum traffic thus consuming most amount of bandwidth.
- The network management function should also provide information on performance of ethernet segments, including capacity utilization and error statistics for the segment and the top-contributing hosts, WAN links and routers.
 - Alerts should be shown on the event management map when thresholds are exceeded and should subsequently be able to inform IT Support and Full Stack Developer and notify concerned authorities using different methods such as SMS, e-mails, etc.
 - It should be able to automatically generate a notification in the event of a link failure to ensure proper handling of link related issues.
 - The proposed network fault management consoles must provide web-based topology map view from a single central console. The system should provide discovery and inventory of heterogeneous physical SNMP enabled network devices like Layer-2 and Layer-3 switches, Routers and other IP devices and do mapping of LAN & WAN connectivity with granular visibility up to individual ports level.
 - The system must deduce the root cause of the problem and in topology it should visually pinpoint a single impacting device.
 - The system must be able to 'filter-out' symptom alarms and deduce the root cause of failure in the network automatically.
 - The proposed network management system should provide a detailed business service dashboard view.
 - The system should provide an outage summary that gives a high-level health indication for each service as well as the details and root cause of any outage.
 - SLA violation alarms must be generated to notify whenever service level requirement is violated or is in danger of being violated.
- The Systems and Distributed Monitoring (Operating Systems) of EMS should be able to monitor:
 - Processors: Each processor in the system should be monitored for CPU utilization. Current utilization should be compared against user-specified warning and critical thresholds
 - File Systems: Each file system should be monitored for file system space used, which is compared to user-defined warning and critical thresholds
 - Log Files: Logs should be monitored to detect faults in the operating system, the communication sub-system and applications. The function should also analyse the files residing on the host for specified string patterns
 - System Processes: The system management function should provide real-time collection of data from all system processes. This should identify if an important process has stopped unexpectedly. Critical processes should be automatically restarted using the system management function
 - Memory: The system management function should monitor memory utilization and available swap space

- Event Log: User-defined events in the security, system and application event logs must be monitored

➤ **Reporting**

- The reporting and analysis tool should provide a ready-to-use view into the data gathered by management system and service management tools. It should consolidate data from all the relevant modules and transform it into easily accessible business-relevant information. This information should be presented in a variety of graphical formats which can be viewed interactively (slice, dice, drill down, drill through)
- The tool should allow customers to explore the real-time data in a variety of methods and patterns and then produce reports to analyse the associated business and service affecting issues.
- The presentation of reports should be in an easy-to-analyse graphical form, enabling the administrator to put up easily summarized reports to the management for quick action (customizable reports). The software should be capable of supporting the needs to custom make some of the reports as per the needs of MoHFW
- Provide historical data analysis: The software should be able to provide a timely snapshot of the required information as well as the period analysis of the same to help in projecting the demand for bandwidth in the future PRI/SIP Lines monitoring
 - The system should be able to monitor the performance of telecom services
 - The system should be able to report the various failures in the PRI/SIP lines
 - The availability of the number of channels and average availability of channels
 - Should be able to create reports on the call drop and reason for the calls drop
 - Should be able to report for any flapping issues identified in the PRI/SIP lines

➤ **Web application performance monitoring**

- The proposed solution must determine if the root cause of performance issues is inside the monitored application, in connected back-end systems or at the network layer from a single console view.
- The proposed solution must proactively monitor 100% of real user transactions, detect failed transactions, gather evidence necessary for triage and diagnosis of problems that affect user experiences and prevent completion of critical business processes.
- The proposed solution must provide deeper end-to-end transaction visibility by monitoring at a transactional level and without deploying any software at end user desktop. The solution must provide a single view that shows the entire end-to-end real user transaction and breakdown time spent within the application components, SQL statements, backend systems and external 3rd party systems.
- The proposed solution must provide real-time monitoring of resource utilization.
- The proposed solution must identify any changes to application configuration files (.xml, properties etc.), file system or application code and be able to correlate changes to application performance dynamically in production environments.
- The proposed solution must proactively identify any thread usage problems within applications and identify stalled or stuck threads. The proposed solution must also monitor web services across multiple processes.
- The proposed solution should allow access to performance data both using a Graphical User Interface (GUI) and web-based access and provide ability to monitor performance

of applications up to the method level of execution 24x7 in production environments with negligible impact on monitored application.

- The proposed solution should measure the end users' experiences based on transactions without necessitating installation of client agents / probes on end-user desktops.
- The solution must show out of the box application triage maps that allow to instantly grasp the layout of the applications in the environment visually to help identify and triage current and emerging problems.

A. Phase I Scope: Development of Enhanced Features in MCTFC Project

The MCTFC-HSP must ensure the completion of scope of work for Phase-I which includes the below mentioned activities in detail but not limited to for the development of enhanced features in MCTFC Project:

1. Revamp/Upgradation of MCTFC Architecture and Integration with KMA, NFP and PMSMA

MCTFC will be integrated with Kilkari & Mobile Academy, NFP and PMSMA and also support in the functions for improved utilization of Kilkari and Mobile Academy (K&MA) services by beneficiaries and health workers.

Installation and commissioning of complete infrastructure at project site

MCTFC-HSP need to submit the completion report on infrastructure deployed at project site.

- During this phase, the selected MCTFC-HSP shall design MCTFC setup for comprehensive operations across different channels (voice (inbound & outbound), email, MoHFW portal data, etc.) with adequate provisions for future scalability.
- The MCTFC-HSP shall provide design architecture, and same would be reviewed and approved by MoHFW. The MCTFC-HSP shall commission the MCTFC solution (hardware and software) as per the approved design. Post commissioning of MCTFC solution the MCTFC-HSP shall prepare the test cases for demonstration to MoHFW for User Acceptance Testing (UAT) getting the Go-Live.
- The same shall be reviewed by MoHFW for its comprehensiveness and use-cases and shared feedback. The MCTFC-HSP shall independently carry out the testing based on the UAT test cases, upon successful completion of the test cases; the MCTFC-HSP shall put forward a request to MoHFW for carrying out User Acceptance Testing (UAT). The UAT shall be done by representatives from MoHFW.
- Upon successful completion of UAT the MCTFC-HSP shall proceed to stabilization period. During the stabilization period the MCTFC solution shall demonstrate a) “2RC” (i.e., Reliability, Redundancy & Consistency) aspects and b) SLA compliance. Only upon successful demonstration above two pointers the solution shall be stable and shall be considered for Go-Live. Post the successful Go-live, MoHFW shall mutually decide on successful commencement of O&M start date.
- MCTFC-HSP shall ensure a dedicated physical & data storage space for the MoHFW call centre solution and operations, so that data confidentiality and security are maintained. In case of any upscale requirements i.e., w.r.t no. of operating shifts or number of operators per shift the MCTFC-HSP shall be able to seamlessly extend

services for required quantities. The cost towards additional requirements shall be paid in line with discovered in the bid.

Design, Development, Testing and Implementation of Mother and Child Tracking Facilitation Centre Solution

HSP needs to design, develop and maintain an integrated web based customized MCTFC Centre 2.0 solution with respect to the scope of work for the entire project duration. MCTFC project consisting of CRM solution, IVRS solution, CTI solution, TTS solution, Voice Loggers solution and any other software application should be developed / as per scope of work and comply with SLA. HSP may choose to enhance CRM by using the existing CRM or develop a new and customized CRM as per their solution design. HSP needs to enhance the SMS gateway with the CRM developed by them for MCTFC.

Following communication channels will be used for MCTFC operation: Service Delivery Channel	Inbound	Outbound
Voice (Helpdesk Agents)	*	✓
Voice (IVRS calls)	*	✓
SMS**	✓	✓

* Inbound calling will be received as missed call and outbound call will be made to the caller within 90 sec of receiving the call during operational hours.

**MCTFC-HSP should also make the provision of inbound SMS solution for the project. This solution should be able to handle inbound and outbound SMSs to the scale of the project. The inbound SMSs need to be reported in a prescribed format which would be further defined during FRS stage to the MoHFW for further assessment.

Go-Live of MCTFC Solution

The HSP needs to follow the indicative set of activities that needs to be undertaken as part of development and implementation of MCTFC Project for Go-Live:

- a) Preparation of FRS and get it signed off
- b) Preparation of SRS and get it signed off
- c) Sign-off on IT infrastructure setup and deployed at Project site
- d) Sign-off of MCTFC Project

Envisaged requirements for MCTFC Solution

I. Analysis

- Finalizing the detailed list of activities, scope and duration of each of the activity and detailed project plan
- Study of the existing systems which includes database, features and functionality, course structures & eligibility, accreditation system, schemes, registration SOP, screening committee guidelines, etc. to determine precise requirements of the new system.
- Detailed discussions with concerned MoHFW officials to understand the overall objectives of the assignment.
- Finalization of Project Objectives/Requirements.

- Submission of detailed Project Plan.
- Signoff on detailed project plan, activities, timelines etc. from MoHFW.

II. Design

- Detailed Requirement gathering and analysis.
- Study and analysis of existing /Similar system and include best practices in draft design.
- Carry out a System Study including SOPs, guidelines, programmes eligibility, existing systems to be replaced and with which to interact, etc. to prepare the Software Requirements Specification (SRS) and Functional Requirement Specification (FRS) document.
- Identification of technologies/platforms compatible with compatible Cloud services.
- Detailed High level and Low-level application designs.
- Information Integration and Consolidation.
- Client Sign-off for Requirement Analysis.
- HSP shall develop appropriate screen layouts and templates for the user feedback.
- Approval of prototype (design interface) developed by vendor.
- Coordination and collection of required data from MoHFW.
- Approval of the data gathered by the client department.
- Proper backup policy and Disaster Recovery Management.
- Data migration strategy.
- Comply with website security and Auditing & Logging guidelines issued by NIC, CERTIN and MoHFW, GoI.
- The applications need to follow GIGW compliance & aid in completion of certification process

III. Development

- Coding / Temporary Demo server
- Importing of data for testing
- Application Development
- Integration of proposed solution with MCTFC existing application appointed by MoHFW.
- Generation of receipts/acknowledgements.
- Automated reconciliation and generate necessary reports, etc.
- Adherence to Web Application Audit/ Compliance and Approval / Security Features
- High availability architecture with following elements:
 - a) Load balancing and Redundancy.
 - b) Elimination of single points of failure.
 - c) Detection of failures as they occur.
- Developed System Application should have multiple backend systems interfacing Capabilities.
- Rigorous testing of Developed system including Unit Testing, Integration Testing, System Testing, Functional Testing, Peak Load Testing, etc. with reports.
- Testing of developed system based upon Compliance to applicable guidelines, Assess the user objective achievement, etc.

- Completed system components for UAT
- Migration of existing data for UAT
- UAT Sign-off by MoHFW
- Modification based upon user feedback
- Migration of data to production environment
- Sign off on developed system by MoHFW

IV. Testing:

The MCTFC-HSP shall thoroughly test the system for load, quality and performance along with proper functioning at its site before deployment of the software on production environment and submit test reports to the buyer:

- a) In addition to the above, MoHFW may hire services of third party to certify the system for load, quality and performance at its own cost to ensure proper functioning of the system. The suggestions given by the third party, if any, would be mandatory for the MCTFC-HSP to implement, incorporate and execute the same.
- b) Final approval/User Acceptance of the system shall be given by MoHFW after the testing and successful implementation.
- c) The system thus developed and tested shall be hosted and maintained at NIC Data Centre by the HSP.
- d) The MCTFC-HSP shall be required to provide performance tuning parameters/configuration of the Server/OS/Application Server software on which the system would be hosted for efficient working of the MCTFC.

V. Source Code, Proprietorship and Patent

HSP will provide the latest and complete source code of the actual running software which can be compiled and deployed by MoHFW along with all the requisite software (Source Code, Libraries, IDEs, etc.). MoHFW will be the sole proprietor of the system developed and its Intellectual Property Rights, and any patents arising out the work shall be of MoHFW, and vendor will have no claim on the same.

HSP will be responsible for:

- i. Developing content like opening / closing script, SMS content, targeted campaigns etc.
- ii. Developing a Standard Operating Procedure manual for handling commonly received requests.
- iii. Standard Operating Procedures and Protocol for MCTFC prepared by the HSP may be reviewed by FIC.
 - All the equipment and solutions provided for MCTFC should be Ipv6 compliant, wherever applicable.
 - The entire infrastructure for MCTFC is to be dedicatedly used only for the MCTFC project and cannot be accessed and managed from outside facility.
 - All application should conform to the standards defined by the IT Act, DPDP Act 2023, GoI, MoHFW, MeitY,
 - At any point in time, MoHFW reserves the right to inspect the MCTFC application and HSP will have to incorporate the suggestions within a mutually agreed timeline.

VI. Deployment of New Application

The HSP will submit the deployment report mentioning clearly the new application with all its features has been deployed successfully at project site and manpower has been successfully trained on it. Deployment shall include implementation and maintenance of the developed system

- i. MCTFC-HSP shall submit ideal minimum deployment requirements for the proposed system that will be sufficient for the smooth functioning of the system without compromising the performance.
- ii. These deployment requirements should consist of minimum required virtual hardware and networking items / components that MoHFW needs to arrange for the successful installation and implementation of system.
- iii. Deployment of required system software and application shall be done by the MCTFC-HSP on Cloud server.
- iv. MCTFC-HSP need to adopt latest deployment methodologies like Agile CI/CD etc. but not limited to.

VII. Preparation of Master Data

The MCTFC-HSP shall be responsible for one time migration/porting of data from the old system after conversion as per the new design required for implementation of proposed system under the supervision of designated officers of MoHFW.

VIII. Onsite Training and Handholding over the developed System

- a) The MCTFC-HSP shall provide hands on user training to and handholding of the Helpdesk Agents, Medical Counsellor, supervisors etc and stabilization of the project including CRM, IVRS, SMS for proper functioning, management of the system along with the submission of system performance report.
- b) The Training Plan shall be mutually decided between MoHFW and the MCTFC-HSP.
- c) Training should be done appropriately to ensure.
- d) During training, user manuals for the system shall be provided by the successful MCTFC-HSP.
- e) No extra cost would be borne by MoHFW on account of this.
- f) Reporting Requirement: Report formats will be provided by MoHFW to the HSP other than the system generated reports that provides system related information. The indicative reporting requirement is mentioned below:
 - **SLA report**
 - a. System performance report
 - b. Application availability
 - c. Dialler availability
 - d. Network availability
 - e. Power availability
 - f. Manpower performance report
 - g. Availability of Helpdesk Agents
 - h. Helpdesk Agents Attendance report
 - i. Number of hours of call handling. The HSP should be able to segregate the duration of calls handled by Helpdesk Agents and IVRS.
 - j. Number of calls handled

➤ **MCTFC performance report**

- a. Performance reports generated based on the feedback of beneficiary and health workers of different states / UTs which would be called through MCTFC. These reports would be based on Key Performance Indicators (KPIs) provided by MoHFW under various thematic areas like Maternal Health, Child Health, Immunization, Family Planning, Adolescent Health etc.
- b. Beneficiary and Health worker satisfaction report.

➤ **Daily Call status report**

The call status report should contain details such as the number of calls made to ASHA, ANM and beneficiaries. It would also contain the no. of wrong calls and the percentage of correct calls which would be used to assess the data quality of RCH.

g) Post Implementation Support/Warranty (Support after signing off of UAT):

- The HSP shall get sign-off of MCTFC solution from MoHFW and submit the sign-off report. The MCTFC-HSP shall be responsible for installation, administration and maintenance of the system for the period of Warranty after successful implementation and porting of data. The warranty period should be at least 3 years after the successful implementation of the system on the production server, and should have a provision of extension
- During the Warranty period, the MCTFC-HSP shall perform all the upgrade/latest version update free of cost.

IX. Requirements and Expected Features of Proposed MCTFC Project

- i. **Browser Independent:** The system so designed and developed should be compatible with all popularly used browsers including mobile browsers.
- ii. **Software Platform:** The system should be developed using latest proprietary or stable open-source technology with Long Term Support. Source code should be well documented. MoHFW shall have the right to approve the coding practices and may ask the firm, at any time, to change full or some part of the code according to the pattern suggested.
- iii. The system should have user friendly Graphical User Interface (GUI) and should enable role-based access rights to each user. The interface needs to be developed for the users as per the FRS, URS and SRS approved by MoHFW.
- iv. The system should be so designed and developed that it should be user friendly, easy to access or navigate, and prospective stakeholders.
- v. The Page download/query response/uploads/submissions should be quick and fast.
- vi. The necessary set up and Licenses required for the Security set up should be mentioned in the SRS document prepared.
- vii. The MIS report – Drill down Reports, Matrix reports and other required reports to be developed for the System.

X. Information Security Requirements

The systems shall be designed in a way that guarantees that information is collected directly from the caller and shall only be used for the specific purpose for which it was collected

HSP will create privacy manuals with the approval of the TCC and ensure their strict adherence by the Helpdesk Agents and other personnel of HSP

The HSP shall provide the requisite network security infrastructure comprising of Firewalls, Intrusion Detection System (IDS), Intrusions Prevention System (IPS) and an Anti-Virus System, Degaussers, etc. at project site

- a. Anti-virus system and personal firewall, CAL license, updating etc. shall be managed by the HSP on all workstations in MCTFC
- b. Access to all physical locations such as server rooms and agent floor shall be restricted to authorized personnel using suitable physical and logical security measures
- c. There shall be complete and comprehensive security from unauthorized access and misuse
- d. Access to data shall be based strictly on user access rights and HSP will be responsible for any breach
- e. The system shall support encryption of data during exchange internally and with external systems. Data stored on Helpdesk Agents' systems shall also be encrypted.
- f. All data and information collected and accessed by the HSP is owned by the MoHFW and shall not be used for any purpose other than for delivering helpdesk services.
- g. The MoHFW reserves the right to appoint third parties to audit information security procedures, processes, systems put in place by the HSP at any time without giving prior notice.

XI. Monitoring and Performance Management

- a) All the inbound and outbound calls at the MCTFC should be automatically recorded and provided with a docket number for each call for future reference and monitoring purposes. This database shall be accessible to users (including MoHFW key officials), based on role and will help in performing day-to-day operations of the MCTFC. It will also be used for generating MIS reports.
- b) End users (HA's, Medical Counsellor) incidents logged in MCTFC system should be managed by the HSP.
- c) MCTFC solution should provide MIS reports like pending calls, abandoned calls, average time in queue for each type of service, trends, call utilization, classification wise problems etc. MIS report formats will be finalized in consultation with the MoHFW.
- d) The solution should also generate reports on various performance parameters to review the effectiveness and efficiency of MCTFC such as:
 - i. Time Frames
 - ii. First Call Resolution
 - iii. MTTR (Mean Time to Resolution) etc.
- e) MCTFC application should have a provision to generate reports to ensure monitoring the SLAs for the project.
- f) Based on the performance reports submitted by the HSP on periodic basis, the Technical Coordination Committee (TCC) will assess the performance of the HSP and may suggest in the revision of MCTFC operational requirements in terms of number of records to be validated / seats / languages/ AHT etc.

- g) Comment facility on completed calls should also be there and sequential log should be depicted during the call for referring of the timing / contents / consultation in past conversation.

XII. Operation and Maintenance support:

The HSP shall be responsible for the following but not limited to:

- Identify and execute training requirements for successful execution of integrated system.
- Creations of necessary documents and User Manual for training.
- Support in handover of system to MoHFW.
- Support on Training / Demo as and when required.
- Warranty Maintenance
- Annual Maintenance of system
- Designing interface/ mechanism for Mobile based application

XIII. Overarching IT Strategy & Compliance Framework of MoHFW Compliance and Monitoring Audits

- Cybersecurity Compliances
- I and EMR Guidelines
- STQC/QCI/Others Certification
- Cloud Policy Monitoring
- SLA Monitoring and Tracking
- MDDR Standards
- Compliance in accordance with LGD Codes
- Cybersecurity Compliances
- GIGW compliance for web application if development of enhanced features needs to be implemented in MCTFC Solution is required.

Note: Features discussed above are indicative. It does not limit MCTFC-HSP to give more features as per best practices elsewhere. Any other activity required to complete the scope of the project will also be the responsibility of the HSP and it shall be performed by HSP at no extra cost to MoHFW.

XIV. Required key features of CRM Application

Some of the features that the HSP needs to consider for the CRM component are provided below. However, these features are only illustrative and not exhaustive and would be finalized at the time of requirement analysis exercise to be carried out by the HSP.

- i. The customized CRM should be a web based/mobile solution with seamless integration to the other tools such as Dialler, MCTFC Portal, IVRS, CTI, SMS Gateway etc.
- ii. It should have integration with RCH for fetching data for validation and pushing back the validated data.
- iii. Provide a single view to the team deployed by the HSP for Solution for all the relevant functions of the MCTFC.
- iv. Complete management of maternal / child service sets for both incoming and outgoing calls from the MCTFC.

- v. For all inbound calls, a separate caller profile needs to be created in the CRM which can be referenced based on the contact number, unique ID.
- vi. Customized out-bound call validation interface with all the necessary details available on screen with clear step-by-step validation steps and necessary pop ups for validation of key columns based on business rules.
- vii. Call back scheduling to ensure maximum coverage on call-out services.
- viii. Integration of CRM with voice /call logger tool
- ix. Should have customizable HA prompts. The pop-up message that will be prompted to the HA while on call should be customizable as per requirements of MoHFW.
- x. Skill based routing based on the following as per business rules:
 - Data-driven routing (based on information stored in database systems)
 - HA profile / skills based
 - HA groups with necessary skill set
 - Last HA / relationship-based (delivers interaction to specific agents, such as the last HA who interacted with health worker)
 - Routing to maintain overall service level specified for MCTFC (route interactions based on service level defined for several types of services)
 - Service priority routing (assigned priority, age of interaction)
- xi. Build and customize routing strategies through easy-to-use point-and-click GUI workflow designers.
- xii. Multiple campaign creation depending on different beneficiaries/ASHAs/ANMs group focus as per MoHFW requirement.
- xiii. Uniform call distribution to various HAs across campaigns and services.
- xiv. CRM integration with IVRS to enable customized screen view to Have depending on caller response given through IVRS.
- xv. CRM should be integrated with SMS gateway to generate campaign-based SMS for awareness creation depending on MoHFW requirements.
- xvi. Real-time monitoring and live reporting with remote access availability at the secondary control room at MoHFW.
- xvii. The Solution data should be updated on a daily basis through the web service in RCH application.
- xviii. Conferencing and chat facility for MCTFC team deployed by the HSP.
- xix. Content management / knowledge repository (i.e., both standard and temporary question bank) with a robust search engine to ensure efficient retrieval of information availability for the HA.
- xx. Collaborative knowledge management module with role-based logins which will act as a collaboration tool for discussion between HSP, FIC and MoHFW. Also, the tool should define the workflow for approval of responses to new queries faced by HA before it is added to standard question bank.
- xxi. Single interface for management of resources
- xxii. After minimum time-out period automatic role re-assignment of idle inbound call HAs to outbound call HA roles with the necessary access controls
- xxiii. Call quality monitoring
- xxiv. HA scoring (by defining KPIs).
- xxv. Lodging of grievance/L2 cases in the MoHFW system, close looping of the cases as & when required, reports as per MoHFW formats periodically.

- xxvi. For all service requests and complaints, a distinct identification or ticket number will be created and monitored until they are resolved.
- xxvii. When submitting a complaint or request, it is advisable to send an SMS to the number of the person who called, featuring a distinct identification or ticket number. SMS also need to be sent to the callers to provide useful information/URLs to access – eligibility portal, informational videos, etc.
- xxviii. Has should be able to log and track each ticket. Information of the escalated tickets should be made available as and when required by MoHFW.
- xxix. It should be noted that the software should be capable of meeting any other demand by MoHFW that is not clearly listed in the above scope of work relating to CRM & software solution. For example, adding any L1 omnichannel assistance such as chats, automation emails, social media help, and so on.

XV. *Required key features of IVRS*

Some of the key features of IVRS would include:

- i. IVRS should be scalable and provide ease of integration with the other components of MCTFC solution.
- ii. IVRS should provide option to the caller for selection of language and respond to the caller in the requested language.
- iii. IVRS shall have a GUI based tool to develop call trees / applications, configure customer types, configure messages based on campaigns, caller group identification etc.
- iv. Caller may skip menu by pressing the necessary response. At any time during the call the caller may be transferred to the Helpdesk Agent by pressing a pre-defined number.
- v. Music on hold and ability to upload specific recordings.
- vi. The HSP is responsible for creating the IVR tree structure in collaboration with MoHFW while following their guidance and obtaining approval. MoHFW reserves the right to recommend modifications or personalization's to the IVR tree structure, which HSP must implement within 15 business days without any additional fees.
- vii. The HSP must have the capability to set up an additional language in the IVR if requested by MoHFW.
- viii. The HSP must possess the capability to set up essential messages on the IVR system during the wait time, without imposing additional charges. MoHFW shall approve the message's content and duration.
- ix. IVRS should be integrated with the CRM and profiles of previous callers can be referenced through their contact number, unique ID, ANM / ASHA worker ID etc. based on caller input
- x. IVRS should be able to retrieve HA availability from Automatic Call Distributor (ACD) and announce expected caller's queue waiting time and queue length
- xi. Provide automated responses outside of working hours (based on business rules defined by MoHFW)

XVI. *Required Key features of ACD (Automatic Call Distributor)*

Some of the key features of ACD would include:

- I. ACD should handle high-volume calls efficiently
- II. ACD should integrate seamlessly with the IVRS and PBX
- III. Automated dialling modes with

- i. Algorithm based dialling
 - ii. Progressive dialling
 - iii. Rule-based dialling
 - iv. Least Cost Routing to ensure maximum connects and minimum Helpdesk Agent idle time.
- IV. ACD tones and announcement requirements:
 - i. Record new announcements from a pre-recorded file
 - ii. Record new announcements by speaking into a microphone
 - iii. Play flash announcements i.e., short messages played to HA at beginning of call to identify call by region or service type
 - iv. Play intelligent delay announcements i.e., provides the caller an estimate of how long before the call will be answered
 - v. Play standard delay announcements
 - vi. Define maximum time (trigger time) before standard delay announcement plays (able to define different times per business unit)
 - vii. Define delayed time (trigger time) before normal announcements
 - viii. Provide music to callers waiting in queue
 - ix. Provide HAs with personal announcements on skill-based routing of calls
- V. Queue optimization, allowing the caller the option to be called back
- VI. Abandoned call recovery, to determine the contact number of a missed / abandoned call
- VII. ACD should also have necessary monitoring and reporting capabilities for supervision and monitoring.

XVII. Required Key features of Voice Logger:

Some of the key features of Voice Logger would include:

- i. 100% automatic call recording
- ii. Optimal Compression Techniques should be used
- iii. Logger should support multiple format support (mp3, wav etc.)
- iv. Recording should be sharable amongst HSP personnel and MoHFW through email, bulk transfer for supervisory requirements
- v. Ability to search through call details to locate specific calls as well as matching records
- vi. Flexible and easy to implement and integrate with other tools of MCTFC.

XVIII. Required Key features for Reporting:

HSP should provide all the system generated reports that are applicable to monitor the SLAs for the project. Reports to provide evidence of SLAs on a monthly/quarterly basis to be submitted to MoHFW like:

- i. Component based reports
- ii. System based reports. Performance based reports. System should be able to generate reports to aid operational efficiency like:
 - Most frequent query analysis to create IVRS self-service module, if required for MoHFW.
 - Analysis of queries based on region, call resolution time, first / second level resolution, language chosen by beneficiaries/ASHAs/ANMs for interaction etc.

- HA-wise / HA group wise activity reports (both real-time and historical): login, logout time, idle time, average speed of answer, average handling time, number of dropped calls, number of unresolved queries, number of queries escalated to next level, average or total number of free agents in each group, efficiency of each agent or agent group etc.
- Multi-Channel Queue Analysis reports: queue analysis for each channel in terms of total queries per channel, query resolution time for each channel, average or total or maximum queuing time per channel etc.
- iii. Call analysis: Number of calls answered, number of calls abandoned, average and total call duration for different HAs / groups. Capability of exporting reports into various formats such as Excel, Word, plain text etc.

XIX. Required Key features of Multi-Channel Communication:

Some of the key features of Multi-Channel Communication would include:

- i. Universal multi-channel communication which will include voice calls, voicemail, IVR, SMS.
- ii. Handle multi-channel communication through single user interface.
- iii. Standard business processes for handling queries regardless of the initiating channel.
- iv. Integrate queues for incoming queries from multiple channels and ensure optimum response time regardless of the originating channel for the query.
- v. Enable / disable a specific channel according to set of rules. Solution should have the capability of including webchat, web-call backs etc. as future requirements.
- vi. Shift HA groups from one channel to another depending on the queue load from different communication channels.
- vii. Any query received in the form of e-mail / any other document etc. should be stored in the CRM.

XX. Required Key features of CTI

Some of the key features of CTI would include:

- i. The CTI functionality shall support relevant screen pop-ups on the HA's screen based on CLI, ANI (Automatic Number Identification), DNIS (Dialled Number Identification Sequence)
- ii. The CTI shall be suitably integrated with the CRM and other applications used by the HSP to send / receive data which needs to be populated on HA's screen and update the IVRS usage details into the CRM as the beneficiary / health worker traverses through the IVRS and reaches an HA
- iii. The CTI shall enable a computer application to take control of the call flow inside the Switch / EPABX and allow the computer application to decide the most suitable action / HA for an incoming call

The CTI link shall pass events and information of HA states and changes in them and incoming calls to the computer applications.

XXI. Required Key features of Automated Speech Recognition (ASR)

- i. Automated Speech Recognition (ASR) is the translation of spoken words into text. The system should be able to convert the voice over phone into text which can be used to identify the person

- ii. The system should be able to integrate with the application software to records the details of the users
- iii. The system should be able to recognize the voice command and convert the voice to text for getting information related to schemes and services
- iv. The system should be able to detect and comprehend the voice of Indian population in the languages mentioned in this RFP document.

XXII. *Required Key features of Text to Speech (TTS)*

- i. Text-to-Speech (TTS) system converts normal language text into speech; other systems render symbolic linguistic representations like phonetic transcriptions into speech.
- ii. Quality of text to speech should be comprehensible and understandable by the Indian population.
- iii. The TTS software should integrate with the IVRS system as per the workflow requirement.
- iv. TTS software should support multiple regional languages as mentioned in the RFP document and other regional languages if required for the project.

XXIII. *Required key feature of Call Centre Solution*

All components of call centre software (ACD, IVR, Dialler, call recording etc.) should be able to integrate with each other.

Technical Specifications for call centre software:

- The system shall be a converged communication system and shall be based on SIP Communication with Server & Gateway architecture for providing modularity and ease of expansion. The system shall be capable of supporting both IP based hard phones as well as PC based soft phones.
- The call processing and signalling of the offered system shall be based on open standards. No proprietary protocols shall be used for these components.
- Call Handling: SIP based call centre software should provide complete call handling, including call routing, queuing, third-party call control, transferring, conferencing, and agent state tracking to improve customer interaction management.
- Dial Plan Support: Features dial plan support enterprise-wide communications and collaborations for effective customer service.
- Supervisory Tools: It includes silent monitoring, whisper coaching and supervisor intrusion with presence information of Agents and Supervisor.
- Single Point of Control: Allows all call centre software components (ACD, Multichannel routing- mail, chat, social, IVR, Dialler etc.) configurations, Management and Monitoring to be delivered from a single point of administrative tool. It should be web based administrative application for access from anywhere on the network.
- It shall have a web-based GUI console for administration, configuration, operation & management of the system. The same interface supports real-time reports.
- Administrative Tool should have role-based access to system for management, configuration and monitoring
- The call centre software shall allow routing and distribution of calls based on following criteria:
 - a) Most idle agent

- b) Skill based routing such as based on language skills of the agent, skill of agent to handle a specific type of service request, most skilled agent
- c) The Solution/platform should support Universal Routing for Voice and Multimedia Channels (SMS)
- d) The solution/platform should support Proactive Voice and Web engagement to provide consistence experience to beneficiaries and health workers from all communication channels including call centre access from mobile application.
- e) The solution/platform should support call centre Routing based on Group/Queue, Service Level and customer intent based on Customer data/customer profile
- f) System shall have priority handling, queue status indicator and multiple group support features
- g) The customer must be provided announcement / music in case of queue/delay until the call is answered. If an agent is not available to handle a call, the call must queue for the next available agent.
- The system shall allow the supervisor to observe and monitor the agents. This facility shall be available in following ways:
 - Observe and listen only mode
 - Listen and whisper mode
 - Conferencing Mode
- The system should display real-time dashboards report on the supervisor's system which includes statistics on Customer satisfaction/experience (view queues and interactions), Agent operations (view agents and agent groups).
- System shall allow multiple reasons that a staffed agent can enter that describes the reason for entering the break mode. Reason shall give the call centre supervisor information on how agents spend their time.
- Call centre solution should support multiple languages over the user interface (Agent, Administrator, Supervisor)
- Call Centre solution should be able to integrate with various third-party CRMs using web-services API and standard connectors (based on web-services API).

XXIV. *Required Key features of Enterprise Management System (EMS)*

The Enterprise Management System should be used to manage all enterprise resources with a solution that encompasses the heterogeneous networks, systems, applications, PRI/SIP Lines, desktops and databases present in the system. It should have the capability to consolidate all the information to one console with support for providing a web interface. HSP needs to submit the EMS reports to MoHFW for a monthly review. HSP must refer to “Operation and Maintenance of MCTFC Project” for more details.

XXV. *Integration of MCTFC with RCH, Kilkari and Mobile Academy (KMA), National Family Planning Helpline, PMSMA, Government Portals and various other Applications*

➤ **Existing MCTFC-RCH Integration Flow:**

1. The current MCTFC application fetches its working common master data set from RCH Portal. The MCTFC application then pushes back the verified data back to RCH Portals through web services.

2. MCTFC-HSP must ensure data exchange with the help of latest trending technologies between MCTFC, RCH portal and Integration with KMA & other State/Central schemes/programs for smooth enhancement of solution. This enhancement should have the capability from both manpower and technology perspective.
3. The MCTFC-HSP in view of point 2 should have the ability to integrate with other regional call centres across the country:
 - i. MCTFC-HSP needs to ensure that the augmented MCTFC solution will fetch its working master data set from RCH Portal. The HSP needs to provide solution for the integration of MCTFC, Kilkari & Mobile Academy and others with the RCH Portal to fetch the sample working data set and push back the validated data to RCH Portal. MCTFC-HSP may also be able to support integration of State Portals / Programmes / External Portals with RCH Portals if required in future.
 - ii. The logic for the sample or drawing of the lead set data would be provided to the HSP by MoHFW during the requirement and development phase.
 - iii. In case of change in platform of RCH or related programmes, HSP shall be able to conform to these changing platforms and suitably integrate with solution.
 - iv. HSP should obtain the call centre license and get it renewed for the entire duration of the project.
4. Technical mechanism from both MCTFC-HSP and NIC respectively are mentioned below:
 - a) MCTFC-HSP related technical mechanism is mentioned below:
 - Web Service to Pull data from RCH Portal
 - Web service to Push verified data to RCH Portal
 - b) NIC catering to RCH Portal related technical mechanism is mentioned below:
 - Mechanism to consume data sent from MCTFC.
 - Provision to view MCTFC verified data on RCH Portal
 - Mechanism for State user to view flagged data on RCH Portal for further correction.

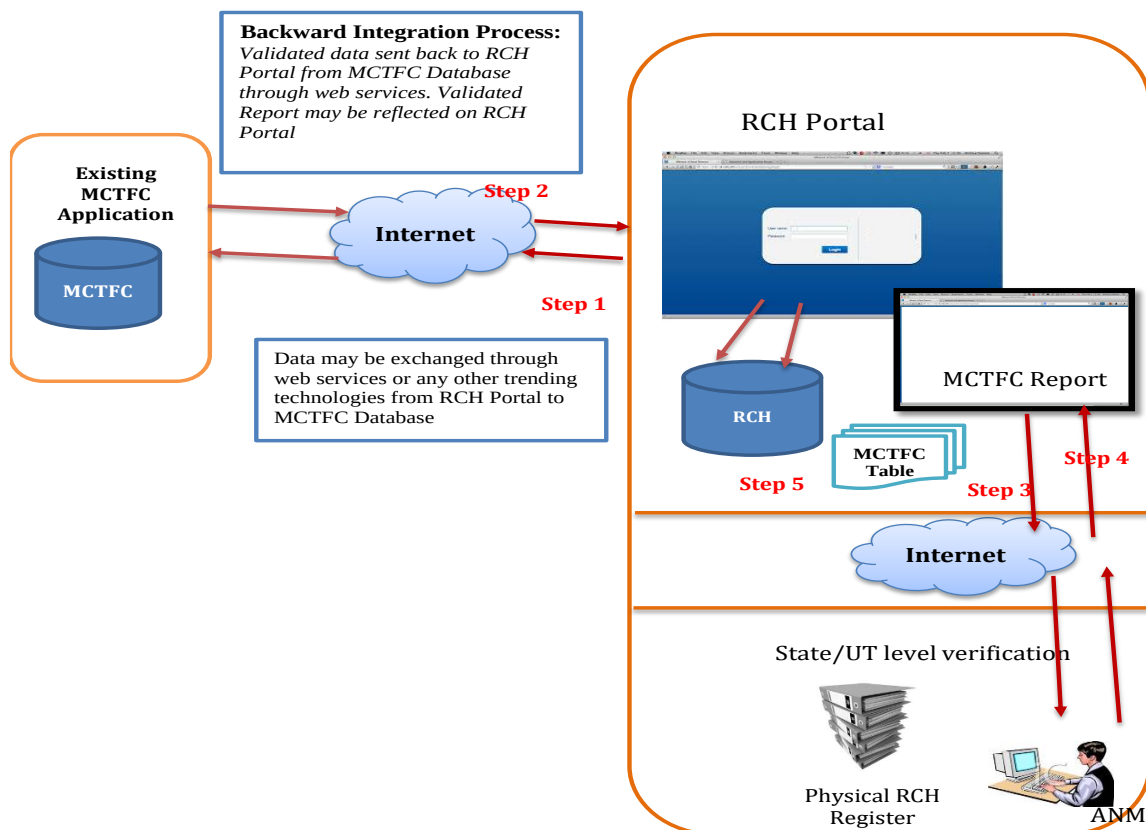

Figure1. High level diagram representing the existing MCTFC and RCH Portal Integration Flow

➤ **Need for integration of National Family Planning Helpline, Kilkari & Mobile Academy with MCTFC Call Centre:**

National Family Planning Helpline, Kilkari and Mobile Academy and PMSMA projects are also performing awareness activities for beneficiaries and Health workers by utilizing RCH common master data. Thus, MoHFW intends to integrate National Family Planning Helpline, PMSMA, Kilkari, Mobile Academy and MCTFC for converging the core functionalities in the enhanced version of MCTFC for two-way communication that will allow subscribers to provide feedback on the services, raise questions, and request more information. This integration is aimed at optimizing activities of these programmes while also achieving cost-effectiveness through sharing infrastructure and resources.

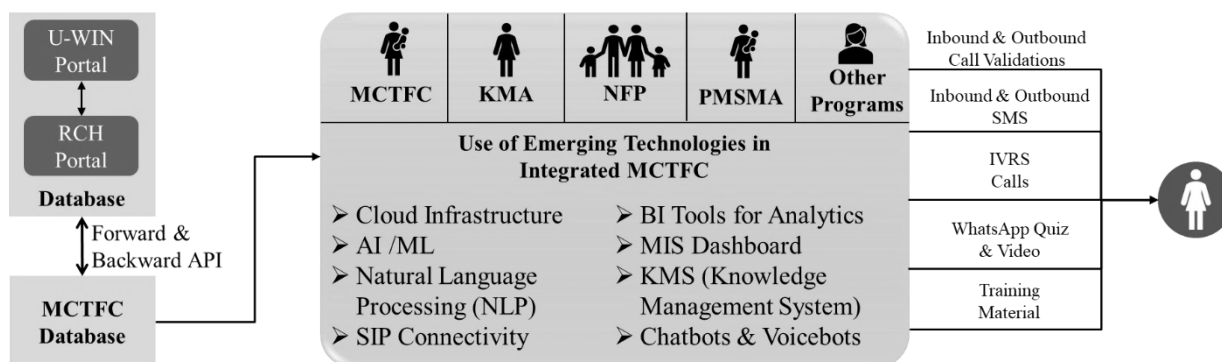

Figure 2: Framework of Integrated MCTFC Call Centre

- **Integration of National Family Planning Helpline and Pradhan Mantri Surakshit Matritva Abhiyan (PMSMA) with MCTFC Call Centre**
Selected HSP shall be responsible to integrate NFP Helpline and PMSMA with MCTFC call centre. The HSP shall have the complete responsibility of knowledge management and training of the personnel deployed for the project.
- **Integration of Kilkari with MCTFC Call Centre:**
 - a. Expanding the reach of Kilkari: Ensuring that every pregnant women/ mother enlisted in RCH Portal becomes part of Kilkari services through integration with MCTFC call centre.
 - b. Ensuring uptake of calls: Ensuring these pregnant women/ mothers listen to the entire Kilkari messages thereby improving their listenership and health seeking behaviour.
 - c. Resolution of beneficiary queries: MCTFC call centre will serve as a two-way communication platform for the beneficiary for reaching out for any queries, suggestions, or clarifications. This will open an opportunity for the Kilkari programme which currently does not have a provision for two-way communication and feedback with an integrated approach with MCTFC call centre.
 - d. Addressing low performing geographies: Identifying and addressing the low performing States by continuous monitoring through a web-based GIS Dashboard to improve the Kilkari services in these geographies.
- **Integration of Mobile Academy with MCTFC Call Centre**
[A] Preliminary analysis of the existing call centre reveals following new integration requirements as mentioned below:
 - A portion of the seats may be reserved exclusively for supporting Mobile Academy in MCTFC call centre.
 - Some seats will be assigned particularly for the beneficiary with high-risk conditions and for women who have queries/ suggestions.

- One segment will be allocated to ASHAs based on the programme needs. The remaining seats will be allocated to other programme divisions based on their requirements.
- Interactive video-based content for demonstrative sessions.
- ASHAs have varied digital literacy levels and access to smartphones. There are all other contextual and background factors (e.g., urban-rural, years of experience) that affect how ASHAs interact with beneficiaries. There is a need to leverage the trend of growing smartphone penetration and increase the comfort level with digital content for catering to different contexts and experience levels.
- There is a need for feedback loop or touch points for follow-up, doubt clearance, additional information, selection of topics of choice, etc. HSP may provide solution for long-term handholding to support ASHAs to improve their learnings and engagement with Mobile Academy through MCTFC Call Centre.
- HSP may provide solutions to maximize skills and capacity of ASHA workers for deepening participation and engagement through the usage of integrated Mobile Academy along with MCTFC application for maximum coverage of beneficiaries like Pregnant Women and Children.
- Expansion of current content to include additional topics that will help Mobile Academy go beyond improving communication skills to strengthening the knowledge base of ASHAs through multiple channels.
- Mechanisms to collect feedback from ASHAs, through SMS, IVR, WhatsApp, AI based Chatbots etc. for broader outreach.
- Sensitization of key staff and capacity building to ensure stronger data collection and management practices.
- Mechanisms to drive ownership and accountability at different hierarchical levels through reviews and utilization of Mobile Academy data.

[B] The upgrades to the Mobile Academy program will span two broad areas:

i) Enhanced content and delivery channels:

- a) The questionnaires of Mobile Academy can be merged with the MCTFC to reduce the duplicate efforts routed through different channels separately.
- b) While the core offering of IVR calls will continue, ASHAs with smartphones will have the option to access Mobile Academy in the form of multimedia content such as videos, WhatsApp posters/images, downloaded learning materials, and interactive quizzes via WhatsApp (new delivery channel).
- c) A simple feedback loop will be made available at the end of the IVR call, which will be used to gather feedback about the service as well as specific content and behaviours.
- d) WhatsApp as a delivery channel will enhance the navigation and revision experience in the following manner:
 - through menu-based navigation (a key feature of WhatsApp for Business), the WhatsApp based version will allow the ASHA to easily revisit chapters / materials as needed.

- progress reports will give an overview of the ASHA's progress towards course completion and her marks in the quizzes. Combined with the menu-based navigation, this will enable the ASHA to navigate through the course with options for switching to previous chapters for revision.
- inbuilt mechanisms for feedback and two-way communication (e.g., WhatsApp chatbots, interactive reminders, etc.) that allow ASHAs to provide feedback on the services, raise questions, and request more information to better understand user preferences and behaviour.

ii) Long term handholding

HSP may provide solutions to build a robust support system to assist the ASHA throughout their training journey. The support system will have multiple touch points such as:

- a) ASHAs will be able to raise queries and issues faced by them through a call centre, accessible through a toll-free number or a missed call-based service.
- b) Local supervisors are the first line of contact for ASHAs to raise their issues. The ASHA supervisors will be specifically trained and sensitized about Mobile Academy so that they can address any queries raised by the ASHAs and motivate them to complete the course.
- c) ASHAs will also be able to send queries through WhatsApp, through voice notes in regional languages (which will be routed to call centre executives), as well as chatbot-like features to promote a two-way communication through integrated approach with Mobile Academy and MCTFC call centre.
- d) ASHAs will be encouraged to use the handholding support if they face issues at the time-of-service delivery, for improving their skill and completion of their training module for certificate generation. The same channels (call centre, ASHA supervisor, WhatsApp) will be available for this.
- e) Providing additional hand-holding support during outbreaks for guiding and supporting ASHAs with accurate information during outbreaks.
- f) Sharing information related to subscribers: The call centre will provide additional information to ASHA about beneficiary's behaviour for uptake of the services thereby connecting them to provide additional support and care whenever required.
- g) Engaging ASHAs with high-risk mothers and children, and their families:
 - Providing timely information and guidance to ASHAs.
 - Encouraging them to follow-up with such families for continuity of the services and tracking of the same.
 - Timely referral of cases when required.

XXVI. *Proposed Architecture for Integration of Kilkari and Mobile Academy, National Family Planning Helpline and PMSMA with MCTFC Call Centre*

The services of MCTFC call centre will also be utilised for catering the similar needs of other Government health programmes and other State Call Centres for which the guidance on

operational framework will be provided by the Ministry of Health & Family Welfare. In such cases, support from the concerned programme divisions will be sought for creating content, scripts and training of call centre agents as per the requirements. HSP may provide solutions to support both Manpower, Technology stack, and innovative Cloud based solutions to achieve the objective of integration of different programmes with MCTFC call centre.

The broader aim of the integration of different programmes with MCTFC Project will be to connect the beneficiaries and health workers and other local health systems for better outreach and uptake of the health services for beneficiaries.

Thus, the MCTFC call centre through an integrated approach will act as a support platform for RCH Portal and other Government health systems.

Currently, there are 48 PRI lines that support Kilkari and Mobile Academy projects. It is envisaged to upgrade the existing PRI based technology to SIP trunks to support a greater number of beneficiaries and health workers by inclusion of a greater number of States for better outreach. It is also envisaged to perform the API integration of IVRS technology of existing MCTFC Project with new MOTECH core engine and upgraded MIS of Kilkari and Mobile Academy Project. Alternatively, in case required, the complete redesigning and redevelopment of the Kilkari and Mobile Academy for integration with MCTFC Project maybe done for further technological enhancement and then perform the migration to Cloud.

The selected HSP must implement the integrated MCTFC solution using any Open-Source stable platform must be compatible with any Cloud server having Data Centre in India along with Geofencing and WAF which shall be implemented by the MCTFC-HSP on the Cloud server keeping a centralized code repository and database with replication to ensure quick responses.

The Core Engine and MIS application will adhere to the following compliance and monitoring guidelines

- GIGW 3.0 compliance
- Cybersecurity Compliances
- EHR and EMR Guidelines
- STQC/QCI/Others Certification

Hosting: The proposed new core engine and MIS would be deployed on the Cloud infrastructure. HSP to refer Cloud related best practices.

HSP may refer to the section [A], [B] and [C] above for the format of existing MCTFC Project and Kilkari and Mobile Academy along with proposed format for Cloud Infrastructure.

XXVII. High-Level Architecture Diagram

IVR services shall be powered by an open-source platform called **MOTECH (Mobile Technology for Community Health)**. The MOTECH platform combines the integration capabilities of an Enterprise Service Bus (ESB) with a flexible open-source application development framework.

Main Components

- **MOTECH System (NMS):** This system acts as a rule engine for Kilkari and Mobile Academy services on IVR technology to be accessible pan India.
- **New IVR platform** – This platform will enable Kilkari and Mobile Academy systems to interact with humans through IVR technology.

KMA System

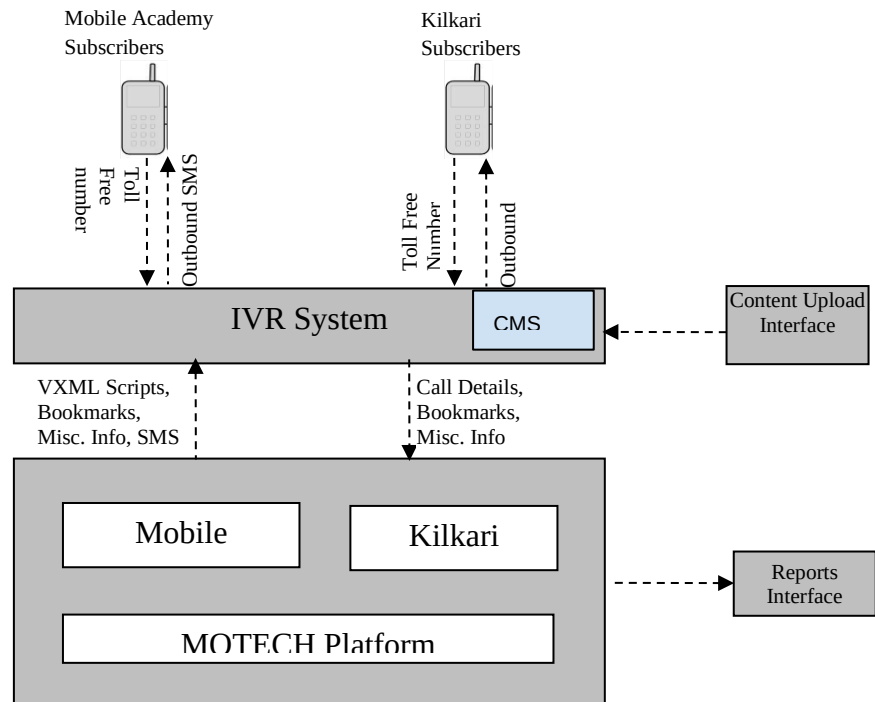

Figure 2: High-level architecture for the existing KMA System

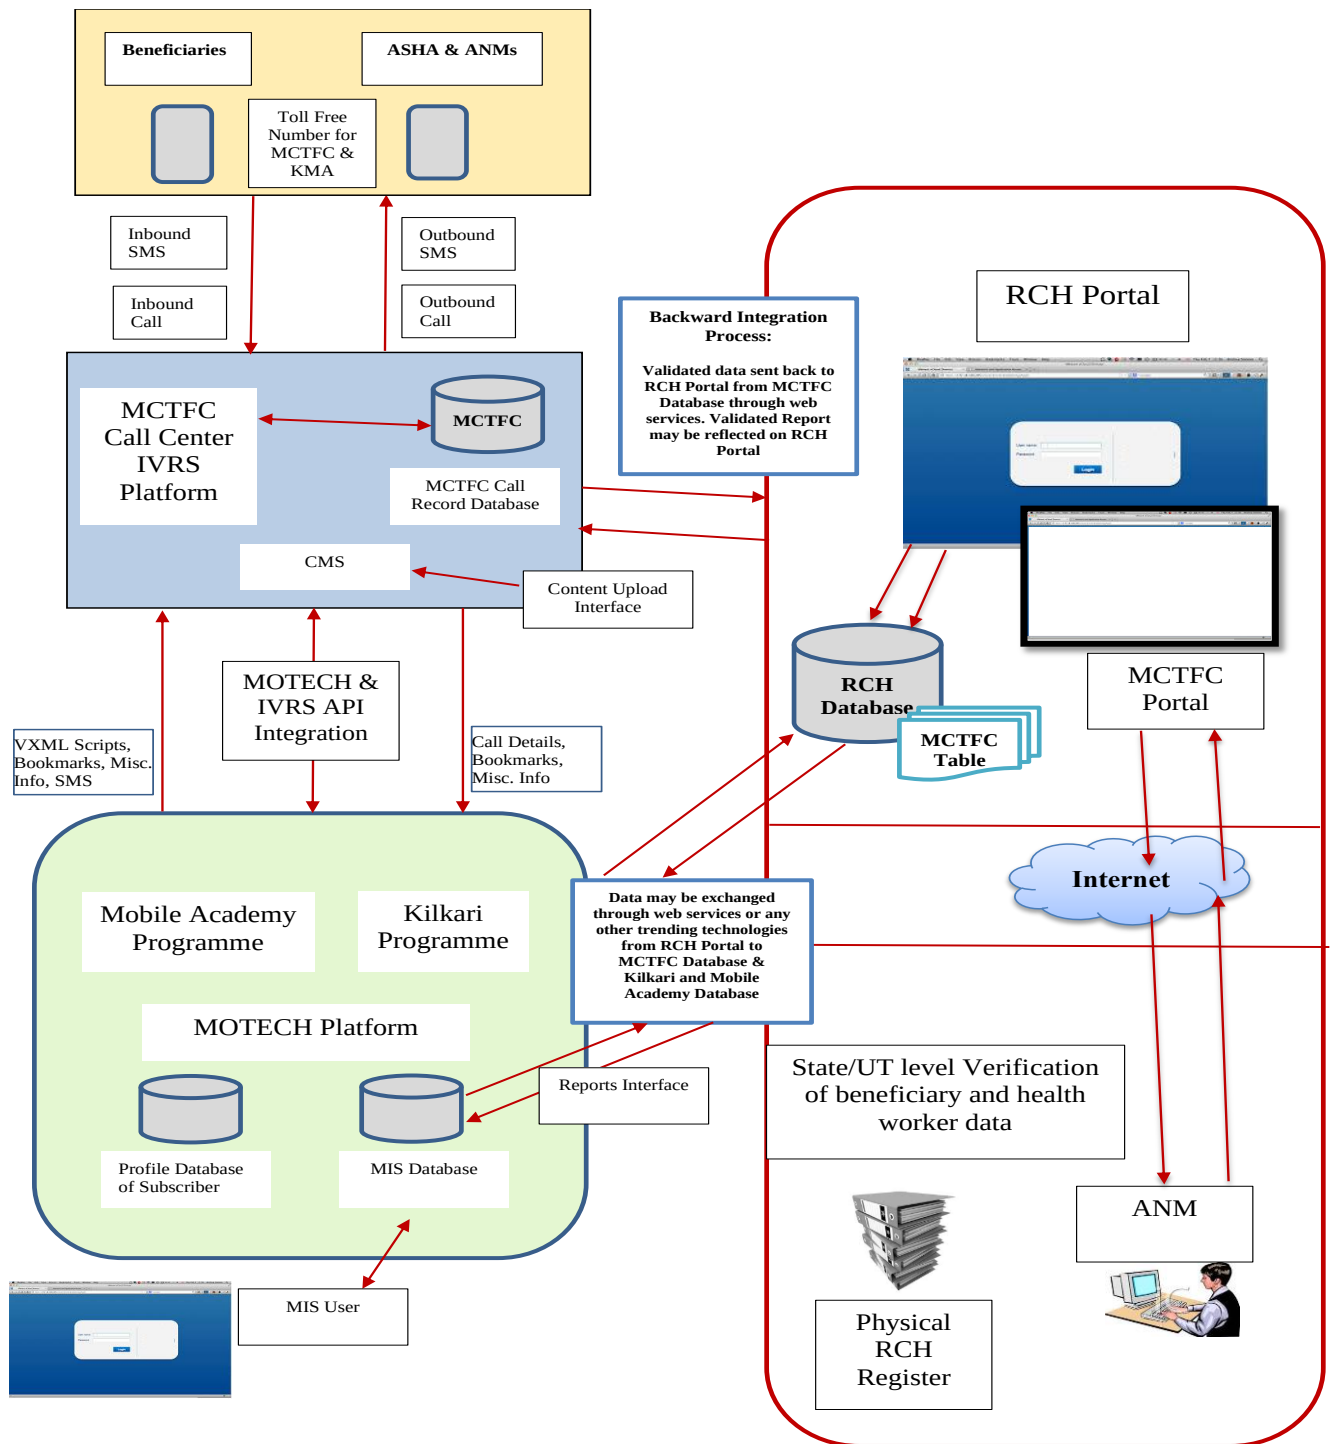

Figure 3- High-level Architecture diagram of Integration of MCTFC System with Kilkari and Mobile Academy System

a) Key Service Requirements

- Telephony servers, application servers and databases.
- Telephony servers and application servers must have point to point connectivity.
- Telecom connectivity (SIP) for the ports volume envisaged.
- Call setup time in less than a second for the volume of calls (approx. 4 lakh calls in an hour)

b) Technology Stack

The new HSP shall propose the technology stack as mentioned below for the following parameters:

- Application frontend
- Database backend
- Telephony – Donjin / HPE OCMP or any other latest technologies, Voice XML/JSON based, Voice API, Asterisk or any other open-source technologies
- Frontend UI – Angular, WordPress etc. as per latest trending technologies

c) Monitoring Tool

To detect and prevent failures, it is very essential to have a good **monitoring tool**. Monitoring systems are responsible for supervising the technology which we make use of (hardware, networks and API communication, operating systems or applications, among others) in order to analyse its performance, and to detect and alert about possible errors. It will help to enhance the uptime of application, and this must require for production environment.

This will help to provide the following:

- a. Improve Hardware usage by giving usage report.
- b. Prevent incidents by sending notifications/Alerts and help detect them earlier to work upon.
- c. Service Uptime w.r.t Application performance/DB performance.
- d. Monitoring Service may be provided by Cloud Service Provider as this will help us to enhance the vigilance of the overall MCTFC Project.

XXVIII. MCTFC MIS Reporting

Requirement of additional features in MIS:

MIS systems help to project expectations for a particular decision. If any change is required, it will be necessary to continue monitoring performance to see whether the performance report is on track to achieve the desired results. The additional requirement from the HSP in respect of MIS are as follow:

- Provide reports on the routine operations of the program.

- Allow users to develop custom reports, such as detailed reports.
- Provide a variety of different reports, both scheduled and on demand.
- Must be accurate and avoid including estimates or probable expenses.
- Provide reports in various formats, including hard copies and electronic copies.
- The information must be relevant for making a strategic decision.
- Use Artificial Intelligence to simulate the judgment and behaviour of a data with expertise and experience in a specific field.

To increase the efficacy and efficiency of call centre functioning, the MCTFC-HSP must be able to closely work on the available data (Call Data Records, analyses of the Call Centre Agent conversations etc) for creating quantitative as well as qualitative reports on a periodic basis. Regular analysis of CDR, input data received from programmes will be utilised for creating State specific reports with defined outcomes and outputs. For specific programmes, MCTFC-HSP must be able to tailor reports based on State specific requirements. Regular analysis of Helpdesk Agents conversations needs to be performed for improving the call centre content, scripts and address the demand of the beneficiaries and health workers, and at the same time also help in understanding different capacity building needs of the Helpdesk Agents.

Some of the standard reports generated based on various categories of clients being served across programmes:

1. Programme-wise, State-wise clients served.
2. State-wise no. of high-risk cases served with follow-up and alignment with Health Workers.
3. State-wise Kilkari low-listeners/ no answer category contacted (addressed with various parameters)
4. State-wise ASHA and ANM supported through the call centre.

XXIX. Proposed Cloud Based Solution to Improve Scalability of MCTFC Project

MoHFW has realised that the existing infrastructure needs to be upscaled by improving the scalability of the exiting MCTFC Project with a possible migration to Cloud server for a smooth and error free operation. HSP should hire cloud services from CSP as per Cloud Service Offering mentioned below.

The MCTFC-HSP should be able to provide the following cloud offerings such as Software as a Service (SaaS), Platform as a Service (PaaS), Infrastructure as a Service (IaaS) and Test Environment as a Service (TEaaS). Cloud Services provided must be equipped with but not limited to following features:

- Cloud Services Assessment
- Enterprise Architecture
- SaaS Selection
- Cloud Service Delivery Planning
- Proof of Concept
- Data Migration

- Compliance and Security

The MCTFC-HSP should provide the following cloud offering benefits with respect to the following mentioned below:

- Reduce Operational Costs and Capital Expenditures
- Improve Accessibility
- Improve Flexibility
- Deploy Projects Faster
- Business Agility
- Easily Adapt to Changing Resource Demands
- Pay for what you use
- Expedite Time-To-Market
- Better use of Resources
- Leverage Private, Public, and Hybrid Cloud Solutions as Needed
- Assure Stability, Scalability, Data Security, Maintenance and Monitoring of Cloud Environments
- Disaster Recovery Plan for disruption free Cloud services. HSP should be able to provide manpower and technical support from remote locations also in case of any pandemic situation or any other unforeseen circumstances.

Cloud Service Offering: The HSP shall onboard MeitY empanelled CSP. The CSP, as a single legal entity or its holding company empanelled by MeitY, should be currently delivering Cloud Service offering, in last five (05) years, in India or globally [as per the National Institute of Standards and Technology (NIST) Definition of Cloud Computing definition providing on-demand Storage and VMs]. The Cloud service offering shall provide for tools or capabilities that enable users to unilaterally provision order, manage, and use the Cloud services:

- a) Service Management & Provisioning (Service Provisioning and De-Provisioning near real-time of provisioning request, SLA Management, and Utilization Monitoring)
- b) Provide visibility into service via dashboard.
- c) User/Admin Portal (User Profile Management, Trouble Management.
- d) Enterprise grade SLAs with an assured uptime of 99.95% (measured as Total Uptime Hours Total Hours within the Month), SLA measured at the VM Level and SLA measured at the Storage level.
- e) Cloud services should be accessible via internet and MPLS.
- f) CSP shall provision services like caching and search.
- g) Managed hosting and Managed security services will be required for health application as per requirements (This includes both application-level security and infrastructure security).
- h) MIS and Reporting Services.
- i) Vulnerability Assessment and Penetration Testing
- j) Adherence to Data security & privacy policy of MoHFW and future security framework envisaged for Health as required.

- k) Facilitate for third party audits.
- l) Deliver the service level requirements.
- m) Monitoring services such as:
 - Log Analyzer
 - Operational Metric collection
 - Alarm service
 - Email notification service
 - SMS notification service
- n) Compute Services- Virtual Machines (VM), GPU and Containers
 - VMs- The CSP shall deliver the VM services as managed virtual machines with mandatory inclusion of following without any extra cost-
 - VM – Microsoft Windows server
 - VM - Ubuntu OS
- o) Storage services
 - Block Storage (SSD)
 - Object Storage
 - File Storage
 - Archival storage
- p) API Gateway as a service.
- q) Data Centre & DR Facility: The Data Centre Facility (or each of the facilities as the case may be) (facility from where the cloud service offerings are proposed to be offered) must meet the following criteria:
 - i. The DC and DR should be placed in such a way that compute and related components can be used in Active-Active or Active-Passive configuration. DC and DR should be compliant to Tier 3 and above standards.
 - ii. Deployment on VPC/GCC on a managed services model with the required technical support. Bidder shall also provision for a helpdesk service (at no extra cost) for managing and resolving incidents/queries etc.
 - iii. The Data Centre Facility must be within India (at the time of deployment), should be currently operational, and have a minimum capacity of 50 Racks being operational in India (across all Data Centres owned and Managed by CSP)
 - iv. DC & DR should be provided by the same CSP and CSP should have a valid agreement with Lead Bidder/Bidder for complete duration of contract. The Lead Bidder/Bidder should specify DC – DR locations at the time of bidding. DCDR should be Tier-3 or higher.
 - v. The Data Centre Facility shall at a minimum have:
 - Routers, Firewalls, LAN, WAN, Internet Access, and Hosting Centres, Backup, Operations Management, and Data Management.
 - Security & Data Privacy (Data & Network Security including Anti-Virus, Virtual Firewall, Web-Application Firewall, Multi Factor Authentication, VPN, Intrusion Prevention/Detection systems (IPS/IDS), Active Directory, Log Analyser Syslog, SSL, DDOS Protection (layer 3 as well as layer 7 and not just

plain DDOS), WAF, Geofencing, HIDS NIDS, Rights Management, SIEM, Integrated Vulnerability Assessment, SOC, Private Virtual Zones, Data Privacy, Data Encryption, Certifications & Compliance, Authentication & Authorization, and Auditing & Accounting).

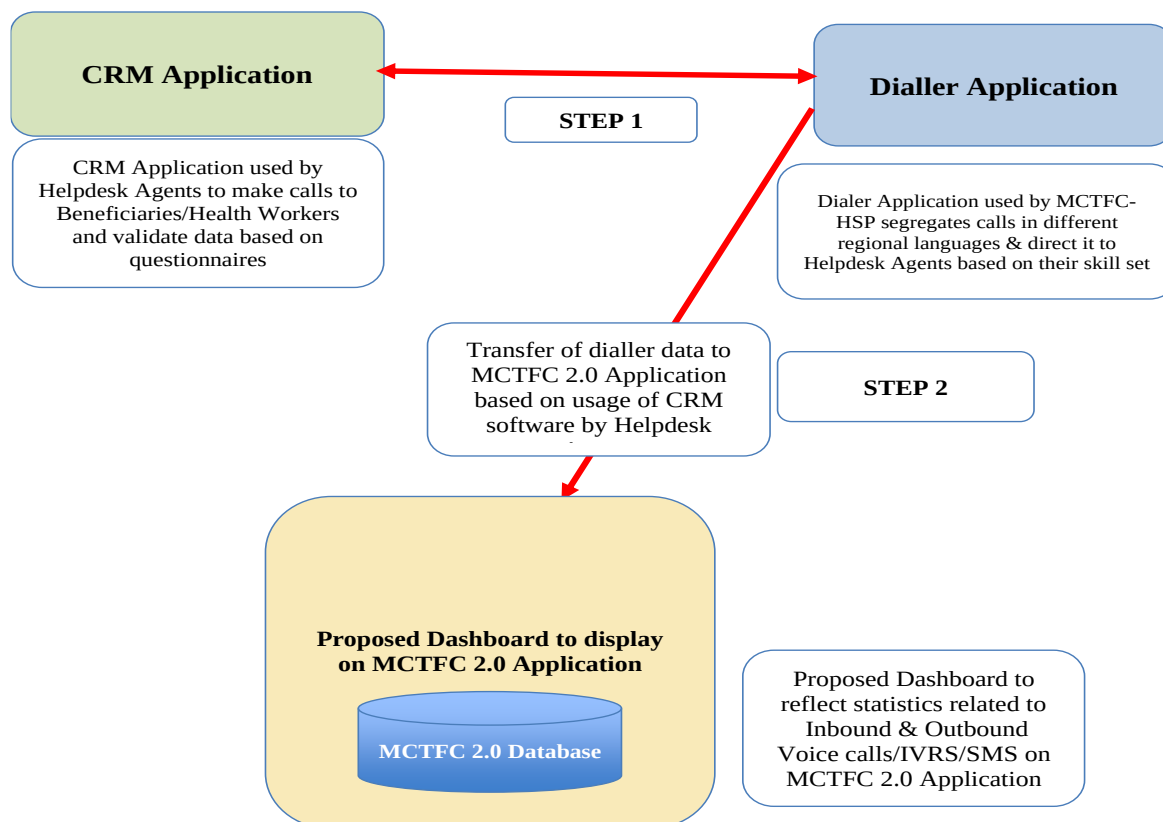

- Assured protection with security built at multiple levels.
- Certified for the latest version of ISO 27001 ISO 27001:2013- Data Centre and the cloud services.
- The CSP should have dedicated DRC in India.
- The CSP should have carrier neutral Data Centre viz; Multiple Connectivity service providers should be there.

MCTFC-HSP needs to perform proper assessments of the existing infrastructure and manpower to map the future technical and functional requirements, and based on that, it needs to propose a BoM.

The MCTFC-HSP may refer to the format having the mentioned the plan layout and fill up the details regarding the information on the Cloud Infrastructure which will be proposed by the MCTFC-HSP.

XXX. *Proposed MIS Reporting for MCTFC Solution (Diagram)*

Proposed MCTFC Operational Dashboard having inter-linkage with CRM and Dialler application

The proposed dashboard may provide an overall structured reports in various formats as described in the below mentioned sections.

- It may have the Daily Consolidated SMS and Voice reports which may give a daily reporting of the program summed up in terms of missed calls, received calls, OBD calls placed (both inbound and outbound), success percentage of OBD calls and the SMSs submitted.
- The daily SMS report shall provide daily update on the number of SMS submitted, Number of SMS scheduled, and Number of SMS successfully delivered.
- The Daily Users report may provide the daily statistics of users added.

➤ **Manage program Module: -**

Under Manage program module, the server statistics shall display day wise resource utilization of the hardware:

Each of the different indicators may be displayed with different colours in a graphical format. The different indicators are mentioned below:

1. Memory in use
2. Disk in use percentage
3. CPU load percentage

The following options may be used for displaying the information in the form of graph for the services consumed:

1. **Subscription: -**

- Subscription Engine is a service which delivers the message to a user at given date and time.
- This works in conjunction with Outgoing-Voice and Outgoing-SMS service.
- This message can be in both voice and text.
- Once the beneficiary gets registered, they will start receiving the messages.
- The start and end time of the program is configurable at the start of the program and this time remains the same throughout the program.

2. **Feedback System:**

There may be a continuous feedback system incorporated in the program which happens in two ways.

System may give a call to the user and collects feedbacks through the questionnaires, or the beneficiary responds on incoming messages via the keyword on the short codes.

3. **Outgoing SMS Service:**

This service is a cronjob that can be configured in the OS system which shall just pick up the last unsent messages from the DB whose delivery time has passed and then hits the outgoing SMS API.

4. Outgoing Voice Service:

This service is a cronjob configured in the OS system which shall just pick up the last unsent voice messages from the DB whose delivery time has passed and then puts into the Asterisk Spool Directory. This is the directory of the Asterisk engine which creates the outgoing call to a destined number.

- **Proposed Dashboard Panel** will display cumulative count for beneficiaries and health workers across all programs. Like “Total Users” signifies that these many users have been successfully subscribed for the program till date. In the same way, it may provide the distribution of traction across all the channels too. All the consolidated numbers across the programmes may be displayed.

A) There may be a feature to view the day wise consolidation of all programs. Dashboard may display the KPI details mentioned below:

- **Total Users-:** Total registered beneficiaries and health workers of the program.
- **OBD Inbound Calls: Total OBD inbound calls made till date for program since its inception.**
- **OBD Outbound Calls: Total OBD outbound calls made till date for program since its inception.**
- **Missed Calls: Total missed calls received from program since its inception.**
- **SMS Sent:** Total SMSs sent till date for program.
- **Scheduled SMS:** Total SMSs scheduled for the program.
- **IVRS Inbound:** Total inbound IVRS
- **IVRS Outbound:** Total outbound IVRS

B) Daily Consolidated Voice Report: This report may give the overall statistics of the MCTFC program. It may give the cumulative figure daily. Sorting options are available and filter option for date range can also be made available.

- **S.No.-** The serial number according to date.
- **Date-** Date for every single day gets a new row.
- **Missed Calls-** The total number of missed calls received on a particular day. This automatically gets updated as soon as the dashboard gets updated.
- **OBD Calls-** The Total number of OBD calls placed on a particular day.
- **OBD Success-** Out of the total number of OBD calls, the successfully placed OBD calls.
- **OBD Failed-** The number of OBD calls which failed (Busy/not answered / failed due to network congestion etc.).
- **OBD Success Percentage-** The percentage of successful calls placed out of total calls placed.

C) Daily Consolidated SMS Reports: Daily consolidated SMS reports may display the daily details of all the SMS which have been sent. Using the date filter, the report of specific days can be viewed.

- **S.No.-** Serial number
- **Date-** Date in dd-mm-yyyy format
- **Total SMS-** Total SMS which were sent on a particular date.
- **SMS Submitted-** Total submitted SMS to Gateway of a particular date.
- **SMS Delivered-** Total SMS delivered to the user on a particular date.
- **SMS Success (%)** Success percentage of the SMSs delivered to the users
- **SMS Failure (%)** Failure percentage of SMSs not delivered to the users

D) Subscriber Report:

- **Program Name: The program name displayed.**
- **Total Users-** This depicts the total users registered till date for a particular program.
- **Current Month-** Total users registered in the current month.
- **Previous Month-** Total users registered in the previous month.
- **Daily Average of subscribers-** Average daily inclusion of new users.
- **Monthly Average of subscribers-** Average monthly inclusion of new users.

The filters may have options such as a date range which shall enable the user to sort the data according to the specifications provided in the filter report.

Search option may be provided to the users to search a particular string across all fields from the reports that are being fetched.

E) Scheduled Message Report:

- **Mobile Number:** 10-digit mobile number of the users.
- **Program Name: The name of the program displayed.**
- **Date:** specifies the date on which the scheduled SMS was sent to the users for the various programs subscribed and the date on which successful subscription occurred.
- **Total Message:** Total scheduled messages to be sent to the users for the various programs the user has subscribed to.
- **Status: subscription successfully registered, and the user will receive the scheduled SMS as per the plan.**
- **User Inputs:** When the OBD call is received by the user, the inputs such as language chosen, age, and program types etc. opted by the user are displayed in the report. This also has the inputs for the OBD call placed on periodic days.

F) Missed Call Report: This report shall demonstrate the missed call statistics for the programs. A side-by-side comparison of all programs in terms of users and it's communicating channels.

- **Total Missed Calls-** This depicts the total missed calls occurred till date for the program.
- **Current Month-** Total missed calls in the current month.
- **Previous Month-** Total missed calls in the previous month.
- **Daily Average missed calls-** Daily average traction of missed calls.
- **Monthly Average missed calls-** Average monthly tractions of missed calls.

Detailed report section may give the missed call events generated so far.

G) OBD Call Report: This report shall demonstrate the OBD Call statistics for all programs. This provides the side-by-side comparison of all programs in terms of users and it's communicating channels.

- **Program Name** - The name of the program that is displayed
- **Total Missed Calls** - This depicts the total missed calls occurred till date for the program
- Beneficiaries chose IVRS option to speak to Helpdesk Agents, and finally connected to Helpdesk Agents
- **Current Month**- Total OBD Calls in the current month
- **Previous Month**- Total OBD Calls in the previous month
- **Daily Average missed calls** - Daily average traction of missed calls
- **Monthly Average missed calls** - Average monthly tractions of missed calls.

Detailed report section gives the individual instances that has been generated through the OBD calls.

H) OBD Missed Call Report:

- **Program Name** - The name of the program that is displayed
- **Call Start Time** – It represents the time the OBD call started as the user received and answered the options for the program type.
- **Call End Time** - It represents the end time of OBD call after the user has answered all the options for the program type.
- **Call Duration** – The time difference between the Start time and End Time of OBD call.
- **Status** – The status of OBD calls depends on whether the calls have been “ANSWERED” or “FAILED”.

The Filters provided like From Date-To Date shall enable the user to sort the data according to the specifications provided in the filter report.

Search Field –Enables the users to search a particular string across all fields from the reports that are being fetched.

I) SMS Sent Report: This section gives the individual instances that have been generated through the sent messages. Numbers, demonstrating the sent SMS stats for all programs. This provides the side-by-side comparison of the programs and its users and communicating channels.

- **Program Name** - The name of the program that is displayed.
- **Current Month**- Total SMS sent in the current month.
- **Previous Month**- Total SMS sent in the previous month.
- **Daily Average SMS**- Daily average tractions of SMS sent.
- **Monthly Average SMS**- Monthly average tractions of SMS sent.

J) SMS Scheduled Report: This shall depict the scheduled SMS statistics for the programmes. This shall also provide the side-by-side comparison of all programs in terms of users and it's communicating channels.

K) GIS based Geographical Representation: This may depict the distribution of the various statistics such as SMS distribution, Missed Call distribution and subscriber distribution across the country. The count of MSISDN can be displayed across various States under SMS and Subscriber distribution whereas the count of Caller ID may be displayed under Missed Call distribution.

XXXI. Other proposed State-of-the-art solutions

a. Artificial intelligence (AI) application

The selected MCTFC-HSP shall provide AI capabilities that include but are not limited to the following technologies:

- Self-servicing technologies may be provided as a solution so that a minimum percentage of callers as decided by the MoHFW can get their queries resolved through self-servicing.
- Sentiment analysis: This technology assesses the sentiment analysis of Beneficiaries, Health Workers and Helpdesk Agents' conversations.
- AI also, must be able to do perform analysis on successful and unsuccessful Voice calls/Voice IVRS etc.
- AI can manage the call volume, assign the next incoming calls, track call performance, and signal where pre-defined weaknesses are appearing for follow-up attention.
- The results can also be tailored to the times when performance is high and low, as well as correlated with several factors such as shift changes, time of day, the skill level of staff, etc.
- Conversational AI such as 'ChatGPT' based chatbots developed by OpenAI or Virtual Helpdesk Agents, IVRs for addressing the health-related queries of beneficiaries (PW/Mother) and Health Workers (ASHAs/ANMs).
- AI feature to assess tone and speech context of Calling Agents using Natural Language Processing (NLP) for analysing their tone of voice while having an ongoing session with the beneficiaries (PW/Mother) and Health Workers (ASHAs/ANMs) which will ultimately help in improving the Quality of Calls. AI systems can also measure the beneficiary's enthusiasm or apathy towards various points of discussion in calls.
- All calls to be analysed daily by AI tool for the purpose of quality analysis. This analysis must include compliance check (Ensure the calling agents are disclosing complete information & adhering to multiple compliance aspects required by the healthcare industry), checking and highlighting the objectionable words, tone of calling agents and other required parameters to improve the quality of calls.
- HSP need to submit computer generated detailed reports on no. of call analysed daily and call quality analysis report on quarterly basis and as and when required by the client.

b. Omnichannel capabilities

The solution provided by the MCTFC-HSP should have capabilities to switch channels within the call centre without having to repeat their problem statements. This means that a customer whenever switches from one customer service function to another, there should be a flow of information with the functions without the agent asking repetitive questions to the customer. This may also be achieved through the integration of CRM with the calling solution. Omnichannel capabilities also refers to the feature of managing multiple channels of communication as a single queue. This means that whether be it SMS, email, call etc., the agent should be able to perform OBD communication for all the channels as a one single queue.

c. Business Intelligence Tools for Analytics and Reporting

The MCTFC-HSP should have capabilities to produce reports on all the modules of all the business applications involved in the helpdesk setup. Analytics on these reports to enhance customer servicing should also be a part of these reports. Reports may should be readily available and real-time analytics should be in place for the following but not limited to parameters:

- Customer satisfaction rating
- Total calls every month (inbound and outbound) (fresh calls and repeat calls)
- Total email, SMS etc.
- Month on month data for total tickets (based on the status of the tickets)
- Total reopened tickets
- Total number of customers whose tickets have been resolved through self-servicing.

Other than the above mentioned, the MCTFC-HSP shall be able to extract any transactional or master data reports as and when requested by the MoHFW.

d. Performance Monitoring

Provide the capability to define key Performance Indicators (KPIs) and measure performance against defined KPIs, both online and with scheduled/ad-hoc reports. The requirement of MIS report is mentioned below:

- I. The solution shall provide for extensive reporting capabilities. The user interface for reporting tools shall be online and GUI based.
- II. Dashboard provided by the MCTFC-HSP should have dynamic query builder inclusive of “AND” / “OR” operation. The Dashboard should have provision for role/ rights-based access and should allow users to generate reports in various formats (Excel, PDF etc.)
- III. The selected MCTFC-HSP would develop and provide a dashboard which will include, but not limited to, following indicators:
 - i. Inbound and outbound calls daily, weekly, fortnightly, monthly, quarterly, half-

- yearly, annually.
- ii. Number of Beneficiaries chose IVRS option to speak to Helpdesk Agents, and finally connected to Helpdesk Agents
- iii. Number of calls that could not be serviced.
- iv. System uptime report from EMS tool – Application availability, PRI/SIP line availability
- v. Open & closed tickets, escalations, reminders, call-back, etc.
- vi. Summary of calls by query, service, period.
- vii. Average time spent by callers in IVR tree before being transferred to an agent.
- viii. Call handling time on IVRS for various queries, services
- ix. % of calls abandoned in the IVR
- x. % of calls disconnected along with the reason
- xi. Call tree level-wise abandon %
- xii. Peak call volumes by time intervals, date, etc.
- xiii. Login & Logout Time of agents
- xiv. Average and total call duration for different agents/groups.
- xv. No. of Emails received and responded.
- xvi. No of comments/feedbacks addressed on daily/weekly/monthly basis

Reports to comply with Service Levels as per SLAs defined in RFP. Provision of user views through email on the quality of response/services being provided. Review/Penalty in case satisfaction level falls as stated in the Service Level Agreement.

The report format shall be flexible and shall be made available in excel, pdf, txt, or any other user-friendly format on the request of MoHFW from time to time. The report should be configurable to be e-mailed to a defined mailing list.

XXXII. *Development of Beneficiary and Health Worker Centric Portal for MCTFC:*

- I. The selected MCTFC-HSP shall provide a MCTFC beneficiary/ health worker centric portal which may further provide insights on real time basis for suggestions/queries/ideas/feedbacks received from the beneficiaries /health workers on a periodic basis.
- II. The selected MCTFC-HSP will be required to provide CRM solution, IVRS solution, Voice Loggers, etc. with respect to the scope of work specified in this RFP.
- III. The selected MCTFC-HSP shall interact with the key officials for understanding the requirements for the development/customization of solution. The selected MCTFC-HSP shall prepare the System Design document for the MCTFC based on the requirements of MoHFW.

- IV. The selected MCTFC-HSP should maintain 100% recording of calls for a period of 3 months. The recording should contain detailed call information, feedback of analysed calls, etc.
- V. The Beneficiary and Health Worker centric solution/platform should have the provisions to send and receive emails, WhatsApp and SMS and it should be integrated with WhatsApp, SMS, and Email Gateways.
- VI. For all inbound calls, the first point of contact shall preferably be IVRS. The caller must be provided announcement / music in case of queue/delay until the call is answered. If any Helpdesk Agent is not available to handle a call, the call must be routed to the next available Helpdesk Agent. The solution should have capability to route the call to any external number in conference mode for resolution of any queries/ complaints etc. The solution should allow the supervisor to observe and monitor the agents, via Observe and listen only mode and Conferencing Mode.
- VII. The details of the IVRS menu tree to be designed by the selected MCTFC-HSP in consultation with MoHFW during the FRS stage. The menu of IVR will be in English, Hindi and other Indian languages only, Dual Tone - Multi Frequency (DTMF) support to ensure easy keypad-based navigation. The IVRS deployed by MCTFC should support easy customization based on the requirements of the Project. MoHFW may ask the selected MCTFC-HSP to configure the IVRS menu from time to time for special messages / campaigns etc. without any financial implication to MoHFW.
- VIII. The selected MCTFC-HSP shall be responsible for creating, maintaining, and updating knowledge repository for the requisite programmes/initiatives. It will be the responsibility of the selected MCTFC-HSP to develop the standard knowledge /question bank in consultation with MoHFW. The question bank developed by the selected MCTFC-HSP for MCTFC will be validated by MoHFW before the rollout and Go-Live. The selected MCTFC-HSP will ensure that validated and updated information is available within the system for answering the FAQs. The FAQs must be updated weekly/fortnightly in consultation with MoHFW. MoHFW may also do the quality audit by reviewing the recorded call of the Helpdesk Agents.
- IX. The selected MCTFC-HSP should have capacity to ramp up/down the operations as per requirements and be able to manage sudden spikes. It may also be required to implement new processes – inbound and outbound as per requirements without disruption to ongoing processes/ services.
- X. The selected MCTFC-HSP should have a Business Continuity and Disaster Recovery Plan in place.
- XI. The selected MCTFC-HSP shall make provision for disruption-free Beneficiary and Health Worker Response Centre services.

- XII. The MCTFC-HSP shall make available facilities to work from home/remotely to its agents based on the requirement of MoHFW. In such a case all the required infrastructures shall be provided by the selected MCTFC-HSP to its Helpdesk Agents and the entire solution should be accessible at the remote site by the agent for seamless working. Such mode of working may be implemented based on the need and with approval from MoHFW.
- XIII. The selected MCTFC-HSP shall design a detailed escalation matrix for resolving the complaints. The escalation matrix should be developed by the selected MCTFC-HSP in consultation with MoHFW.
- XIV. All components of Beneficiary and Health Worker response centre (ACD, CRM, IVR, Dialler, call recording etc.) should be integrated with each other. Some of the key requirements / features expected from the components of the Beneficiary and Health Worker response centre also needs to be incorporated by the selected MCTFC-HSP while developing / providing the Beneficiary and Health Worker Response Centric Portal.
- XV. Call quality monitoring: Numerous QA tools can monitor and analyse live calls to give real-time insights on:
- i. The quality of communication.
 - ii. Agent's performance on various benchmarks.
 - iii. Agent's adherence to guidelines and regulations.
 - iv. Any common beneficiary and health worker issue and grievance, etc.
- To ensure proper quality monitoring, Helpdesk operations manager can use these insights to evaluate service levels and make the necessary changes.
- XVI. Call calibration: The MCTFC-HSP must be able to standardize the customer service process and be able to organize coordination between the agents, supervisors, managers, and the QA team to review, rate, and discuss beneficiary and health worker related service calls. These sessions ensure the help team is on the same page about what is acceptable on a call.

XXXIII. *Content Localization in Regional Languages:*

- I. Currently, MCTFC Project offers its services to Beneficiaries and Health Workers through Helpdesk Agents in 8 different languages. It is envisaged the MCTFC-HSP would be required to offer their services for content localization in other Indian regional languages in the future. In case of any additional agents deemed necessary to meet the call volumes MoHFW may choose to seek additional manpower for additional charges as discovered in the price bid in this RFP.

- II. It is also envisaged that the MCTFC-HSP would be required to offer their services based on AI/ML and other trending technologies for content localization highlighted in the following points mentioned below but not limited to:
- i. the MCTFC-HSP needs to ensure the usage of AI/ML/NLP/ based applications or any other trending technologies localize the content of Calls/IVRS/SMSs/Questionnaires and be able to convert idiomatic phrases and colloquialisms to the target language/ culture of the beneficiaries and health workers to be met in near future while keeping the sense, voice, and tone of the original content.
 - ii. Manual translation needs to be reinvented and transformed into the localization and serve as subject matter experts (SMEs) who build the knowledge graphs for automation and provide specialized translation services.
 - iii. In the same context, the MCTFC-HSP may make use of Natural Language Processing (NLP) to process and analyse large magnitude of natural language data. Furthermore, the application of computational techniques be utilized to analyse and synthesize natural language and speech.
 - iv. Further, as NLP is presumed to be fast, accurate and responsive, the MCTFC-HSP may also explore on the utilization of NLP to provide insights on:
 - what languages mean in different contexts and domains;
 - coverage of human aspects, such as judgment, intention, common sense, and behavioural characteristics for people interacting through NLP;
 - translation of technical language, e.g., compilation and transformation of codified language can be done into relevant text so that it is easy to understand even by a non-technical person.
 - In the same context, the MCTFC-HSP may explore the utilization of GPT3, which is a part of NLP and a new way of compiling data through the graphical user interface. It is said to help in browsing the web in all languages across all domains, whereby, all languages can be recognized and then reproduced. As a result, GTP3 has all the knowledge to interact though is not an expert by itself in any domain.
 - v. In addition, MCTFC-HSP may also utilize the large gamut of content of Metadata which may help to generate relevant information, thus, bringing about the much-desired accessibility, inter-operability, and reusability that could be greatly desired by the MCTFC in the contemporary era of technological advancement like, semantic AI and content technology solutions that may help to ‘create’ content in the multilingual context from metadata for serving the SMEs (subject matter experts) who build the knowledge graphs for automation and provide specialized translation services, summarily for dissemination of relevant information to Beneficiaries and ANMs/ASHAs through the Helpdesk Agents.

XXXIV. Call handling requirements

The envisaged MCTFC will initially start with inbound and outbound calling operation with following languages:

1. Hindi
2. English
3. Gujarati
4. Telugu
5. Bengali
6. Odiya
7. Assamese
8. Marathi
9. Kannada
10. Malayalam
11. Tamil
12. Punjabi

Note: Further, if required by MOHFW, HSP will have to add languages from the list of 22 scheduled languages as per Indian Constitution at the same cost quoted in their financial bid. The final decision on the selection of languages that would be supported by the MCTFC project beyond these will be taken by the TCC

XXXV. IVRS Call Handling Requirements

Scope of IVRS services should be equipped with following key functionalities:

- Easy navigable voice assistance for the caller to select the desired option
- Feature to promote and educate beneficiaries regarding government schemes and programmes related to Reproductive and Child Health. The framework for the same would be designed and developed after due discussion and approval of MoHFW
- Smooth handover facility to the Helpdesk Agent for personalized assistance
- Feature to call beneficiaries/ health workers for verification of beneficiary / health worker's records, promotion of government health schemes and programmes and intimating beneficiaries / health workers regarding their due / overdue services related to RCH.
- Automated system of filtering the records and sending relevant information to concerned phone numbers.

XXXVI. SMS Integration

HSP will implement the SMS solution for MCTFC and integrate it with the SMS gateway. HSP should integrate SMS gateway with a unique number for sending and receiving SMS for entire project duration.

All the beneficiaries successfully connected by Helpdesk Agents, after validation, will start receiving messages as relevant to their services received, phase of pregnancy or age of child regarding following:

- a) Awareness about Government schemes and programmes

- b) Sharing contact number details of Health Workers and Beneficiaries with each other for follow-up in case of High-Risk Pregnancy, Low Birth Weight, etc.
- c) Alerts about due services based on the current service data of beneficiary, to beneficiaries as well as Health Workers.
- d) Health awareness on Maternal and Child Health Care.
- e) Mechanism for collecting feedback on calls made to beneficiary.

The messages will be both in Text (SMS) and Voice formats. For awareness messages in Voice Format, integration may be done with Kilhari and Mobile Academy Projects for delivering relevant content effectively to the beneficiaries and Health Workers.

Inbound SMS functionality will be used to obtain feedback on the MCTFC Calls made to the beneficiaries.

B. Phase II Scope: Operation, Maintenance & On-Going Support for MCTFC Project

- The activities related to the 'Operation and Maintenance' of the project from the date of go live of MCTFC are enlisted below:
 - i. New System / application login details
 - ii. Reports as required for evaluation of SLA
 - iii. Dialler report
 - iv. EMS reports
 - v. Documentary evidence for payment of applicable taxes and duties
 - vi. Any other document / requirement as per contract
- License for the call centre operation for the project: Call centre license from DoT and it should in the name and under the ownership
- Recurring Security Audit for the project: Subsequent audit of application in case of any major change or annually whichever is earlier.
- On-going support for implementation of additional requirements of MoHFW from the date of Go-Live of the project:
- Exit Management Phase: **MCTFC-HSP needs to submit the Exit Management plan as mentioned in section 9.1.** The MCTFC-HSP must ensure that they offer consistent services that comply with the predefined service level agreement (SLA) failure to compliance may lead to penalties mentioned in detail as per section 6.

1. Operation and Maintenance of MCTFC Solution

- MCTFC-HSP shall carry out MCTFC operations from the date of Go-Live. HSP will be responsible for Phase II i.e., Operation and maintenance of the MCTFC Solution from the date of Go-Live. It may be clarified that the date of Go-Live as approved by MoHFW, shall be treated as the first day of Phase II.

- MCTFC-HSP may design its solution which may or may not use the existing infrastructure. In case the MCTFC-HSP does not use the existing IT or non-IT infrastructure, its disposal would be the responsibility of HSP.
- MCTFC-HSP will be responsible for maintaining all the components of MCTFC Solution. The bidder should ensure compliance with the SLA requirement for the entire project duration.
- The MCTFC-HSP will be responsible for maintaining all the components of MCTFC Project including existing infrastructure. In case HSP decides to replace any existing IT / non-IT infrastructure components (e.g., System server, Batteries, Chairs, computers, etc), with a new IT / non-IT infrastructure component, the HSP would have to ensure that the supplied component have equivalent / better specification as per prevailing/ current specifications of available infrastructure. The MCTFC-HSP would also ensure that the new IT / non-IT infrastructure components are not end of sale products. MCTFC-HSP will be responsible for the disposal of the obsolete component.
- MCTFC-HSP will translate the questions to other languages and get it validated by MoHFW for convenience of Helpdesk Agents.
- MCTFC-HSP needs to propose their new ICT and non-IT infrastructure considering their usage for 5 years. MCTFC-HSP will manage the system and carry out the periodic maintenance and modifications during the contract period to ensure compliance with SLA. MCTFC-HSP will ensure updation by the OEMs from time to time to ensure smooth operation.
- Insurance of all the IT and non-IT infrastructure will be the responsibility of the HSP.
- The MCTFC-HSP must be able to manage the licenses of the software according to the need.
- The agency shall design and submit the overall approach for MCTFC operations, which will include but not limited to the following:
 - i. Defining various procedures linked to outbound and inbound calls like standard call handling procedure, call routing procedure etc.
 - ii. Detailed plan including timelines for setup of MCTFC solution
 - iii. Plan for incident (ticket) creation and its management
 - iv. Developing call/email/SMS scripts for various types of calls, emails, and SMSs.
 - v. Complaint Handling Mechanism:
 - The selected bidder shall design a detailed escalation matrix for resolving the complaints.
 - Any complaint regarding provision of services (covered under the Project) shall be taken very seriously by the MoHFW. The nouns to prove such complaint is invalid, would lie with the client. In case any such complaint is found true and reasonable, the bidder may be penalized by MoHFW (depending on the facts and seriousness of complaint).

The MCTFC Solution catering to the requirements of Beneficiaries, Health Workers and Helpdesk Agents should also include following indicative features:

- Finalization of backup policy and Disaster Recovery Management.
- Automated transfer of required data between the proposed MCTFC Solution and the existing MCTFC Project.
- Web Services or any other trending technologies to facilitate interaction between existing MCTFC Project, enhanced MCTFC Solution and other systems which need to be integrated soon.
- Provision for Comprehensive and Automated MIS reports and data transfer.
- One time migration of data from the existing MCTFC Project to the new enhanced MCTFC Solution and data enrichment where necessary. Schemas of the existing data may be provided to the MCTFC-HSP on request.
- Secure login-in for each user along with audit/log trail.
- MCTFC solution may support the Single Sign On (SSO) (Connect Once-Access everywhere) by a single user to access different modules/functions with proper authorizations.
- There should be a mechanism for Version Control of MCTFC Solution using software like GitHub, GitLab, SVN and extensively use Bug Reporting & Tracking tools.
- Mechanism to ensure through version control that any change in rules/procedure etc. does not make the data/information, etc. misleading, incompatible, or corrupt.
- Design should support Extensive portal Analytics and Statistics to be provided. Traffic reports, visitor analysis, duration analysis, top landing pages and top exit pages, other statistical reports should be provided as per the requirement of MoHFW.
- The system should be easy to navigate for prospective users of MoHFW for MCTFC Solution.
- Proposed System should be accessible on all platforms and all major popular browsers (e.g., Internet Explorer, Mozilla Firefox, Google Chrome, Safari, Opera, etc.).
- Portability to any of the Mobile Platforms (ex. Smart phones & Tablets) and Mobile browsers.
- Audit Trail should be maintained as per guidelines issued by CERT-IN throughout the system and database but should be kept separate as far as possible from main tables including Login attempts with time, IP Address, etc. and any other changes in data with time, IP Address etc.
- The proposed System to be implemented using either proprietary or any Open-Source stable platform compatible with NIC Cloud Server or any other Cloud server having Data Centre in India and shall be implemented by the MCTFC-HSP on the Cloud server keeping a centralized code repository and database with replication to ensure quick responses.

Note: Features requirements mentioned above are indicative and incremental in nature. HSP may introduce the advance equipment as and when required and may be utilize for the project after getting approval from competent authority of MoHFW to give a better system.

2. On-going support for implementation of additional requirements of MoHFW

- The MCTFC-HSP shall implement and rollout any additional requirements specified by MoHFW during the post-implementation period of the project.
- These additional requirements may include addition of other programmes of MoHFW to the MCTFC Project or inclusion of the currently outsourced helpdesks. This may include changes / additions in the existing MCTFC Solution or development of new component

in MCTFC 2.0 Project for the respective programme.

- For this component, the MCTFC-HSP needs to carry out all the activities such as requirement analysis, FRS preparation, SRS preparation, SDD design, preparation of ICT requirements, software development, implementation, rollout, training, preparation of instruction / operational / user manuals etc. as per the requirement of MoHFW. As and when the need arises, the TCC in discussion with the MCTFC-HSP shall freeze the scope of work and finalize the skill sets (team composition) and man-month efforts required for completion of the envisaged task. MCTFC-HSP needs to deploy all the resources that are required on-site for the implementation of MCTFC Solution during implementation phase. The details of resources that would be on-site for implementation phase have been given in [Annexure 4](#).
- MCTFC-HSP will submit the requirement of additional man effort required for any ongoing support for implementation of additional requirements of MoHFW. TCC will assess the efforts proposed by the MCTFC-HSP and the decision of TCC in this regard would be final and binding on the MCTFC-HSP.

Annexure 7. SLA Definition and Measurement

1. The SLA specifies the expected levels of service (i.e., baseline service level) to be provided by the HSP to various stakeholders of the MCTFC project. Payment to the HSP is linked to the compliance with the SLA metrics laid down in the tables provided subsequently. The tables also specify the limits and metrics for lower / higher performance and breach levels.
2. The SLAs consist of specific set of parameters for ensuring the desired performance level of MCTFC and a summarized metrics of the SLA parameters is provided in the table below and detailed out subsequently.
3. HSP will get 100% of quarterly payment if the baseline performance metrics are complied with (and if no deductions are imposed as specified in the RFP). The HSP will get lesser payment in case of a lower performance on any parameter.

A. SLA Monitoring (MCTFC)

The SLA parameters shall be measured on a daily / weekly / monthly / quarterly basis as per the individual SLA parameter requirements; through appropriate SLA measurement tools to be designed by the HSP for the purpose. If the performance of the system / services is degraded significantly at any given point in time during the project duration and if immediate measures are not implemented and issues are not rectified to the complete satisfaction of MoHFW or an agency designated by them, then MoHFW shall have the right to take appropriate corrective actions including termination of the contract.

It is to be noted that the maximum penalty at any point of time on a cumulative basis shall not exceed 10% of project cost as per the signed contract. In case the penalty exceeds 10%, or HSP gets an SLA score of less than 60 for three consecutive quarters, MoHFW reserves the right to terminate the contract.

The SLAs shall be reviewed periodically at the option of MoHFW and if required, SLAs will be revised after taking the advice of the HSP, Project Management Unit and other agencies. The revised SLAs shall not have any financial implications on the MoHFW or financial advantage to the bidder / HSP.

B. Cloud Service Level Terms (MCTFC 2.0)

Service Levels:

The following Service Levels apply to the new HSP for Cloud Services and the terms and conditions that are described in more detail below:

Actual performance against the above-mentioned Service Levels will be measured using the SLA monitoring tool which needs to be developed by the new HSP. The SLA report should also be generated for the SLA items from the monitoring tool to which MoHFW should also have access for verification purposes for ascertaining the validity of the report.

Subject to the Terms and the remainder:

- a. **Service Uptime Target:** For Cloud service deployments, the new HSP must provide 99.50% availability of Cloud Servers. This Service Level only covers unavailability of a Cloud Server due to the hardware and hypervisor layers delivering individual Cloud Servers. A Cloud Server will be deemed “available” for purposes of this Service Level if

the virtualization hardware and hypervisor layers delivering individual Cloud Servers are available and responding to the Monitoring Tool.

b. **Support for Incident Management:**

- Support for Incident Response Time Target: For any Incident properly reported by MoHFW, the new HSP must support personnel intended to contact MoHFW regarding such Incident within thirty (30) minutes from the time the Incident was initially reported to MoHFW.
- Support for Incident Resolution Time Target: For any Incident properly reported by MoHFW, the new HSP must support personnel intended to contact MoHFW regarding such Incident within 30 minutes from the time the Incident was initially reported to MoHFW. And permanent resolution must be provided by the new HSP within 720 minutes or not more than 1440 minutes.

c. **Latency Target:** The new HSP intends to provide a Maximum Latency (Maximum RTT) of less than one millisecond (1ms) for the transfer of data packets from one Cloud Server to another Cloud Server within the same Cloud Network. “Latency” means the amount of time it takes for a packet of data to travel from one point to another. Latency measurements will be determined by the SLA Monitoring Tool.

d. **Security breach including Data Theft / Loss/Corruption:** Any incident wherein system including all cloud-based services and components are compromised or any case wherein data theft occurs (includes incidents pertaining to CSPs only) should be penalized.

After the go-Live of MCTFC 2.0 the Cloud Service Level Agreement will be imposed along with the SLA mentioned above

S. No.	Metric	Score for baseline metrics
I	Application	100
A.	Availability	35
B.	Performance	30
C.	Key call centre parameters	35
II	Cloud Server	50
A	Availability	25
B	Security	25
TOTAL		150

HSP will get 100% of quarterly payment if the baseline performance metrics are complied with (and if no deductions are imposed as specified in the RFP). The HSP will get lesser payment in case of a lower performance on any parameter.

S. No.	SLA score range	Deductions
Slab 1	<148 & >=140	0.2% deduction for every point <148
Slab 2	< 140 & >=130	0.4 % deduction for every point < 148
Slab 3	< 130	0.6 % deduction for every point < 148
Note: The percentage penalty would be calculated on the bill raised by the HSP for the concerned quarter entirely based on the slab on which SLA scores are falling.		
Example: SLA Score of 126 will lead to a deduction of 13.2% (i.e., 22 x 0.6% =13.2%)		

SLA: Application

S. No.	Metric	Baseline Metrics		Measurement Method
		Metric	Score	
A.	AVAILABILITY		35	
1	MCTFC Application Uptime MCTFC application uptime (% of time for which the MCTFC application was available during the operational hours excluding scheduled maintenance agreed by TCC, if any). It will be total cumulative uptime of application and calculated as 'Total uptime of application in minutes ÷ Total minutes of operations in a day.' <u>For Monthly SLA Monitoring</u> Average of the day wise MCTFC application uptime shall be taken for arriving at the monthly score for the concerned parameter based on report generated by EMS. <u>For Quarterly SLA Monitoring</u> Average of the month-wise scores shall be taken for the quarterly measurement.	>98%	15	Measured from the SLA monitoring tool to be provided by the HSP with integrated information / reports from EMS solution implemented.
		>96% & <=98%	13	
		>95% & <=96%	10	
		>=93% & <=95%	5	
		<93%	0	
2	Percentage Availability of Manpower SLA will be calculated based on the number of resource persons present against the number of days	>98%	20	Percentage Availability of Manpower will be calculated as per the details given below: Weightage factor for Project Manager: Medical Counsellor:

S. No.	Metric	Baseline Metrics		Measurement Method
		Metric	Score	
	of presence required for the resource persons on site, for the quarter.	>95% & <=98%	17	Supervisor: Full Stack Developer: Quality Analyst: IT Support: Helpdesk Agents: other resource persons (if any) =4:3:2:2:2:2:1 - Percentage Availability = number of days of actual presence in quarter of [Project Manager X 4 + Medical Counsellor X 3 + Supervisors X 2 + Full Stack Developer X 2 + IT Support X 2 + Quality Analyst X 2 + Helpdesk Agent X 2+ other resources (if any)]/number of days of presence required in a quarter of [Project Manager X 4 + Medical Counsellor X 3 + Supervisors X 2 + Full Stack Developer X 2 + IT Support X 2 + Quality Analyst X 2 + Helpdesk Agent available X 2 + other resources (if any)] Note: - Number of days of presence required is based on the number of days the MCTFC is operational as per the norms of this RFP for the said period - A report on this SLA needs to be developed in the system with integration to information captured in the access system and system login details - The presence of a
		>90% & <=95%	13	
		>=80% & <=90%	8	
		<80%	0	

S. No.	Metric	Baseline Metrics		Measurement Method
		Metric	Score	
				manpower will be considered for the entire duration of the operational hours
B.	PERFORMANCE		30	
3	Feedback on Call Centre Performance SLA will be calculated based on the SMS feedback received from the beneficiaries and health workers. For Quarterly SLA Monitoring SLA will be measured on quarterly basis as the percentage number of SMS having satisfactory performance against the number of SMSs received as feedback.	> 90%	10	A report on this SLA needs to be developed in the system with integration to the SMS solution of MCTFC.
		>=85% & <=90%	8	
		>=80% & <85%	6	
		>=75% & <80%	4	
		<75%	0	
4	Calls Heard for Quality Assessment (CQ_a) The SLA will be monitored based on the number of calls heard by the Quality Analysts every day for quality assessment, wherein 160 is the minimum calls that Quality Analysts should hear (i.e., 40 by each Quality Analyst). However, HSP's Quality Analysts may hear more calls to effectively	>=160	6	CQ _a is calculated using the formula given below: $= Nq \div Nd$ Where: - Nq is the number of calls heard by all the Quality Analysts in a quarter - Nd is the total number of days for which MCTFC was operational for the concerned quarter as per the norms of this RFP.
		<160 & >150	5	
		<=150 & >145	4	
		<=145 & >140	2	
		<140	0	

S. No.	Metric	Baseline Metrics		Measurement Method
		Metric	Score	
	manage SLA. <u>For Quarterly SLA Monitoring</u> SLA will be measured on quarterly basis as the average day-wise number of calls heard by the Quality Analysts.			MoHFW may increase/decrease the minimum number of calls to be heard by the QA. A report on this SLA needs to be developed in the MCTFC system.
5	Call Quality Analysis by Quality Analyst SLA will be measured on quarterly basis based on the average quality score provided by Quality Analysts on the live / recorded calls made by Helpdesk Agents.	>=90	10	Average Quality Score = Sum of scores on the quality form (indicated in the RFP) filled by Quality Analyst ÷ Number of calls heard. Note: For every call heard by the Quality Analyst it is mandatory that he / she should fill the form. HSP shall finalize parameter for quality check and develop a form in consultation with MoHFW
		>=80 & <90	8	
		>=70 & <80	6	
		>=60 & <70	3	
		<60	0	
6	Call back to the Inbound calls within 90 seconds. MCTFC solution should be able to respond to an inbound call and call back within 90 seconds during MCTFC operational hours. <u>For Quarterly SLA Monitoring</u> SLA will be measure based on the average duration in which the call is being responded by HSP.	=<90s	4	Measurement of SLA will be based on the duration by which call back is made to the inbound calls. SLA will be measured for the inbound calling made to MCTFC during operational hours.
		>=90 s & <180 s	3	
		>=180 s	0	
C.	KEY CALL CENTRE PARAMETERS		35	
7	Average call handling time (including talk time as well as time on which the call was on hold)	Bo (i.e., 7 minutes or as approved by TCC)	10	Measured from the logs maintained by the MCTFC solution (Call Handling System). The reports for the same shall be generated by

S. No.	Metric	Baseline Metrics		Measurement Method
		Metric	Score	
	SLA will be monitored based on the Average Handling Time (AHT) of the MCTFC operation. <u>For Quarterly SLA Monitoring</u> Average of the day wise SLA scores will be taken for the quarterly SLA measurement.	minutes		the MCTFC solution and would be made available in SLA monitoring tool to be developed by the HSP.
		> Bo & <= (Bo+1) minutes	8

SLA: Cloud

S. No.	Metric	Baseline Metrics		Measurement Method
		Metric	Score	
A	Availability		25	
1.	Availability of each cloud service (Applicable for all Cloud Service as defined in Cloud Services Bouquet) Availability means, the aggregate number of hours in a calendar month during which cloud service is actually available for use through command line interface, user/admin portal and APIs(which ever applicable) Uptime Calculation for the calendar month: {[Uptime Hours in the calendar month + Scheduled Downtime in the calendar month) / Total No. of Hours in the calendar month] x 100}	>=99.5%	20	Measured from the SLA monitoring tool to be provided by the new HSP.
		<99.5% to >= 99.00%	15	
		<99.00% to >= 98.50%	10	
		<98.50% to >= 98.00%	05	
		<98%	0	
B	Security		30	
2.	Vulnerability reports Timely vulnerability reports shared by CSP with MoHFW within 5 working days of vulnerability identification. Measurement period is calendar month.		6	Measured from the SLA monitoring tool to be provided by the new HSP.
	Percentage of timely vulnerability	>=99.5%	12	Measured from the

S. No.	Metric	Baseline Metrics		Measurement Method
3.	corrections performed by CSP. a) High Severity – Perform vulnerability correction within 30 days of vulnerability identification. b) Medium Severity – Perform vulnerability correction within 60 days of vulnerability identification. c) Low Severity – Perform vulnerability correction within 90 days of vulnerability identification.	<99.95% to >= 99.00%	8	SLA monitoring tool to be provided by the new HSP. Measurement period is calendar month.
		<99.00% to >= 98.00%	4	
		<98%	0	
5.	Resolution Time: Time taken to resolve the reported ticket/incident from the time of logging. a) Severity 1 – incidents should be resolved within 30 minutes of problem reporting. b) Severity 2 – incidents should be resolved within 04 hours of problem reporting. c) Severity 3 – incidents should be resolved within 16 hours of problem reporting. <i>Indicative list of Severity Levels are defined in below table:</i>	>=99.5%	12	Measured from the SLA monitoring tool to be provided by the new HSP. Measurement period is calendar month.
		<99.95% to >= 99.00%	8	
		<99.00% to >= 98.00%	4	
		<98%	0	
6.	Security breach including Data Theft / Loss/Corruption Any incident wherein system including all cloud-based services and components are compromised or any case wherein data theft occurs (includes incidents pertaining to CSPs only)	No breach		These penalties will not be part of overall SLA penalties cap per month. In case of serious breach of security wherein the data is stolen or corrupted, MoHFW reserves the right to terminate the contract.
		Severity 1	Penalty of Rs 15 Lakh per incident.	
		Severity 2	Penalty of Rs 10 Lakh per incident.	
		Severity 3	Penalty of Rs 5 Lakh per incident.	

Severity Levels:

Below severity definition provide indicative scenarios for defining incidents severity. However

Government Department/Agency will define / change severity at the time of the incident or any time before the closure of the ticket based on the business and compliance impacts.

Severity Level	Description	Example
Severity 1	Environment is down or major malfunction resulting in an inoperative condition or disrupts critical business functions and requires immediate attention. A significant number of end users (includes public users) are unable to reasonably perform their normal activities as essential functions and critical programs are either not working or are not available	• Non-availability of VM. • No access to Storage, software or application
Severity 2	Loss of performance resulting in users (includes public users) being unable to perform their normal activities as essential functions and critical programs are partially available or severely restricted. Inconvenient workaround or no workaround exists. The environment is usable but severely limited.	Intermittent network connectivity
Severity 3	Moderate loss of performance resulting in multiple users (includes public users) impacted in their normal functions.	

Note: The deductions shall be made only for the reasons attributable to the HSP. Any risks / issues foreseen by the HSP shall be brought to the notice of the MoHFW immediately. However, if the HSP falters in one or more of the SLAs resulting in lower performance or breach, then deduction from the quarterly payable amount would be calculated as follows:

- i) The SLA parameters shall be measured on a daily / weekly / monthly /quarterly basis (average) as per the individual SLA parameter requirements. However, if the performance of the solution / services is degraded significantly (operating at levels of breach for any SLA for a period of 24 Hrs or more) at any given point in time during the project duration and if the immediate measures are not implemented and issues are not rectified to the satisfaction of MoHFW, it will have the right to take appropriate disciplinary action including termination of the contract.

Note 1	Scheduled maintenance time will be excluded from the computation
Note 2	Scheduled maintenance time shall not exceed 4 hours in a calendar month
Note 3	Planned maintenance shall be scheduled between 10 pm and 2 am IST on the intervening night of second Saturday and Sunday
Note 4	Scheduled maintenance period(s) shall be planned and published for six months at a time and in the event of any changes to this plan, the same shall be notified at least 3 days in advance of the schedule
Note 5	The MCTFC management system developed and deployed by the HSP shall be used for monitoring the issue resolution timelines and HSP shall be responsible for building such functionality into the MCTFC management solution deployed

	for MCTFC
Note 6	MCTFC system shall be available for entire operations of MCTFC wherein the users of MCTFC both internal and external user can log the calls through SMS / portal / e-mail
Note 7	MCTFC shall operate on the timings as decided by the MoHFW
Note 8	For user management, activities shall be carried out only after the approval from the designated authority in writing or through the online communication mechanism viz. official e-mail, call logging software, etc.

IT Infrastructure					
1	Rack-36 U	Val rack	36- U rack with Accessories	Unit	1
2	Blade Chassis	HP	HP BLc7000 CTO 3 IN LCD Plat Enclosure, 2 No. HP B-series 8/24c Blade System SAN Switch	Unit	1
3	Database Server	HP	HP BL460c Gen9 10Gb/20Gb FLB CTO Blade, 2x 1TB SAS HDD, 64 GB Ram, CPU 2* 8 Core (Gen9 E5-2630v3)	Unit	2
4	Application server for CRM	HP	HP BL460c Gen9 10Gb/20Gb FLB CTO Blade, 2x 1TB SAS HDD, 64 GB Ram, CPU 2* 8 Core (Gen9 E5-2630v3)	Unit	13
5	CRM-Load Balancing Server	HP	HP BL460c Gen9 10Gb/20Gb FLB CTO Blade, 2x 1TB SAS HDD, 64 GB Ram, CPU 2* 8 Core (Gen9 E5-2630v3)	Unit	

S. No	Item	Make	Model	Unit of Measurement	Quantity delivered at MCTFC
6	Dialler Server	HP	HP BL460c Gen9 10Gb/20Gb FLB CTO Blade, 2x 1TB SAS HDD, 64 GB Ram, CPU 2* 8 Core (Gen9 E5-2630v3)	Unit	
7	Domain Controller	HP	HP BL460c Gen9 10Gb/20Gb FLB CTO Blade, 2x 300 GB SAS HDD, 64 GB Ram, CPU 2* 8 Core (Gen9 E5- 2630v3).	Unit	
8	ADC Server (File Server)	HP	HP BL460c Gen9 10Gb/20Gb FLB CTO Blade, 2x 300 GB SAS HDD, 64 GB Ram, CPU 2* 8 Core (Gen9 E5- 2630v3).	Unit	
9	Testing/UAT Servers/Development	HP	HP BL460c Gen9 10Gb/20Gb FLB CTO Blade, 2x 1TB SAS HDD, 64 GB Ram, CPU 2* 8 Core (Gen9 E5-2630v3).	Unit	
10	EMS Virtualized server	HP	HP BL460c Gen9 10Gb/20Gb FLB CTO Blade, 2x 1TB SAS HDD, 64 GB Ram, CPU 2* 8 Core (Gen9 E5-2630v3).	Unit	
11	EMS Physical Server	HP	HP BL460c Gen9 10Gb/20Gb FLB CTO Blade, 2x 1TB SAS HDD, 64 GB	Unit	

S. No	Item	Make	Model	Unit of Measurement	Quantity delivered at MCTFC
			Ram, CPU 2* 8 Core (Gen9 E5-2630v3).		
12	Antivirus Server	HP	HP BL460c Gen9 10Gb/20Gb FLB CTO Blade, 2x 1TB SAS HDD, 64 GB Ram, CPU 2* 8 Core (Gen9 E5-2630v3).	Unit	
13	SAN	HP	HP 3PAR StoreServ 7200c 2N Fld Int Base, 40 HP M6710 600GB 6G SAS 10K 2.5in HDD, 8 HP M6710 480GB 6G SAS 2.5in cMLC SSD.	Unit	1
14	SAN Switch	HP	HP SN3000B 24/24 FC Switch, 24 HP 8Gb Short Wave B-Series SFP+ 1 Pack	Unit	1
15	Core Switch	HP	19" Rack Mountable, 24 x 10/100/1000 BaseT Port, 24 x 1G SFP Port populated with required Transceiver's modules, 8 Port SFP+ Port supporting both 1 and 10Gbps and populated with required Transceivers modules, 8 x 10G BaseT Port	Unit	1
16	Network Switch	HP	19" Rack Mountable, 512 MB SDRAM and 1 GB flash memory, switching capacity of	Unit	3

S. No	Item	Make	Model	Unit of Measurement	Quantity delivered at MCTFC
			128 Gbps 48 x Gigabit and four 10-Gigabit ports		
17	UPS	Numeric	Numeric 5kVA - (Model: HP Max)	Unit	1
18	Firewall UTM	Fortinet	FG-900D, 2 x 10GE SFP+ slots, 16 x GE SFP slots, 16 x GE RJ45 ports, 2 x GE RJ45 management ports, FortiASIC NP6 and CP8 hardware accelerated, 128GB SSD onboard storage, dual AC power supplies	Unit	2
19	Core Router	HP	4 Ports of 100/1000 BaseT Mbps Ethernet ports (RJ-45) with 2 Shared 1G SFP Port supporting WAN & LAN, 2GB DRAM and 256MB Flash Memory, SNMP V1/V2c/V3, RMON/sFlow, RADIUS/TACACS+ for management security	Unit	1
20	Media Gateway	Grand stream (C-zentrix)	Grand stream Media Gateway GXW4224 - Analog 24 port	Unit	5
21	Server Load Balancer	Array	APV 2600-S1 AppVelocity-S TPS ADC	Pcs	2

S. No	Item	Make	Model	Unit of Measurement	Quantity delivered at MCTFC
22	Dial PAD & headset	Plantronics	Headphone, Mic & dial pad	Pcs	100
23	Desktops	HP	HP Pro 3330 Microtower PC	Pcs	6
24	Desktops	HP	HP 8200 (i5, 2GB RAM, 500GB HDD, 18.5 Inch Monitor)	Pcs	80
25	Desktops	Acer	Intel Core i5, 500 GB HDD, 1-2 GB Ram, 18.5 Inch Monitor	Unit	10
26	Centralized Logging & Reporting Appliance	Fortinet	FAZ-300D, Centralized log & analysis appliance - 4 x GE RJ45, 4 TB storage, up to 15 GB/Day of Logs	Unit	1
27	IPS	Fortinet	FG-240D, 42 x GE RJ45 ports (including 40 x LAN ports, 2 x WAN ports), 2 x GE SFP DMZ ports, FortiASIC NP4Lite and CP8 hardware accelerated, 64GB onboard SDD storage	Unit	2
28	Gateway Device	C-zentrix	4-Port T1/E1/PRI Gateway	Unit	3
			Scalable upto 16 Ports (By adding another card, cost will be borne by Customer)		

[B]: Bill of Material under KMA Project (Existing)

Software / Hardware	Item Description / Specification	Quantity	Usage Details
OP Manager	ManageEngine OP Manager Essential Edition - Perpetual Licensing Model - Annual Maintenance and Support fee for 50 Devices Pack (Unlimited Interfaces)	1	Network, server, and virtualization monitoring software.
SYMC	SYMC BACKUP EXEC 2014 SERVER WIN PER SERVER INITIAL ESSENTIAL 12 MONTHS EXPRESS BAND S	1	Software use to take backup/restore backup.
SYMC	SYMC BACKUP EXEC 2014 AGENT FOR WINDOWS WIN PER SERVER INITIAL ESSENTIAL 12 MONTHS EXPRESS BAND S	1	Software use to take backup/restore backup.
SYMC	SYMC BACKUP EXEC 2014 AGENT FOR LINUX LNX PER SERVER INITIAL ESSENTIAL 12 MONTHS EXPRESS BAND S	7	Software use to take backup/restore backup.
Network Switch	Network Switch Cisco WS-C2960X-48TS-L FOC1834S4XB	1	Used in Data Centres to connect servers, storage devices, and other critical network infrastructure.
Network Switch	Network Switch Cisco WS-C2960X-48TS-L FOC1834S51R	1	Used in Data Centres to connect servers, storage devices, and other critical network infrastructure.
Network Switch	Network Switch Cisco WS-C2960X-48TS-L FOC1839S2VJ	1	Used in Data Centres to connect servers, storage devices, and other critical network infrastructure.
Network Switch	Network Switch Cisco WS-C2960X-48TS-L FCW1828A50Z	1	Used in Data Centres to connect servers, storage devices, and other critical network infrastructure.
Storage	Storage IBM V3700 7882059	1	Used for Data Storage.
Storage	Storage IBM V3700 7882075	1	Used for Data Storage.
Server	Server IBM x3650 M5 06FHDYH - ESX Server 1	1	These are the Application server which handles backend process, also database and load balancer configuration and content management system.

Software / Hardware	Item Description / Specification	Quantity	Usage Details
Server	Server IBM x3650 M5 06FHDYG - ESX Server 2	1	These are the Application server which handles backend process, also database and load balancer configuration and content management system.
Server	Server IBM x3250 M5 06ETLYC - ESX Server 3	1	These are the Application server which handles backend process, also database and load balancer configuration and content management system.
Server	Server IBM x3650 M4 06FGNPW - MP Server 1	1	These are IVR server on which dialogic card configure on it.
Server	Server IBM x3650 M4 06FGNPM - MP Server 2	1	These are IVR server on which dialogic card configure on it.
Server	Server IBM x3650 M4 06FGNPX - MP Server 3	1	These are IVR server on which dialogic card configure on it.
Server	Server IBM x3250 M5 06EZPDW - Backup Server	1	Backup server.
Tape Auto Loader	Tape Auto Loader IBM TS3100 78BC957	1	Used for storing, retrieving, reading from and writing to tape cartridges.
Firewall	Firewall Cisco 5515 ASA Firewall FCH1812K5G8	1	Used for storing, retrieving, reading from and writing to tape cartridges.
Firewall	Firewall Cisco 5515 ASA Firewall FCH18187FLP	1	Used for storing, retrieving, reading from and writing to tape cartridges.
Domain	nathionalhealth.in	1	Domain Name.
SSL Certificate	wild card-*.nationalmhealth.in	1	Secure access through SSL.
RHEL	Red Hat Enterprise Linux for Virtual Datacentres (1-2 sockets) (Unlimited Guests) Standard for One Year	2	Operating System support.
